00:40:23 R - Nate Knodt - Stockton: To date, only short haul local delivery and sanitation trucks can economically operate. Also where house delivery has been implemented. Lack of well spaced truck charging infrastructure and having to stop for 30 minutes every 250-300 miles to charge makes long haul trucking to slow for competitive long haul freight service.

00:41:31 R - Nate Knodt - Stockton: Converting switch locomotives to electric charging operation can bring a big bang for the buck in reduced emissions and reduction in GHG.

01:22:58 R - Nate Knodt - Stockton: Central California Traction Co. is on Cherokee and is the Historic RR Yard dating to 1905. Official Railroad of the Port of Stockton and operates to Lodi. But citizens are totally unaware of the railroad or its name. The other railroad in the area is the Stockton Terminal & Eastern RR (STR) - still operating around E Fremont & Wilson Way South to BNSF, downtown to UP, and East of Hwy 99 to Food Processing Plants. Tracks are still in place to Linden, but in tax "Embargo" status, not taxed for right-of-way at this time. Small RR yard East of Franklin HS.
