

Reporting About Subcommittee Activities

Working Well	Suggestions for 2021
<ul style="list-style-type: none">- Urban greening, vegetative barriers and truck rerouting committees are working well – CSC should continue- Air monitoring subcommittee could use additional participation now that we have data rolling in; this may need to be made a higher priority in the main CSC discussion agendas- We should think about the best approach to linking data to enforceability- Ownership of the subcommittees by CSC members is working well, especially when the member has expertise- Really appreciate the work on the vegetative barriers subcommittee	<ul style="list-style-type: none">- As a small group, each CERP measure may need a subcommittee and/or additional CSC member engagement to cover all the necessary activities and updates- Some CSC members are feeling uninformed about the progress being made; CSC members would love to see more progress being made, or reported on- Can issues brought up in the committees be brought back to the larger CSC more often?- Stationary sources haven't been reported on in about a year; need more frequent updates- CSC agendas are often too tight to discuss all committee updates; a table or tracker on progress would help- Subcommittee meeting notes would be helpful- Consider appointing a chair position for each subcommittee that is responsible for reporting back at the CSC meetings in writing and verbally

Website Updates

Working Well	Suggestions for 2021
	<ul style="list-style-type: none">• Members of the public may have difficulty finding information on the website• The web development team should adhere to the 3-click rule for ease of navigation• Air monitoring information should be easier to find for the general public, especially those stakeholders who are connected to the areas where the monitors are placed• The website still has some navigation challenges for the Spanish speaking participants; see 3 click rule suggestion above• Search terminology should be based on general public terminology, not technical terms• Would a CSC website training be helpful? Spanish speakers say yes

Reporting from Other Agencies

CARB, DPR, City of Fresno, etc.

Working Well	Suggestions for 2021
	<ul style="list-style-type: none">• Monitoring for pesticides has not yet been addressed by DPR or the AD; periodic updates are appreciated, but often the reports the CSC receives are too minimal• Written summary from subcommittees and partner agencies may be helpful for more robust updates• Transparency is key; CSC wants to be at the table during the discussions with partner agencies to help make decisions, not just reported back to• More communication would be helpful• Clarify decision-making authority of the CSC with these partner agencies• City council is still uninformed about AB 617 – what kind of status report or orientation can the CSC or AD give to the City Council in advance of discussions about planning process changes?• Ask city about providing status report on canal and street cleaning

Reporting about Air Monitoring

Reporting about the CERP Implementation Process

Community Co-host Suggestions

Working Well	Suggestions for 2021
<ul style="list-style-type: none">• Monitor placement in schools is important and sends the right signal to the community about the importance of air quality• Thanks to Maricela and the rest of the team for their help with social media updates• CSC members are enjoying the co-host process and opportunity	<p>CERP Implementation</p> <ul style="list-style-type: none">• Prefer to see milestones and a Gannt chart by month, as well as an estimation of completion for major tasks <p>Air Monitoring</p> <ul style="list-style-type: none">• Technical support and subject matter expertise on air monitoring is important and should be maintained moving forward; include PM 2.5, dust, mold, genetics, etc.• CARB is interested in working more closely with the CSC to share and interpret data• CSC should schedule a separate meeting to discuss and take action on some of the air monitoring concerns <p>Co-Hosts</p> <ul style="list-style-type: none">• More community co-host engagement in each meeting• Discuss co-host role at the agenda-setting/planning meetings and assign specific responsibilities• Determine the comfort level of each co-host with facilitation and technology•

2021 Reporting & Tracking Goals

If we could *fast forward* to the end of 2021... What do you think **SUCCESS** would look like in this Reporting & Tracking category?

What data, reporting & status updates are **MOST IMPORTANT** for the CSC to have in 2021?

Reporting & Tracking Goals

- Timeline on a calendar
- Expenditures and milestones; task-oriented approach to CERP implementation and reporting
- The committee isn't making clear decisions or seeing things happen as quickly as possible; give committee more opportunities to advise the AD and vote; make advisory role more clear and decision-making framework more consistent
- Measurable milestones and reporting around air quality in the CERP strategies
- Focus on trust building and relationship building; continue to discuss and disagree respectfully
- Review the blueprint at least once a year to ensure we're operating within the committee structure and priorities

CERP Prioritization

In preparation for prioritizing the CERP measures at the next meeting, please answer these questions:

Question	Suggestions/Comments
What type of written background information do you need to receive IN ADVANCE of the meetings to best prepare you for the discussion?	<ul style="list-style-type: none">• CSC needs to understand the timelines for each measure• Clarify the air monitoring information and timeframes?• Understand what else is happening with the other measures; what activities impact implementation?• Need to see a Gantt chart with milestones, funding, MOUs, etc.• Clarity around monetary capital vs. human capital (enforcement) activities• More information on the ROAR program and where we have approvals to proceed• Roles, responsibilities and plans for addressing land use discussions (in industrial zones)
Do you need a CERP refresher? Should the Air District provide a verbal recap of CERP strategies DURING the meeting?	<ul style="list-style-type: none">• Some members implied that a short overview would be helpful.
What level of detail do you need DURING the meeting?	<ul style="list-style-type: none">• Not discussed
Would you be willing to answer a Doodle Poll about your CERP priorities?	<ul style="list-style-type: none">• Yes
Would you be open to using other forms of polling technology DURING the meeting?	<ul style="list-style-type: none">• Only if translation can be seamless and there is training offered

Other Notes

Suggestions for 2021

- *The “replace woodburning devices and enhanced enforcement items in the CERP” need more gas burning fireplaces registered*
- *Need quicker response from inspectors on enforcement*
- *Are there internet connected devices that would help with enforcement in the “check before you burn time”? (Ryan referenced night vision cameras and nighttime surveillance)*
- *The City councilmember meetings did not result in much action; we need their support to move forward*
- *Funding should be available to move forward with the projects; CSC would like to see more progress (AD responded about some progress, additional outreach, reasons for delay, etc.)*
- *Knowing what is in the queue and what has been submitted would be helpful for the CSC*
- *How does prioritization align with the resolution and submission of plans related to the CERP that the AD is sending to CARB?*
- *More buses are needed for the schools*
- *There are concerns about what happens to air quality when the kids return to school*
- *If we plant more trees, we’ll need to remove old logs and trim trees that are too large*
- *Old TVs and refrigerators are becoming more prevalent, oil discharge is polluting subsoil; we need to find a program to help with that effort*
- *We should mold CSC agendas to allow for more flexibility in the discussion and free-flowing conversation*
- *What is happening with the fines? (Ryan answered that they pay for air pollution reduction activities, including having enforcement of District regulations)*
