

Community-Identified Project Approval Notice

Charge Up Program

Air District: San Joaquin Valley Air Pollution Control District (District)

Community: Stockton

Community Emissions Reduction Program Measure:

TP.3: Installation of EV Charging Infrastructure

Project Plan Identifier: 2021-09CIP-SJV-1

Project Type: Infrastructure

Project Plan Completion Date: January 07, 2022

CARB Action (Date): Approved; January 19, 2022

Project Description: This measure will provide incentive funding for approved Level 2 and Level 3 EV chargers. Grants may be awarded to private entities including non-profit organizations, businesses, or public agencies in disadvantaged and low-income communities as well as property owners of multi-unit dwelling, apartment complexes, and condominiums. The grant amounts vary based on charger type and eligible costs include the purchase of the charger, eligible installation costs and necessary signage.

Project Benefits: This strategy will provide for the installment of 15 EV chargers in the Stockton community to increase accessibility of chargers in order to support the emission reductions associated with EV deployment.
