Protect Public Health: Residential Wood Smoke Reduction Program Begins November 1

Valley residents urged to help improve air quality by avoiding wood burning this winter

To protect public health and improve winter air quality, the Valley Air District urges residents to avoid wood burning and use cleaner heating alternatives whenever possible. Residential wood burning produces harmful fine particulate pollution (PM2.5) that significantly affects neighborhood air quality and the health of Valley communities.

"Public health is at the heart of our mission," said Jaime Holt, the District's Chief Communications Officer. "Every resident can make a real difference this winter by simply choosing not to burn wood. Limiting the use of fireplaces, woodstoves, and outdoor fire pits is one of the most effective ways to improve neighborhood air quality and protect community health."

- News releases are issued before known and expected high pollution days
- Keep health departments and schools notified
- District posts updates to social media sites like Facebook, X, and Nextdoor

3d · 🌐

We are in the midst of a classic Valley "tight-lid" winter weather pattern, which can cause pollution to build up quickly. Please avoid wood burning, as it adds to PM2.5 pollution levels. If you're headed outdoors, check local air quality at [AirNow.gov](https://airnow.gov) or myRAAN.com.

How to File an Air Pollution Complaint

Complaints may be filed online, by phone, or by using the Valley Air app on your smart phone

- Complaints are responded to 365 days a year
- Your information is confidential
- Filing a complaint will put you in touch with an Air Quality Inspector assigned to the complaint

San Joaquin, Stanislaus, Merced
