South Central Fresno AB 617 Community

San Joaquin Valley Air Pollution Control District

Enforcement Plan

List of Permitted Facilities

The Valley Air District has some of the most stringent regulations in the country for limiting emissions from businesses and other stationary sources of air contaminants. There are numerous types of equipment as well as industrial and commercial processes that require a Permit to Operate with the District. The following is a current listing of all facilities located within the South Central Fresno Community which have active Permits to Operate with the District as of June 2024. A previous listing was provided in [Appendix F](#) of the South Central Fresno Community Emissions Reduction Program (CERP) and in the [2023 Annual Report](#).

Enforcement Plan Facility Inspections

Facilities that have permits with the Valley Air District are inspected on a regular basis by District Compliance staff to ensure all permit requirements are being followed. New and modified equipment is also inspected before commencing operation. District inspection staff also observes stack emission testing (known as source testing) for certain types of equipment to ensure that proper testing procedures and protocols are followed by the third-party testing company. They also conduct inspections when unforeseen equipment breakdowns occur which may affect a facility's ability to comply with all permit requirements.

In addition to the numerous inspections already conducted by the District each year at permitted facilities throughout the valley, the District committed in the South Central Fresno CERP to increase the frequency of periodic compliance inspections to once every six months at facilities that have had an emissions related violation within the last three years. The following is a listing of all District inspection activities at permitted facilities within the South Central Fresno Community from July 2023 through June 2024. A previous listing of inspections can be found in [Appendix F](#) of the South Central Fresno CERP and in the [2023 Annual Report](#).

Enforcement Plan Summary of Complaints

District inspectors respond to approximately 3,000 public air pollution complaints District-wide each year. Some complaints are related to permitted facilities, however a majority of complaints received by the District are for other sources of pollution such as illegal open burning, fireplace burning, dust generating activities, and miscellaneous odors. The District responds to all public complaints received, and makes every effort to respond as quickly as possible. Most complaints are investigated the same day they are reported. The following is a summary of all public air pollution complaints received and responded to within the South Central Fresno Community from July 2023 through June 2024. A previous report of complaints can be found in [Appendix F](#) of the South Central Fresno CERP and in the [2023 Annual Report](#).

Enforcement Plan

Summary of Violations Found

The District implements a robust enforcement program that includes regular inspections of facilities with District permits as well as other potential sources of air contaminants. In the South Central Fresno CERP, the District committed to further enhancing its enforcement efforts in a few areas of concern to the community. Over the last five years, District compliance staff have completed numerous hours of additional surveillance in the South Central Fresno Community for open burning violations, fireplace violations, and idling diesel truck violations, in addition to conducting more frequent inspections at facilities with recent emissions violations and dust generating sites.

When a violation of a District rule or other air pollution regulation is discovered during an inspection, complaint investigation, or through surveillance activities, the violation is documented through the issuance of a formal notice to the owner or operator, and depending on the nature of the violation, may be subject to substantial monetary penalties. The following is a summary of all violation notices issued from July 2023 to June 2024 for violations of District Rules or other State air pollution control regulations within the South Central Fresno Community. These include violations at permitted facilities as well as other non-permitted facilities and private residences. A previous list of violations can be found in [Appendix F](#) of the South Central Fresno CERP and in the [2023 Annual Report](#).
