

Community Emissions Reduction Program South Central Fresno 2022 Annual Report

November 2, 2022

COMMUNITY AIR PROTECTION PROGRAM IMPLEMENTATION IN THE VALLEY

The communities of Shafter, South Central Fresno, Stockton and Arvin/Lamont have been prioritized by the San Joaquin Valley Air Pollution Control District (District) and subsequently selected by the California Air Resources Board (CARB) as communities in the San Joaquin Valley to receive clean air resources available under AB 617. AB 617 provides mechanisms and resources to implement community-specific air quality monitoring networks; to develop, implement, and track emission reduction programs; to improve availability of data and other technical information; and to invest substantial funding in the community through voluntary incentive funding measures. Importantly, these measures are guided by advice and knowledge of local community members, through their input and involvement on Community Steering Committees (CSCs) for each AB 617-selected community.

The District continues to collaborate with each of the CSCs, made up of residents, and representatives from local non-profits, businesses, and agencies, to prioritize and implement the measures included in the District Governing Board-adopted, CARB-approved Community Emission Reduction Programs (CERPs). These efforts include engaging with Valley residents, businesses, agencies, and other stakeholders to identify and implement clean air measures and investments in the selected communities. Since adoption of the CERPs, the District has been working closely with the CSCs and local partners to implement CERP measures designed to reduce air pollution and exposure in the communities. In addition to the CERP implementation work, the District has worked diligently to implement the Community Air Monitoring Plans in consultation with the CSCs, with extensive air monitoring now being deployed and conducted in each of the communities.

Implementation Progress in South Central Fresno

The community of South Central Fresno, selected by CARB in 2018 for AB 617 implementation, is a densely populated community within the City and County of Fresno. The community includes residential neighborhoods, rural communities, unincorporated county pockets, and industrial zones, all situated between three busy freeways in a heavily-trafficked center of the Valley. The South Central Fresno CSC has been meeting for nearly four years to help identify community-supported solutions to reduce air pollution and protect the underserved population within this diverse community.

The South Central Fresno Community Emission Reduction Program (CERP) and Community Air Monitoring Plan (CAMP) were developed by the CSC, District, and CARB, with the support of local agency partners within the South Central Fresno community. Since CERP adoption by the District Governing Board in September 2019, and CARB

approval in February 2020, the District has continued to meet with the South Central Fresno CSC to prioritize and implement the community-developed clean air measures and solicit feedback on how to continue enhancing the CERP.

This report summarizes the progress of CERP implementation in South Central Fresno from September 1, 2021 to August 31, 2022.

SOUTH CENTRAL FRESNO COMMUNITY STEERING COMMITTEE ENGAGEMENT

To ensure successful implementation of AB 617, the District has ensured that the residents, businesses, non-profits, agencies, and other stakeholders within South Central Fresno community continue to participate in inclusive and balanced public CSC meetings by providing:

- Monthly evening meetings via Zoom, with technical assistance provided to residents and stakeholders upon request
- Continued real-time interpretation services through two Spanish interpreters at each meeting
- Meeting materials posted ahead of meeting, and send in hardcopy for Spanish-only speakers to facilitate more productive virtual meeting environments
- Monthly agenda-setting meetings with District, stakeholders, community co-hosts, CARB, and a third-party facilitator to collectively set expectations and plan for upcoming CSC meetings
- Expert presentations from partner agencies such as CARB, Caltrans, City of Fresno, Fresno Council of Governments (COG), Tree Fresno, and Office of Environmental Health Hazard Assessment (OEHHA)
- A comprehensive and dedicated bilingual webpage with tools to view real-time air quality monitoring data and maps of emissions
- Neutral meeting facilitation by a community-recommended facilitation team to ensure meetings are inclusive and neutral by bringing out different points of view and preventing individuals from monopolizing discussions
- Weekly phone calls and text exchanges with our Spanish speaking CSC members to ensure they are engaged in the process

Ensuring effective steering committees as described above requires substantial investment of staffing and other resources to schedule, organize, and facilitate frequent after-hours public meetings with extensive related investigation and communications. The District has also continued to conduct public workshops throughout the Valley as needed to solicit additional community input while using outreach and media events as opportunities to discuss AB617 and promote the various grant programs available. Additionally, District staff provides updates and seeks feedback from the Citizens Advisory Committee (CAC) and Environmental Justice Advisory Group (EJAG) as the implementation of AB 617 in the Valley continues to develop.

