

South Central Fresno Community Emissions Reduction Program (CERP) Development

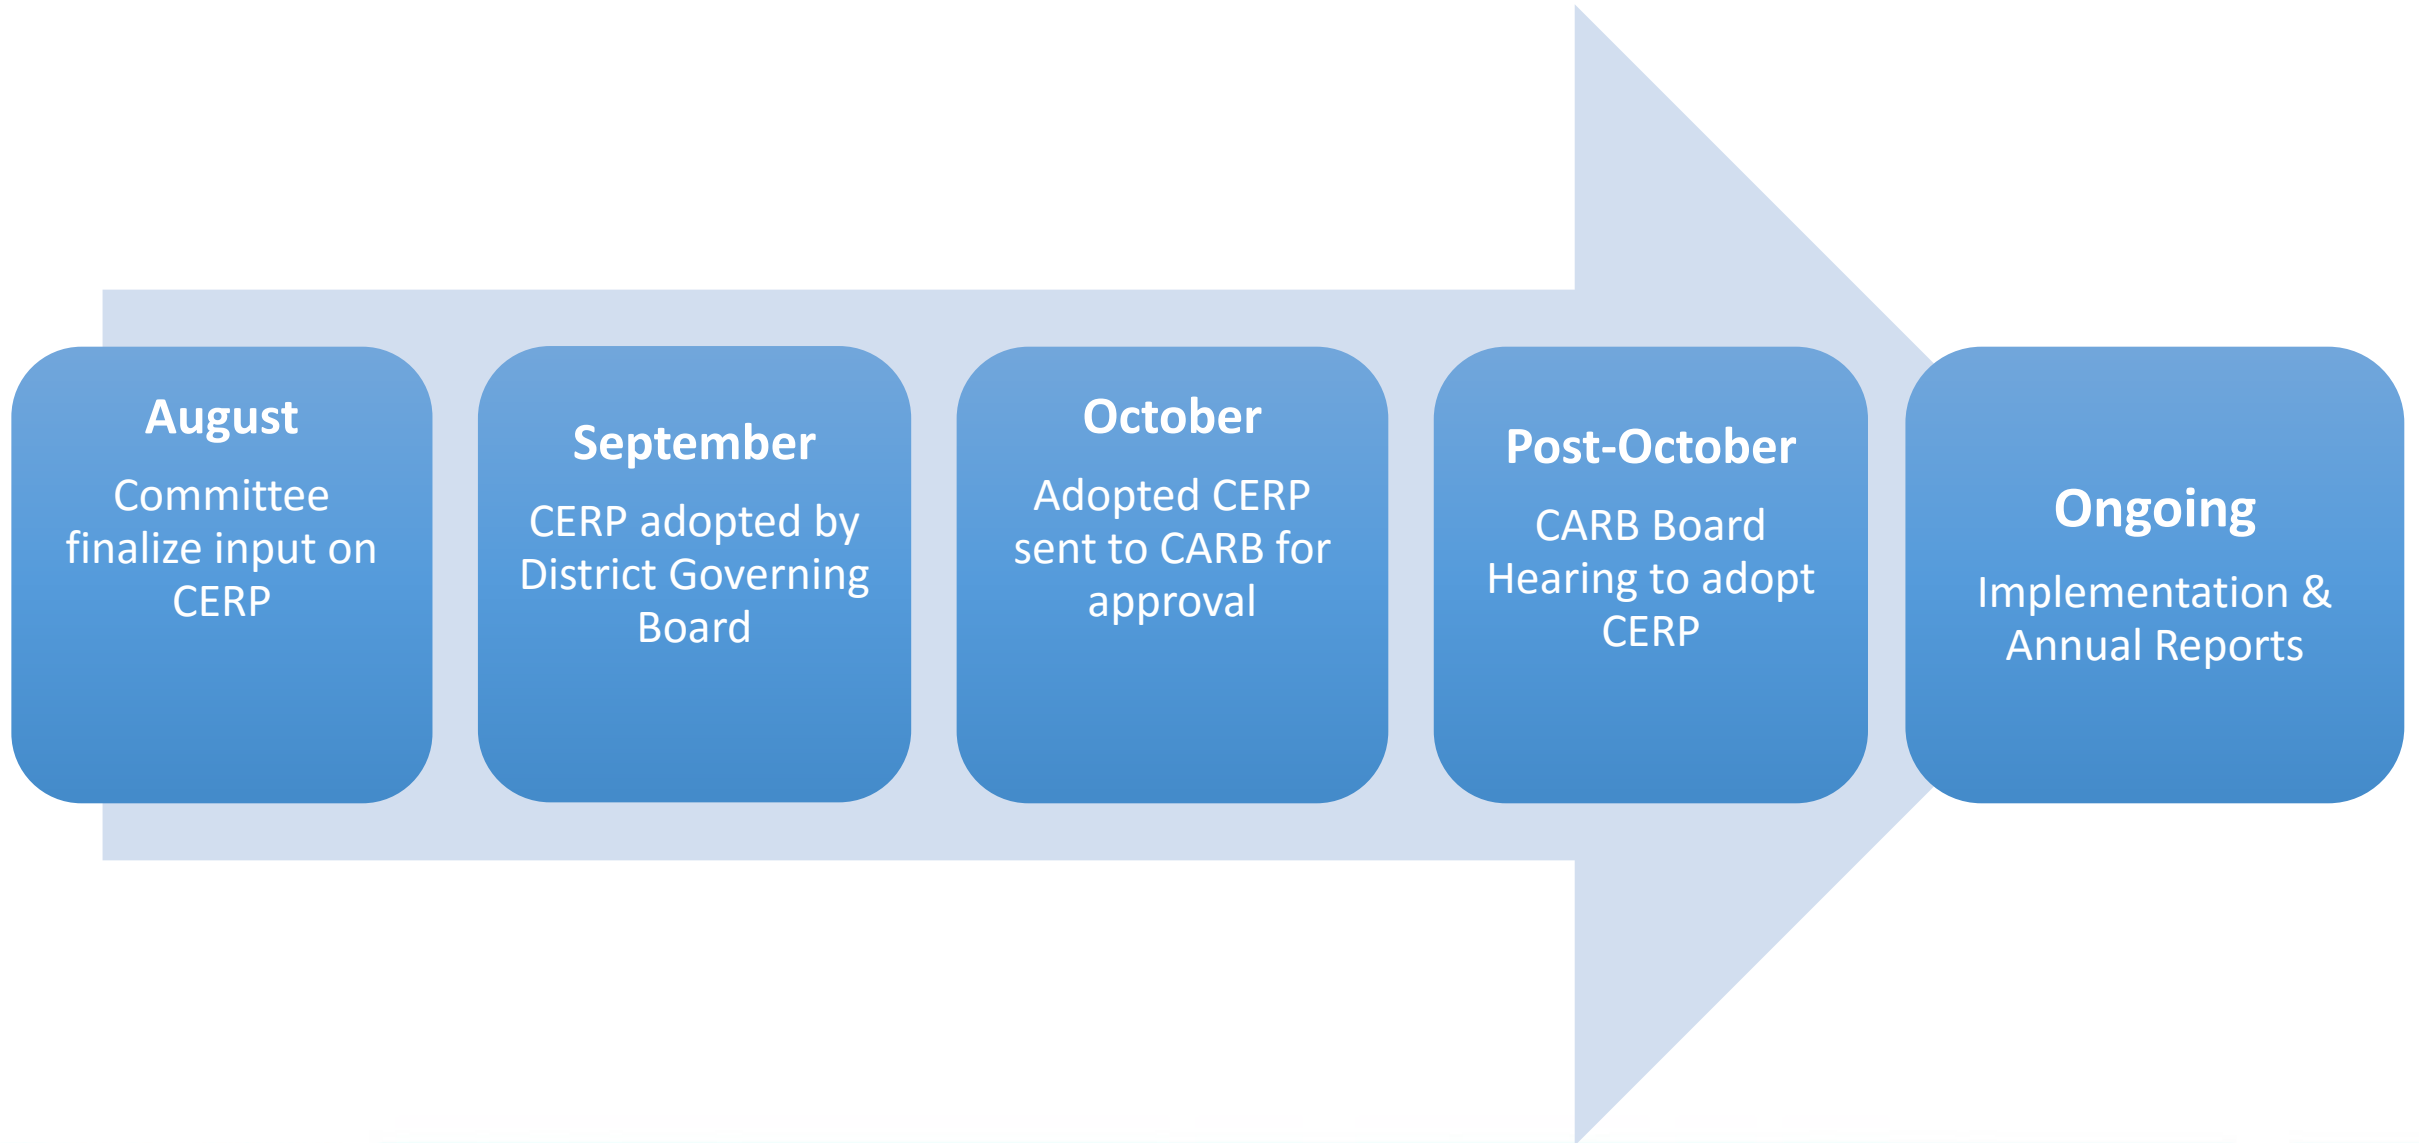

May 30, 2019

Jessica Coria, Senior Air Quality Specialist
San Joaquin Valley Air Pollution Control District

