

On the Front Line: Living the Impacts of Air Pollution Every Day

STACEY PANYASEE-STOCKTON AB 617 CSC RESIDENT

I am ONE of MANY residents

- ▶ New mom to a one yr. old
- ▶ My partner is a mail carrier who serves the zip codes in Stockton AB617 Community with the worst air quality
- ▶ I have family members who suffer from asthma

NOx Emissions

NOx Emissions + PM2.5 Emissions

NOx Emissions + PM2.5 Emissions+ Diesel Particulate Emissions

NOx Emissions + PM2.5 Emissions + Diesel Particulate Emissions + Volatile Organic Compound (VOC) Emissions

- ▶ **South Stockton residents have an avg. life expectancy of approx. 74 yrs**
 - ▶ -4 years vs San Joaquin County (78 yrs)
 - ▶ -7 years vs California (81 yrs)
 - ▶ Source: [U.S. Census Tract](#)
- ▶ **Example:** At my current age (30 yrs), I have approx. 44 more yrs. to live.
- ▶ I joined the Stockton AB 617 Steering Committee for two reasons:
 - ▶ Reason One: **Access to clean air is a human right!**
 - ▶ Reason Two: It is important for the voices of my community and the most vulnerable/marginalized to be heard **especially, when our lives are directly impacted by the decisions we make.**

Challenges, Fears and Concerns

- ▶ How can we work together to prolong the lives of thousands who are negatively impacted by major sources of pollution, including the Port of Stockton and DTE?
- ▶ At what cost will it take for every resident in my community to have access to clean air?
- ▶ When will it be safe for children to play outside without having to think twice about emissions that are harmful to their health?

Let us work together!

- ▶ The decisions we make moving forward will have a direct impact on 132,000 lives. Let's thoroughly review the measures and save lives!
- ▶ <https://www.youtube.com/watch?v=Z-aVMdJ3Aok>

Collectively, we can make a greater positive difference.

THANK YOU!