Involving the public in the CERP implementation process continues to be a priority of the CSC and the District. All CSC meetings are promoted on social media and live streamed on YouTube Live with the meeting videos archived on the South Central Fresno webpage: <https://community.valleyair.org/selected-communities/south-central-fresno>

Community Participation and Ongoing Resident Stipend Program

CSCs meet regularly, requiring ongoing participation and a significant time commitment from community residents, business owners, and other stakeholders. In most cases, steering committee meetings occur in the evenings and may draw attendees away from their families and other obligations. Community-resident steering committee members are not paid and do not have expenses reimbursed to participate in the process or attend these meetings.

On August 20, 2020, the District’s Governing Board responded to the community needs and approved District staff’s recommendation to provide stipends to eligible resident steering committee members, effective retroactively for participation beginning on January 1, 2020. Since last year, resident members of the CSC, who do not receive other compensation for their attendance at such meetings, may request a stipend to offset the cost of participating in each regular CSC meeting. Eligible residents may receive a \$75 stipend per CSC meeting when their attendance is verified on the meeting roll-call list or sign-in sheet and were present for at least 75% of the scheduled meeting (equivalent to missing up to 30 minutes of a scheduled 2 hour meeting). Residents will receive stipends for attending up to fifteen (15) CSC meetings in a calendar year, for a total cost of up to \$1,125 per year. The stipends for resident steering committee members would be subject to the availability of state AB 617 funding and approved allocation in the District’s Budget on an annual basis.

CERP IMPLEMENTATION OVERVIEW

Since the last annual reporting period, the District has continued to work with the South Central Fresno CSC members, members of the public, businesses, local, state, and federal agencies, and other stakeholders to implement the considerable number of air quality improvement measures included in the South Central Fresno CERP. Based on a 2021 prioritization exercise with the CSC, the District has focused efforts on implementing the top-ranked South Central Fresno CERP Measures, as described below. For a list of all CERP measures, including a status of implementation, see Appendix A.

Status of CSC Top-Priority CERP Measures in South Central Fresno

Measure Number	Rank in Category	Measure Description	Status as of 7/31/2022
Community Measures			
SC.1	1	Incentives for School Air Filtration	<p>In Progress Allocated Funding: \$1.5M</p> <ul style="list-style-type: none"> District and CSC met with Fresno Unified School District staff and Trustees on July 20 and 21, 2022 to discuss next steps Fresno Unified School District in final stages of classroom evaluation to purchase stand-alone air purifiers for schools within boundary Expected school filtration installation: Q1 2023
VB.1	2	Incentives for Vegetative Barriers	<p>In Progress Allocated Funding: \$1M</p> <ul style="list-style-type: none"> Subcommittee recommended, and CSC approved, release of final Request for Proposals (RFP) with community feedback included RFP open June 20, 2022 – September 30, 2022 @ 5pm Expected award of CSC-recommended contractor: Q4 2022

