

Community-Identified Project Approval Notice

**Clean Green Yard Machine Residential Lawn and Garden Emissions
Reduction Program Plan**

Air District: San Joaquin Valley Air Pollution Control District (District)

Community: Stockton

Community Emissions Reduction Program Measure:

LG.1: Incentive Program for the Replacement of Residential Lawn and Garden Equipment

Project Plan Identifier: 2020-03CIP-2SJV

Project Type: Equipment Replacement and Rebate

Project Plan Completion Date: September 28, 2022

CARB Action (Date): Approved; October 20, 2022

Project Description: This project plan will reduce NO_x and PM_{2.5} emissions from residential lawn and garden equipment by increasing outreach and access to incentive funding while providing rebates up to 100 percent of the cost of new electric mower when replacing an existing combustion model. Residents purchasing a new piece of equipment without existing equipment will be eligible for up to \$50.

Project Benefits: The goal of this measure is to reduce NO_x and PM_{2.5} emissions by replacing up to 50 gas-or diesel-powered lawn mowers in the Stockton community. Emission benefits for replacements shall be quantified consistent with the methodology used for the Community Air Protection program lawn and garden category. New purchase rebate encourages the purchase of electric lawn care equipment in Stockton community.
