List of Permitted Facilities

The Valley Air District has some of the most stringent regulations in the country for limiting emissions from businesses and other stationary sources of air contaminants. There are numerous types of equipment as well as industrial and commercial processes that require a Permit to Operate with the District. The following is a current listing of all facilities located within the Shafter Community or 7-mile radius which have active Permits to Operate with the District as of July 2024. A previous listing was provided in [Appendix F](#) of the Shafter Community Emissions Reduction Program (CERP) and in the 2024 annual report.

Facility Inspections

Facilities that have permits with the Valley Air District are inspected on a regular basis by District Compliance staff to ensure all permit requirements are being followed. New and modified equipment is also inspected prior to permit issuance. District inspection staff also observes stack emission testing (known as source testing) for certain types of equipment to ensure that proper testing procedures and protocols are followed by the third-party testing company. They also conduct inspections when unforeseen equipment breakdowns occur which may affect a facility's ability to comply with all permit requirements.

In addition to the numerous inspections already conducted by the District each year at permitted facilities throughout the valley, the District committed in the Shafter CERP to increase the frequency of periodic compliance inspections to once every six months at facilities that have had an emissions related violation within the last three years. The following is a listing of all District inspection activities at permitted facilities within the Shafter Community from July 2024 through June 2025. A previous listing of inspections can be found in [Appendix F](#) of the Shafter CERP and in the 2024 annual report.

Summary of Complaints

District inspectors respond to approximately 3,000 public air pollution complaints District-wide each year. Some complaints are related to permitted facilities, however a majority of complaints received by the District are for other sources of pollution such as illegal open burning, fireplace burning, dust generating activities, and miscellaneous odors. The District responds to all public complaints received, and makes every effort to respond as quickly as possible. Most complaints are investigated the same day they are reported. The following is a summary of all public air pollution complaints received and responded to within the Shafter Community from July 2024 through June 2025. A previous report of complaints can be found in [Appendix F](#) of the Shafter CERP and in the 2024 annual report.

