00:25:32 Jazmarie LaTour, LMR: hello! Thank you Elaine

00:26:42 Dr. Catherine Garoupa White, they/she, CVAQ: Intros = name, pronouns, organization (if any) and 2 questions: Why are you engaged in the indoor air subcommittee? What do you bring/contribute to the group?

00:27:26 Jazmarie LaTour, LMR: thank you Catherine

00:31:12 Jonathan Pruitt- Catholic Charities: Hello! My mic hasn't been able to work since this morning. But I'll answer through here:

1) Jonathan Pruitt, he/him/his, I'm here because interested in indoor air quality and wanting to bring the attention to it.

2) I hope to bring my organization, Catholic Charities, to streamline the information that comes from this subcommittee as well the Boggs Tract Community where I've been able to build a relationship with. I also just started my Masters in Public Health at Johns Hopkins University and want to try to bring technical tools from them to this subcommittee. Thank you!

00:36:02 Elaine Barut Labson - She/Hers: ^Nice! Congratulations!

00:42:35 Elaine Barut Labson - She/Hers: Also Nice Cynthia! Congrats to you too!

00:48:00 AD-Jessica Olsen (she/her): The equipment selected includes the Blueair Blue Pure 311 Auto portable residential air purifier (including three additional disposable filters to provide at least two years of continuous operation at no cost to program participants), and the IQAir AirVisual Pro indoor air monitoring device. All new equipment is anticipated to be delivered directly to participants via U.S. mail to minimize the spread of COVID-19 and accelerate the timeframe in which participants receive their new equipment. PAIR Program participants may also receive a one-time monetary stipend for the partial reimbursement of expected electricity costs associated with the new equipment operation.

00:48:08 AD-Jessica Olsen (she/her): The APCD also completed a competitive bid process for a contractor to administer the PAIR Program on behalf of APCD and has selected a local organization familiar with the Portside community for this contract. Duties assigned to this organization will include but are not limited to outreach and customer service, selection of participants, translation, case management, and technical support. Air quality data collection and monitoring will be conducted remotely by APCD for each device connected to the internet, through a one-year APCD subscription to the IQAir AirVisual Enterprise Dashboard. Analysis of the data collected, including a comparison of data collected by APCD regional air quality monitors, will be conducted either by the APCD, California Air Resources Board, or another outside entity following the one-year subscription period.
