

Stockton CSC Meeting Room Guide – April 3, 2024

TABLE #1 – Bike Lanes

Measure Goal: Funding to support construction of bike paths in the Stockton AB 617 community

- **Measure Funding Available:** \$500,000

The District is soliciting feedback on the proposed bike lane project from the City of Stockton. The CSC will have a chance to review the project and ask the District and City of Stockton any questions.

Provide feedback at table: Please add a sticky dot to the poster on the table to indicate if you support this project. Additionally, add a post-it on the map if you have any questions, comments, or concerns about the proposed bike lane locations.

TABLE #2 – Passenger Vehicle Repair and Replace

Measure Goal for Passenger Vehicle Repair: Funding for vehicle emissions related repairs for high polluting vehicles operating in the Stockton AB 617 community

- **Measure Funding Available for Repair:** \$300,000

Measure Goal for Passenger Vehicle Replace: Funding for replacement of personal vehicles with battery electric or plug-in hybrid vehicles

- **Measure Funding Available for Replace:** \$800,000

The District will discuss the launch of these two programs and propose funding reallocation to the passenger vehicle replacement measure to allow more residents participate in the program, based on existing demand in the community.

Provide feedback at table: Please add a sticky dot to the poster to indicate if you support this funding reallocation. If the CSC supports the funding reallocation, the District will work with the CSC to add more funds to this measure.

TABLE #3 – Community Outreach

Measure Goal: Learn about the District's ongoing outreach efforts, including upcoming outreach events and provide feedback on outreach strategies for the successful implementation of CERP measures, including passenger vehicle repair, passenger vehicle replace, and residential lawn and garden.

Provide feedback at table: Below are some prompting questions to provide your thoughts and feedback on

- Are there any specific advertising approaches you would like us to consider incorporating into our outreach strategy for CERP implementation (i.e. residential lawn and garden, passenger vehicle replace or repair, etc.)
- Taking a look at the boundary map, are there specific neighborhoods you'd like us to visit and do outreach at that we should prioritize? Summer Plans!? What Stockton events/activities would you like to see us try to visit this summer?

TABLE #1 – Bike Lanes

City of Stockton Bike Lane Project Summary

Project Name: Stockton Safe Routes to School Safety and Connectivity Improvements Project

Allocated AB 617 Funding: \$500,000

Project Description: Funding for installation of bike lanes near several elementary, middle and high schools to increase safety and active modes of transportation

Opportunity with Bike Path CERP Measure: Leveraging funds to support City of Stockton project, which aims to increase safety and active transportation through construction of bike lanes, missing sidewalk, curb ramps and safety features (installing high visibility crosswalks with flashing beacons) in disadvantaged communities

