

# Stockton CERP CARB Enforcement Plan

Increase Inspections

Community Training

Truck and Bus Rule

External Agency  
Coordination

Data Management

Report Annually

Update Strategies

# Increase the frequency of compliance inspections with guidance from CSC

## Locations Identified:

- a. Knife River area
- b. Charter Way and Fresno Avenue
- c. South El Dorado Street
- d. Boggs Tract
- e. Idling HDDVs near schools and residential areas

Help us locate additional areas of concern!

# Provide in-person community specific training

## Possible Topics:

- Supplemental Environmental Projects (SEPs)
- How to identify and report an air pollution concern
- Accessing CARB enforcement data

Tell us what kind of enforcement training the community needs!

# Achieve compliance with the Truck and Bus Regulation via SB 1

- Enforcement Division Annual Report was recently approved
- Truck and Bus compliance rate is at 98 percent
- We continue to work with DMV to prevent dirty HDDVs from registering in CA
- Focus shifting to out of state vehicles (PEAQs)

We want to get the last two percent!

# Coordinate with other agencies

## Agencies:

- SJVAPCD
- School District
- City of Stockton and County
- CHP and local police departments
- CalEPA sister agencies
- DMV
- Port of Stockton

How can we work with other agencies?

# Enhance CARB's data management practices

- Enforcement Data Visualization System (EDVS)
- Updating complaint system

What enforcement data does the community need?

# Provide annual report of enforcement activities

- Provide updates on CARB enforcement activities at CSC meetings
- Developing a quarterly one-page summary document

We want to keep you informed!

# Update enforcement strategies as applicable

Some ideas:

- Subcommittees
- Focus on specific mobile regulations (ex. Off-Road)
- What are other communities doing?

What strategy are we missing?
