00:30:42 R - Stacey Panyasee: Better

00:38:59 R - Mary Elizabeth: Why was the air monitoring down for a few days this last week for the PM and what's up with the ozone monitoring.

00:39:45 AD - Jessica Olsen: Hi Mary! Which site are you referring to being down? I'm going to message our air monitoring team now.

00:41:00 R - Margo Praus: Congrats on the school buses contract!!!

00:46:00 AD - Jessica Olsen: Hi all,

00:47:22 AD - Jessica Olsen: Just heard from our monitoring team that CARB's monitoring staff have reported an HVAC (air conditioning) issue that has caused their site to be down. It looks like PM2.5 is up, but ozone is still down. We will send a note out to the whole CSC.

00:50:17 Brian Moore | CARB: HI all, about the CARB-run monitor at University Park. Looks like real time PM2.5 and Ozone data has not been updating on our website since June 1st. It could be a power issue or a data upload issue. we are checking with the CARB staff that operate that site, and I'll let you know when we get more information.

00:50:33 Brian Moore | CARB: Jessica scooped me at my own job.

00:54:36 AD - Jessica Olsen: reminder, here is a video from Shafter:

00:54:37 R - Mary Elizabeth: Lawn mowers - commercial imagine 6 hours a day = 1800 miles for one mower.

00:55:23 AD - Jessica Olsen: We still have a commercial lawn mower measure, too. This is separate, and we certainty want to pursue both!

00:57:51 R - Mary Elizabeth: I vote yes to reallocate 100.000 for mowers

00:58:00 R - Stacey Panyasee: Second

00:58:04 nate knodt: I wish to expand this program to the 200 Mower Level. I believe that garden equipment is very polluting in the region and very much so locally in neighborhoods.

00:58:08 R- Jazzy & Bobby: Jazzy- Yes ; Bobby- yes

00:59:18 R- Jazzy & Bobby: Jazzy- I'd like to know if about the status of the other measures and the funding for the measures

01:00:12 R- Jazzy & Bobby: Agree!

01:00:19 CSC - Gloria Alonso: Agree with Cynthia's statement

01:00:32 AD - Jessica Olsen: Status of all measures we post monthly:
<https://community.valleyair.org/stockton-tracker/>

01:01:00 AD - Jessica Olsen: we are happy to review this at an upcoming meeting in more detail

01:01:05 R- Jazzy & Bobby: ^ I think a breakdown at the meeting would be helpful as well.

01:01:17 R- Jazzy & Bobby: Reacted to "we are happy to revi..." with 👍

01:01:20 R- Jazzy & Bobby: Reacted to "Status of all measur..." with 👍

01:02:49 AD - Jessica Olsen: Reacted to "^ I think a breakdow..." with 👍

01:03:59 nate knodt: I share the concern regarding current low distribution of mowers, however, I think this is a matter of outreach/marketing. And yes this program is currently challenging for low-income households. i believe that in-person events to streamline and push out this equipment is critical.

01:18:03 AD - Jessica Olsen: Including the CSC! We send press releases to you all, as you've seen :)

01:31:59 R- Jazzy & Bobby: In the application does it make mention of the priority demographics?

01:33:30 AD - Jeannine Tackett: Replying to "In the application d..."

Yes, there is a set of questions that covers the priority populations. However, they are optional to answer in case someone is more private and does not want to share that info, we want to make sure they can still participate.

01:35:03 R- Jazzy & Bobby: Replying to "In the application d..."

Great! & Does it make mention that those questions are give priority?

01:35:40 R- Jazzy & Bobby: Replying to "In the application d..."

Trying to remember from the preview a couple months back

01:36:48 R - Mary Elizabeth: Thanks Everett:)

01:37:28 AD - Jeannine Tackett: Replying to "In the application d..."

No, we are tracking the application data as it comes in to ensure that if there is a big demand we move the priority population questions forward first. The application is the same for all participants in the program so we are handling community specific requests on the backside.

01:37:39 R - Mary Elizabeth: What about well sealed rooms? What about the weatherization?

01:39:19 AD - Jessica Olsen: Thanks you Dr. Ferrell! We hear you and will look to do a better job helping make the materials more accessible. There needs to be a balance in the amount of information we sent