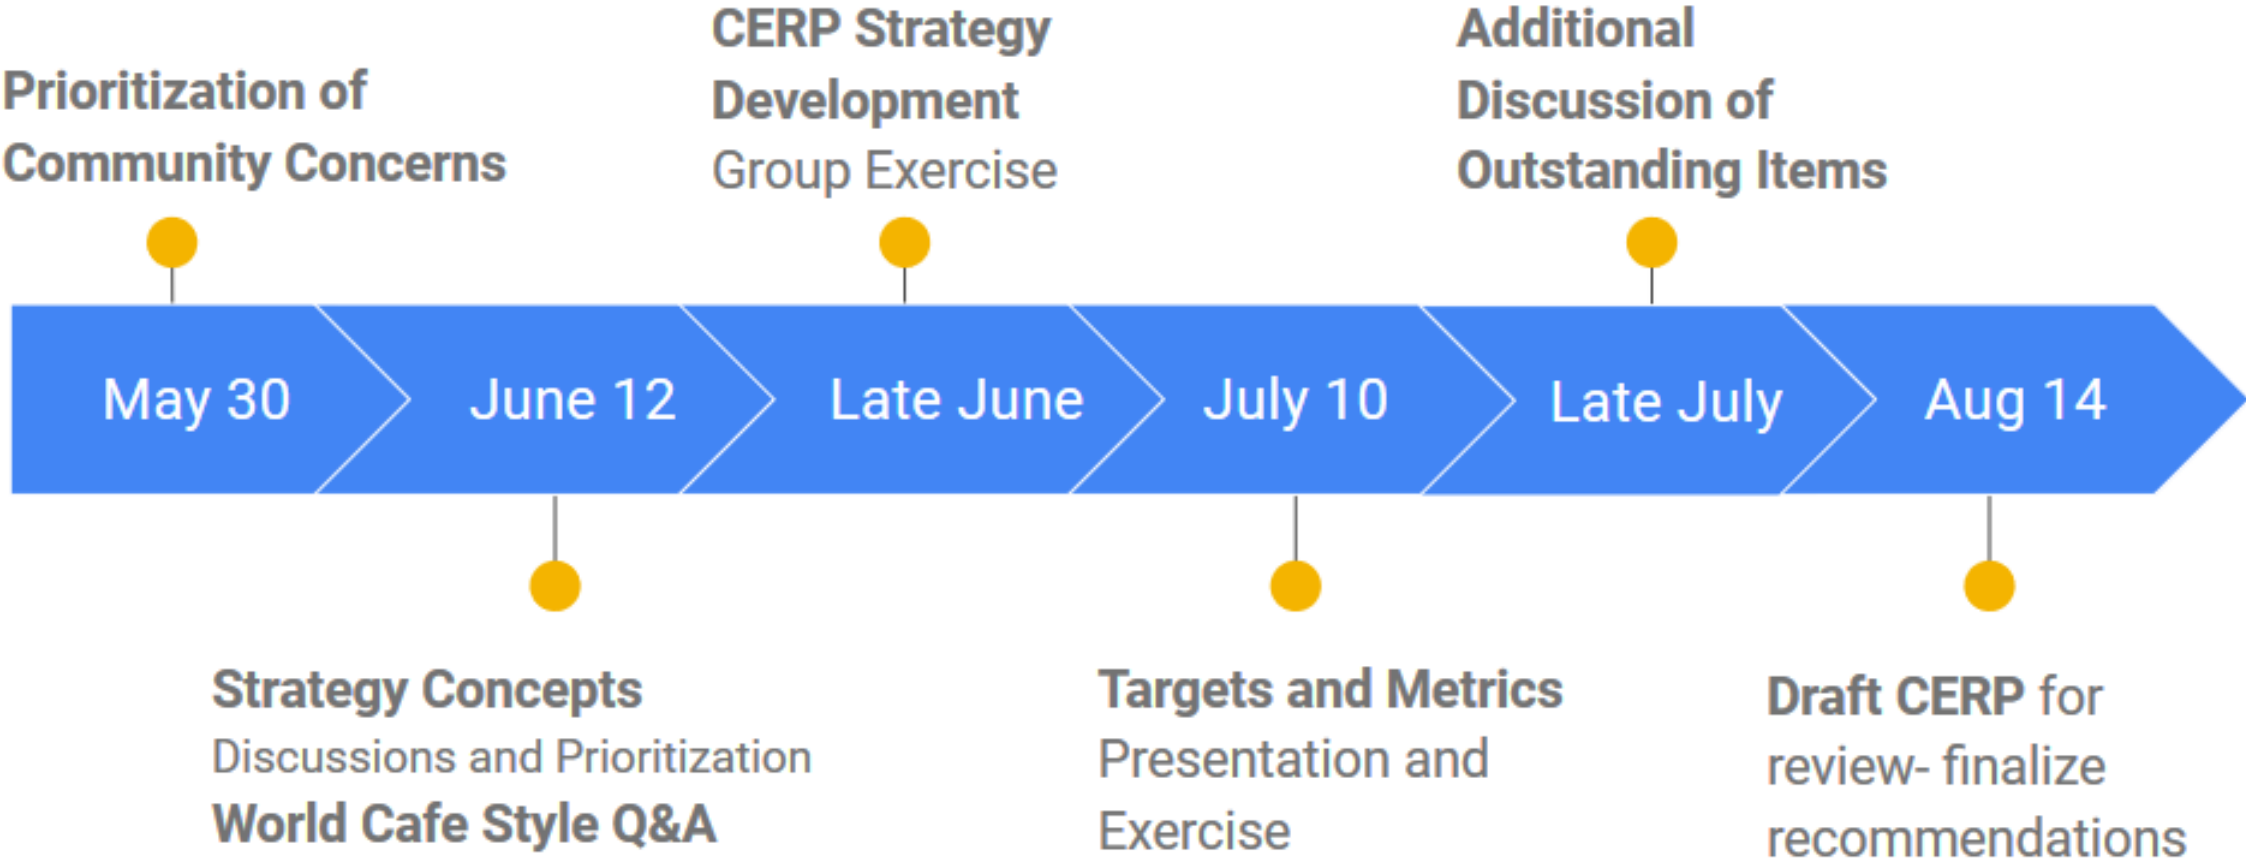

Community Emissions Reduction Programs

- Guidance on CERPs included in CARB's Community Air Protection Blueprint: Appendix C
- Elements of a CERP include:
 - Understanding the Community
 - Community partnerships and public engagement
 - **What are the Air Pollution Challenges facing the community?**
 - **What are solutions for these challenges?**
 - Implementation schedule
 - Enforcement plan
 - Metrics to track progress over time