2022 South Central Fresno Community Emissions Reduction Program Annual Report

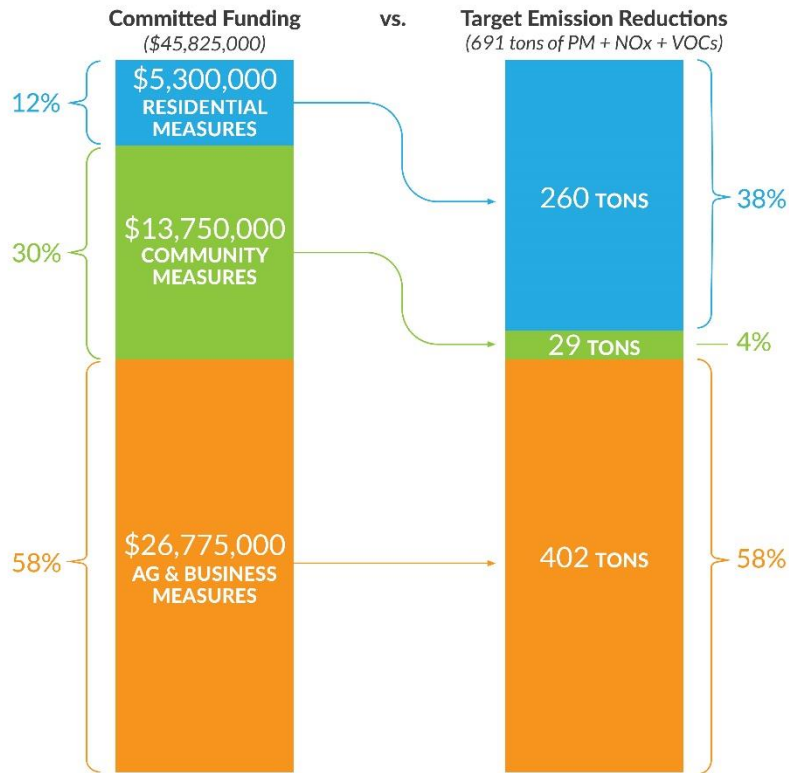

Measure Number	Rank in Category	Measure Description	Status as of 7/31/2022
UG.1	3	Incentives for Urban Greening	<p>In Progress Allocated Funding: \$1M</p> <ul style="list-style-type: none"> • CSC recommended, and District Governing Board approved, adding \$1M to measure, which previously had no funding allocated, shifting funds from other CERP measures • Subcommittee recommended, and CSC approved, release of final Request for Proposals (RFP) with community feedback included • RFP open June 20, 2022 – September 30, 2022 @ 5pm • Expected award of CSC-recommended contractor: Q4 2022
Heavy Duty Measures			
HD.11	1	Truck Reroute Study	<p>In Progress Allocated Funding: \$500K</p> <ul style="list-style-type: none"> • Subcommittee recommended, and CSC approved, City of Fresno to enter into agreement with community-selected contractor and UC Merced health research partner • City of Fresno approved contract during April 2022 City Council meeting • Kickoff Meeting with contractor scheduled August 2022 • Expected completion of truck reroute study: Q4 2023
HD.1	2	Incentives for Truck Replacement	<p>In Progress Allocated Funding: \$7.5M</p> <ul style="list-style-type: none"> • Updated CARB Moyer guidelines were adopted for District program April 2022 • District working with CSC to identify small fleet owner/operators to prioritize outreach and funding availability
HD.7	3	Incentives for Electric School Buses	<p>In Progress Allocated Funding: \$6.4M</p> <ul style="list-style-type: none"> • CSC voted at June 2022 CSC meeting to support using funding to install school bus charging infrastructure • District and CSC met with Fresno Unified School District staff and Board Trustees on July 20, 2022 to discuss next steps • Expected school bus purchase: Q1 2023
Land Use Measures			
LU.1	1	Support Project to Reduce VMT	<p>In Progress</p> <ul style="list-style-type: none"> • CSC formed land use Subcommittee in August 2021 • District coordinating with the City regarding land use actions in the Community and will continue to provide updates to CSC at subcommittee and CSC meetings

Measure Number	Rank in Category	Measure Description	Status as of 7/31/2022
LU.5 ¹	2	District to Seek MOU or other Administrative Mechanism with City of Fresno	<p>Ongoing Discussions</p> <ul style="list-style-type: none"> • Subcommittee, District, and CSC met over several meetings since 2021 to reach agreement on administrative mechanism language • Among many suggested changes to the City’s proposed language, land use subcommittee members expressed during the June 2022 subcommittee meeting they were not supportive of any alternative to an official MOU, such as a letter • City affirmed commitment to continue collaborating with District and updating CSC on projects within AB 617 boundary
LU.4	3	Land Use Community Participation	<p>In Progress</p> <ul style="list-style-type: none"> • CSC formed land use Subcommittee in August 2021 • District coordinating with the City regarding land use actions in the Community and will continue to provide updates to CSC at subcommittee and CSC meetings

