Re: Support for Ab 617 Community Selection for year 3

Dear CARB

On behalf of Committee for a Better Arvin-CBA, I am writing to express our strong support for the Arvin/Lamont South Kern Region for year 3 community selection.

The Arvin/Lamont South Kern Region is at the southern end of the San Joaquin Valley at the base of the Tehachapi mountain range, which effectively traps air pollution causing serious local air quality problems. CBA is committed to improving public health and safety by constructing infrastructure improvements that reduce air pollution to help the region meet clean air mandates. CBA is and has been willing to partner with the community to identify opportunities to tackle and find localized solutions to develop and deploy strategies that work to reduce toxic air contaminants, fugitive dust, industrial pollution and many other issues caused by regional and localized sources of pollution.

We write this letter to express our full support for the communities of Arvin/Lamont South Kern Region to be selected for the Third-year implementation of the AB617 Community Air Protection Program. We are not alone in this recommendation. The San Joaquin Valley AB617 Environmental Justice Steering Committee (SJV-AB617-EJ-SC) ranked Arvin-Lamont as the number one area in the Rural category in the nomination document they submitted to the California Air Resources Board (CARB) and the San Joaquin Valley Air Pollution Control District (SJVAPCD). This nomination was the result of a thorough analysis of indicators that included Population Characteristics, Regional and local air pollution; health data as well as the capacity

from community-based organizations that is necessary to successfully engage with residents, the Air District and CARB in the AB617 CAPP process.

There is already vetted and reproducible data suggesting that the South Kern Region is highly affected by the regional air pollution as well as significant factors that contribute to the pollution such as local large scale agricultural practices, concentrated warehouse distribution centers, neighborhood oil and gas development as well as other factors.

CBA is excited for the opportunity to progress our partnerships with the Air District and community to strategize effective reductions in fugitive dust that will improve air quality in our Valley and move toward attainment of state and federal air quality standards.

Sincerely,

Estella Escoto
President,
CBA
