We currently have a program under the REMOVE II Program that provides incentive funding for Mechanic Training. It is an open ongoing program the District offers.

01:46:37 R- Jazzy LT: Just feel like I have to ask the obvious, isn't it possible that they use the EV truck at all if they keep their diesel truck?

02:06:42 CSC - Cynthia Pinto-Cabrera: I think it would be more helpful for health if we were notified as soon as they happened versus when the annual report comes out

02:07:14 R - Mary Elizabeth: I agree Cynthia we need more information sooner

02:11:14 CSC - Gloria Alonso: I want to second Cynthia's comment

02:13:42 Kyle Goff - CARB - he/him/his: Certainly would be happy to loop in the relevant folks at CARB to gather up more info!

02:20:40 CSC - Gloria Alonso: I had my hand raised to comment that this request for background was previously made in the June Meeting and it was inadequately addressed, as we're seeing today, our community was not equipped to comment appropriately and in a timely manner

02:26:49 R- Jazzy LT: Thanks everyone. Appreciate the conversations today and holding off on the consensus to have those conversations.

02:27:28 Kyle Goff - CARB - he/him/his: I'll try to provide some more comprehensive background information on the blueprint in the update for Stephanie and the air district folks to share out, as well -- I don't think that will entirely solve the problem on its own, but it should help. I can also see about getting some of my colleagues in here to talk about the Blueprint document, maybe give 5-10 minutes of background and context -- the timing of an early September CSC meeting should fit really nicely for preparing folks to provide comments in advance of our Board hearing

02:27:45 CSC Espe Vielma EJCW: Thank you 😊