Project Timeline and Milestones

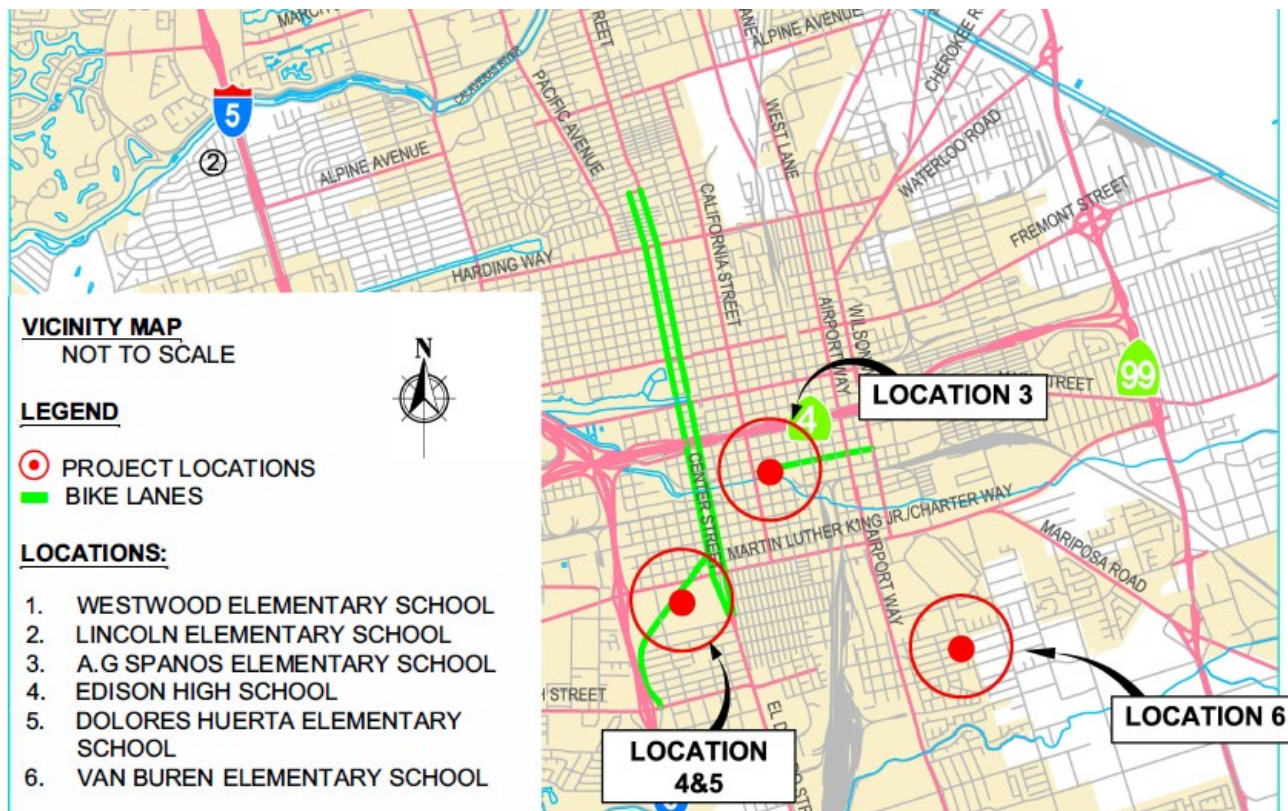

TABLE #2 – Passenger Vehicle Repair and Replace

Opportunity for Funding Reallocation for Passenger Vehicle Replace Measure

Measure Progress:

- During October 2023 CSC meeting, CSC supported increasing the funding available for a new plug-in hybrid or electric option to up to \$20,000 per vehicle with potential to increase funding to measure if needed
- Project Plan approved by CARB, finalizing contract with Valley Clean Air Now (ValleyCAN) and anticipate opening program in coming weeks
- In preparing for opening of program, we already see a demand in Stockton community through Valleywide program

Allocated AB 617 Funding: \$800,000

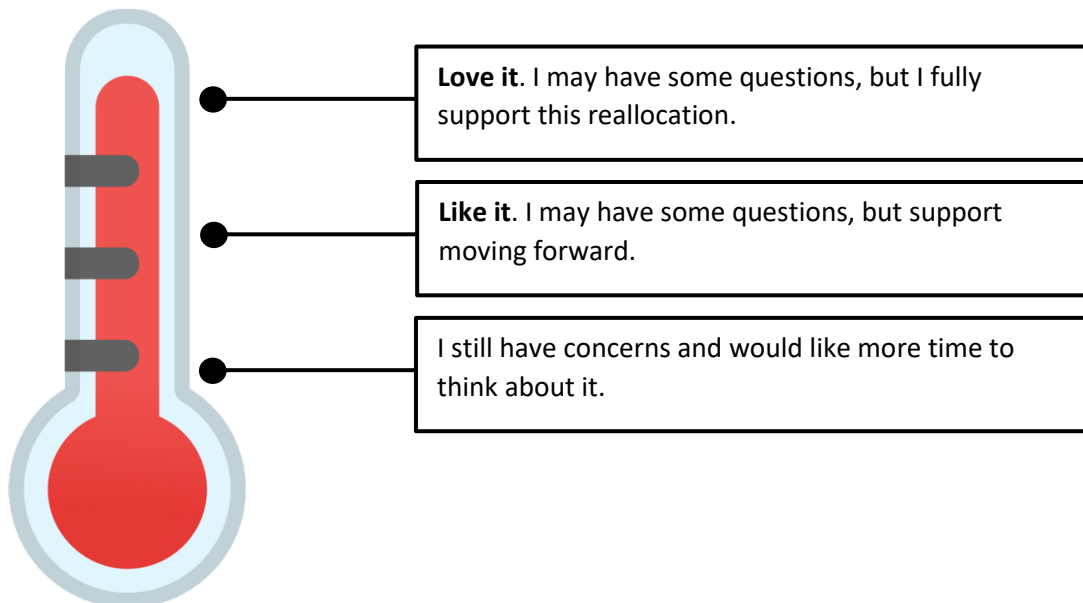

Program Guidelines:

	Vehicle Type	Plug-in Hybrid	Electric
300% Federal Poverty Level and below	NEW: Plug-in hybrid electric or zero-emission vehicle purchase	\$18,000	\$20,000
	USED: Plug-in hybrid electric or zero-emission vehicle purchase	\$11,500	\$12,000

With existing \$800K in funding, between ~40-70 residents can participate in program depending on the type of vehicle they choose. During one ValleyCAN outreach event, they typically will help complete ~50 applications and we are already seeing high interest in the Stockton area to participate in the Passenger Vehicle Replace program.

Opportunity for Funding Reallocation for Passenger Vehicle Replace Measure:

Currently, over \$2M remaining for reallocation in other measures as necessary

Available Throughout Meeting

AIR DISTRICT MOBILE AIR MONITORING VAN

The District uses the air quality monitoring van to get local, accurate data on our Central Valley communities. It has safe and high-tech instruments that measure different types of pollution, including PM2.5, ozone, NO₂, BTEX, SO₂, black carbon, and H₂S. This van responds to community concerns, so you may see it driving through your community or parked in your neighborhood.

The van will be parked outside. Please feel free to visit District air monitoring staff, who will be available to answer questions and share information about the District's mobile monitoring efforts
