16:44:23 From Kevin Hamilton, RRT (he, him, his) to Everyone : Just a simple google docs link of the proposed agenda posted in chat is what I'm talking about Jaime. Nothing formal.

16:45:01 From Eliza Jane Palao|Tree Fresno CAC Fellow to Everyone : Thank you Alonso, pages 136 to 173 have information on Trees and plants.

16:45:47 From Kevin Hamilton, RRT (he, him, his) to Everyone : While I think the two can be intertwined Todd, however many of these neighborhoods also have extremely high traffic volumes in their front yards.

16:46:15 From Maricela Velasquez to Everyone : Kevin a Jaime: Solo un simple enlace a traves de google docs de la agenda propuesta publicada en el chat es de lo que estoy hablando Jaime. Nada formal.

16:47:31 From Maricela Velasquez to Everyone : Eliza a todos: Gracias Alonso, páginas 136 a 173 tienen información sobre árboles y plantas.

16:48:31 From Brian Moore-CARB/OCAP to Everyone : About tree characteristics: From an air pollution exposure perspective, the denser and closer together the trees are, the better. Not sure if this ideal tree exists, but a drought resistant, low allergen tree, with dense foliage from the ground up, would be the best!

16:50:11 From Maricela Velasquez to Everyone : Kevin a Todd: Aunque creo que los dos pueden estar entrelazados, sin embargo, muchos de estos vecindarios también tienen volúmenes de tráfico extremadamente altos en sus jardines delanteros.

16:53:04 From Maricela Velasquez to Everyone : Brian (CARB/OCAP) a todos: Acerca de las características de árboles: De la perspectiva de la exposición a la contaminación del aire, cuanto más densos y cercanos estén los árboles, mejor. No estoy seguro de que exista este árbol ideal, pero lo mejor sería un árbol bajo en alérgenos y resistente a la sequía, con un follaje denso desde el suelo.