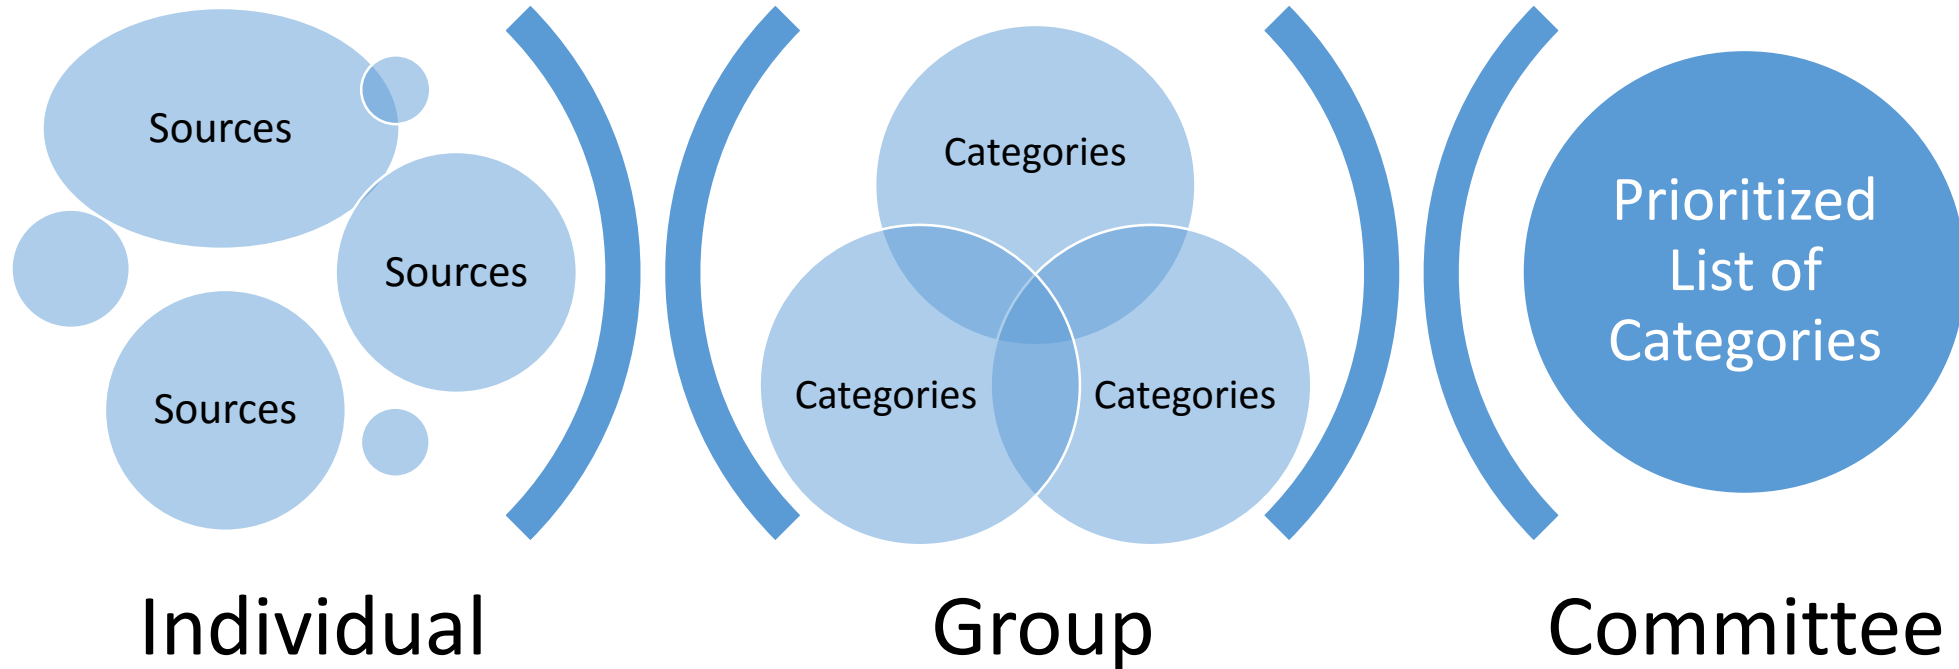

Upcoming CERP Deadlines

CERP Development Process

Prioritization of Categories of Concern

Community Prioritization Exercise

- **Step 1: Sticky Note Brainstorming of Concerns**
 - Write down the sources of pollution that you are most concerned about
 - One source per sticky note
 - Feel free to use as many sticky notes as needed
- **Step 2: Grouping Similar Ideas into Categories of Concern**
 - Work with your group to create categories of similar concerns
- **Step 3: Prioritizing Categories of Concern as a Committee**
 - The facilitator will help the entire Committee to develop a list of top community sources of concern
 - Each Committee member will be able to vote for their top sources of concern using sticky dots