Date/Time Received	Owner/Operator/Responsible party	Property Address	Complaint Type	Complaint Description	Resolution	Resolution Description
8/6/24 4:40 PM		4434 Bowles St	Open Burn	People burning trash and other material	Not Confirmed	Staff surveyed at the address provided and the neighboring properties, but did not find evidence of an open burn. An advisory letter was sent to the residents in the area of the complaint location.
9/5/24 4:45 PM	Lennar Homes	Gossamer Grove Blvd and Soaring Heights Way (northwest section)	Fugitive Dust	Large amount dust comes from Lennar Homes housing development. Occurs 8:00 am - 3:00 pm daily.	Not Confirmed	Staff conducted a Regulation VIII inspection of the site, however they did not confirm any visible dust emissions during the investigation.
9/13/24 4:08 PM		4410 Bowles Street	Open Burn	Smells like trash and plastic being burned at this location.	Not Confirmed	Staff surveyed at the address provided, but did not confirm evidence of an open burn.
9/19/24 7:15 AM	John Balfanz	Mill Creek Housing Development	Fugitive Dust	There's construction going on across the street from our apartment six days a week and all day from 6am to 7pm there's large amounts of dust blowing. They are not wetting anything down to control it. My car and everything is covered in dust. My husband and I have lung issues and it's affecting us greatly. His doctor told him yesterday that he was wheezy and sound like he was having an asthma attack. My whole family has allergies and this is has made them so bad that medicine doesn't work. Yesterday they had trucks with asphalt that were so loud it vibrated our apartment and we thought it was an earthquake. The odors from the asphalt is awful when we have to walk our dogs and same with the dust. There's so much dust we have had mud accumulated in the street gutters. With the issues with valley fever in this county all this dust poses a risk for that also.	NOV Issued	Staff investigated and found that non-compliant levels of trackout were confirmed, resulting in two violations issued under District Rule 8041 (NOV# 5033608). Staff determined that fugitive dust, lack of watering, and loud vibrating trucks were not confirmed during the inspection, with the latter being outside the District's jurisdiction.
9/20/24 3:08 PM	John Balfanz	Mill Creek Housing Development	Fugitive Dust	There is still a bunch of dust everywhere. The dirt they wet after the first complaint and being talked to by the investigator is no longer wet and there's fresh tire tracks so they are still driving over. My husband was walking the dogs and got blasted with the dust by a work truck he's wheezy now and had to use his inhaler and take medicine. I have included pictures of what street looked like last night and I have more of all the dry dirt everywhere today.	NOV Issued	Staff investigated and found that trackout was again observed and a Notice of Violation 5033608 was issued; the trackout was cleaned the following day.
10/8/24 7:39 AM	John Balfanz Homes	Mill Creek Housing Development	Fugitive Dust	A lot of dust due to construction and due to leaf blower. Throwing dirt on their property.	Not Confirmed	Staff investigated and found that blower devices were not being used to clean trackout, nor was dirt being dumped onto public property during cleanup. Staff determined that no violations were identified, and no enforcement action was issued.
1/27/25 4:26 PM	Shafter Wasco Gin	Poplar & Fresno Ave	Ag Burn	Ag Burn	No Violation	Staff investigated and found that the burn was approved by the District and no violations of permit conditions were observed.
2/7/25 12:22 AM	BLOEMHOF FARMS AND HARVESTING	28709 Fresno Ave	Ag Burn	This was an ag burn pile that was left burning at night unattended.	No Violation	Staff investigated and found that the burn was approved by the District and no violations of permit conditions were observed.
2/19/25 10:50 AM		30778 Burbank Street	Open Burn	These people burn at night all the time. They run an unofficial nursery business northwest of Beech Avenue along Burbank, about two blocks down.	NOV Issued	Staff investigated and found that open burning of yard waste was occurring at the complaint location. A Notice of Violation (NOV 5034799) was issued.
3/3/25 9:20 AM		30711 Rodriguez St.	Open Burn	Resident at this location had an open burn last night on their property. The pile that was burning consisted of wood and other trash. This morning the pile of ashes and debris is still visible on the lot. This occurred yesterday, 3/2/2025 at approximately 2:10 PM.	Not Confirmed	Staff investigated and found that no active burn, ashes, or piles of yard waste were present at the site. The complaint could not be confirmed, and a Burn Advisory letter was sent to the address associated with the alleged burn.
4/22/25 8:46 AM		Burbank St and Mannel Ave	Other	Street sweeper not using water	Not Confirmed	Staff investigated and found that the street sweeper could not be located after driving through Burbank St., Mannel Ave., and surrounding streets. The complaint was not confirmed.
6/24/25 5:14 PM		35.5300, -119.3063	Fugitive Dust	3-4 tractors working on high speed rail and dumping mounds of dirt, zero visibility. (near the overpass crossing over central valley hwy)	Not Confirmed	Staff investigated and no dust was observed during the field visit, therefore the complaint could not be confirmed. Staff determined that because the project area was under one acre, no construction notification or dust control plan was required; however, the project supervisor was informed of the 20% opacity and trackout requirements under District Rules 8031 and 8041.

Enforcement Plan

Summary of Violations Found

The District implements a robust enforcement program that includes regular inspections of facilities with District permits as well as other potential sources of air contaminants. In the Shafter CERP, the District committed to further enhancing its enforcement efforts in the areas of concern to the community. From July 1, 2024 through June 30, 2025, District compliance staff have completed numerous hours of additional surveillance in the Shafter Community for open burning violations, fireplace violations, and idling diesel truck violations, in addition to conducting more frequent inspections at facilities with recent emissions violations.

When a violation of a District rule or other air pollution regulation is discovered during an inspection, complaint investigation, or through surveillance activities, the violation is documented through the issuance of a formal notice to the owner or operator, and depending on the nature of the violation, may be subject to substantial monetary penalties. The following is a summary of all violation notices issued from July 2024 to June 2025 for violations of District Rules or other State air pollution control regulations within the Shafter Community. These include violations at permitted facilities as well as other non-permitted facilities and private residences. A previous list of violations can be found in [Appendix F](#) of the Shafter CERP and in the 2024 annual report.