EMISSIONS REDUCTION TARGET AND METRICS FOR TRACKING PROGRESS

The District and CSC included a robust set of metrics to track progress in the South Central Fresno CERP. To the maximum extent possible, the District has looked to tie emissions reductions targets to individual CERP measures. Of the 47 measures in the adopted CERP, 17 are incentive measures where the District and CSC worked to identify the number of units targeted for replacement, by year, throughout implementation of the CERP. The remaining measures, whether incentive-based, enforcement, outreach, mitigation, or a land use partnership, have metrics that outline the expected emissions reductions, number of planned inspection hours, scheduled meetings, or other interactions expected for the implementation of the each measure. The District continues to reassess and evaluate these metrics with the CSC as CERP implementation meetings continue. As CARB approves the District’s project plans and incentive-based measure spending increases, the District will keep the CSC apprised at subscription rates for the various measures and will solicit feedback on whether funding amounts need adjusting.

¹ Added in CARB’s amended board resolution when CERP was adopted February 2020, not originally in District-adopted CERP

The CSC has made it clear that having the ability to track and measure implementation progress in English and Spanish is very important. Towards that end, the District developed a measure tracker that is updated on a monthly basis in both English and Spanish on the top of the South Central Fresno AB 617 Community Webpage under the heading “Track South Central Fresno Progress”. District staff have taken the opportunity to share the tracker with the community on multiple occasions and have taken and incorporated feedback from CSC members.

South Central Fresno CERP Measures Tracker:

English: <http://community.valleyair.org/fresno-tracker/>
 Spanish: <http://community.valleyair.org/fresno-tracker-sp/>

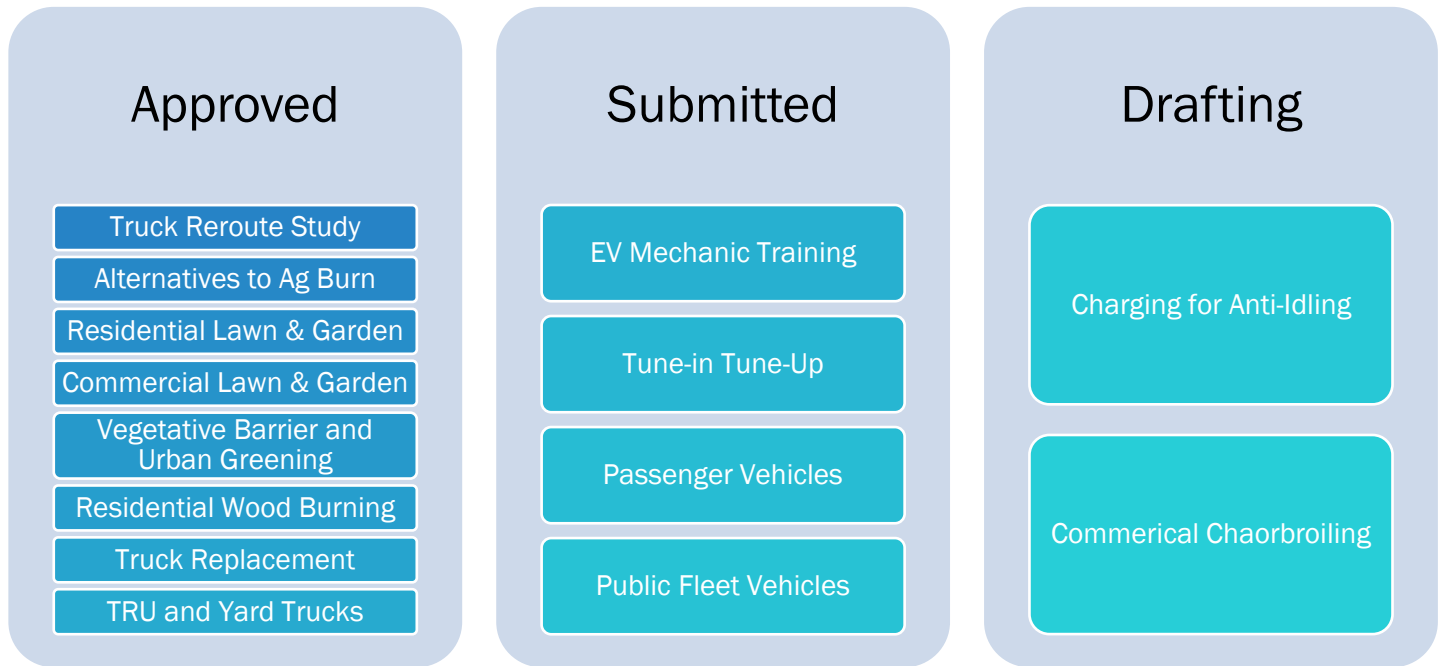

INCENTIVES MEASURES

The approved CERP includes numerous incentive-based measures identified and prioritized by the CSC. The District had been working closely with the CSC on prioritizing and implementing these measures as feasible throughout the community. These measures include a variety of projects and programs that are already approved for funding through CARB’s Community Air Protection (CAP) Guidelines, including electric school bus replacement, school filtration, truck and off-road equipment replacement and alternative fuel infrastructure. The CERP also includes numerous measures that fall outside of the pre-approved program categories included in the CAP Guidelines, including lawn and garden equipment replacement, residential wood burning fireplace change out, and residential vehicle replacement.

The CAP Guidelines include a process to develop project plans for these new and innovative CERP incentive measures for funding utilizing available funding.

Project Plans

For all incentive-based measures that require project plans under the CAP guidelines, the District has been working to draft and submit plans to CARB for review and approval. As project plans are pending and approved, the District has worked with the CSC to solicit outreach and implementation feedback for each measures. The figure below describes the status of the various CARB-required project plans as of September 15, 2021. For an updated list and to view project plans and CARB approval letters, visit the link below:

The CSC is notified, via email and during CSC meetings, as new project plans are developed and submitted to CARB for approval to be able to provide input and feedback on any requested changes, including possible changes to the recommending funding amounts. These project plans are posted on the District’s Community webpage to encourage CSC comments and feedback during the process, allowing CSC members to suggest changes to incentive measure funding amounts.

The District’s Fresno-specific AB 617 incentives website has a list of approved projects, submitted project plans, and guidelines for applying to the various programs: <http://community.valleyair.org/selected-communities/south-central-fresno/grants-and-incentives/>

Lawn Mower Exchange Event

AB 617 RESIDENTS GET NEW ELECTRIC LAWN MOWERS

Almost 250 residents in Shafter and South Central Fresno turned in their old polluting mower and received a new Stihl cordless electric mower at AB 617 Lawnmower Trade-In events this past year. To participate, the residents had to live within the Shafter or South Central Fresno AB 617 boundary and bring in an old gas-powered lawnmower to crush. The event was part of the Valley Air District’s AB 617 efforts to reduce emissions in each community.

Gas-powered yard care equipment presents a significant source of localized air pollution in Valley neighborhoods. These small engines contain no emission controls and pollute substantially more than newer passenger vehicles. Statistically, one gas lawnmower produces the equivalent in emissions of 12 late model cars operating for the same time. This is just one example of the great work being done in partnership with the community under AB 617. This event provided clean-air equipment directly to Valley residents which will help reduce emissions and improve air quality in neighborhoods throughout South Central Fresno and Shafter.

Community Input on Incentives Program Implementation

For all incentive-based measures, the District has closely monitored program demand and kept the CSC members apprised. In some cases, we have found measures that are no longer feasible as originally aspired to in CERP development.

Throughout 2022, the District has worked closely with CARB and the CSC to assess interest and support for reallocating funding, as described below.

CERP Measure	Status	Original Funding	Updated Funding
Locomotive Replacement	Few interested project partners, moved some funding to other measures	\$5M	\$2.8M
Residential Air Filtration	CSC interested in supporting new measure for residents	Not in CERP	\$1M
Urban Greening	CSC interested in funding the previously unfunded measure to increase interest in program	\$0	\$1M
Fireplace Replacement	CSC interested in increasing incentive to cover total cost of replacement (from \$3K to \$4K)	\$1.5M	\$2M

The District will continue to work closely with the CSC throughout this process to prioritize funding in areas and programs of specific interest to the CSC and incorporate new program ideas based on CSC member feedback and as feasible.

The status of all CERP incentives measures to date are described in appendix A.

OUTREACH AND MITIGATION MEASURES

The District's Outreach and Communications team conducts multilingual air quality outreach throughout all eight counties of the San Joaquin Valley. The District coordinates events, delivers presentations, responds to the media 24/7, manages social networks, pilots outreach campaigns like the Healthy Air Living (HAL) Schools and Check Before You Burn (CBYB) programs, and connects with the public in multiple languages across any medium.

The Community Air Quality Outreach Strategy adopted as a part of the South Central Fresno CERP was developed with the CSC to respond to the community-specific concerns and go beyond current outreach efforts. From community town hall events and workshops to billboards and in-store signage, the District and CSC outlined plans to deliver air quality education and clean air funding to the South Central Fresno AB 617 community. This includes using traditional media like radio, TV, billboards and print; digital media like Search Engine Marketing (SEM); and social media both through paid campaigns and organic posting to engage the community.

Working with the CSC over the past year, the District shared information in English and Spanish with the South Central Fresno community in a variety of ways, including:

- Posting billboards reminding the public not to burn trash
- Arranging social media ads pointing the public to air quality tools
- Radio, social media and carteles campaign inviting businesses and the community to replace residential or commercial gas powered yard care equipment with electric
- Advertising the opportunity to eliminate residential wood burning through Burn Cleaner
- Frequent reminders of how to protect themselves during episodes of poor air quality

Additionally, the District worked closely with the community outreach and monitoring subcommittee to develop a back-to-school outreach plan, specifically identifying schools within the boundary at which to pass out information about not idling, how to protect yourself from wildfire smoke impacts, and how to engage with the AB 617 CSC. CSC members were invited to participate with our multilingual staff to help connect to their community and speak directly to parents and children about the important work happening in their neighborhoods.

COMPLIANCE AND ENFORCEMENT MEASURES

During the development of the South Central Fresno CERP, CSC members identified several primary sources of concern within the community. Based on the analysis of the District’s enforcement history within the AB 617 community, several focused enforcement and compliance assistance measures were included in the CERP aimed at enhancing enforcement and education efforts through existing District enforcement programs to address those areas of community concern discussed below. In addition to the implementation of the enforcement measures adopted in the CERP, the District’s Compliance Department has continued over the past year to promptly respond to public air pollution complaints in the community.

Number of Permitted Facilities
345

Inspection Types	Number of Inspections
Breakdown/Deviation Investigation	22
Follow-Up/Compliance Verification Inspection	9
Multi-Day, Ongoing Inspection	12
One Day/First Day of Multi-Day Inspection	254
Source Test Observation	21
Grand Total	318

Complaint Types	Number of Complaints
Asbestos	3
Commercial/Industrial Open Burning	10
Fugitive Dust	13
Odor Nuisance	8
Other	5
Residential Fireplace / Outdoor Wood Burning Device	15
Residential Open Burning	36
Visible Emissions From Equipment	3
Grand Total	93

Notice Types	Number of Notices
Notice of Violation	149
Notice to Comply	8
Grand Total	157

A complete summary of complaints received and enforcement actions taken over the past year is attached to this report as Appendix B.

Enhanced Enforcement of Wood Burning Curtailments

To limit the potential for localized PM2.5 impacts associated with the failure to comply with mandatory episodic wood burning curtailments under District Rule 4901, the District optimizes rule effectiveness to reduce the public

health impact of wood smoke, the District dedicates extensive staffing resources to operate a robust Rule 4901 enforcement program covering all aspects of the rule. The District's strategy focuses on both compliance assistance and enforcement activities. On all curtailment days, the District dedicates significant staffing resources to conducting surveillance in neighborhoods and responding to complaints from members of the public to ensure compliance with the rule. The District treats fireplace surveillance and complaint response as the highest priority enforcement activity.

To address the community concern of residential wood burning, the District conducted expanded residential wood burning surveillance within the 617 community on each "No Burning Unless Registered" and "No Burning for All" day declared (4 hours of surveillance per day) during the 2021-22 wood-burning curtailment season (November 1 to February 28).

Enhanced Enforcement to Reduce Illegal Burning of Residential Waste

To limit the potential for localized PM2.5 and toxic impacts associated with the illegal open burning of residential waste and to address the community concerns in regards to illegal burning, the District conducted targeted surveillance during each quarter to enforce the residential open burning prohibitions in District Rule 4103 and Title 17, California Code of Regulations, Section 93113 within the community.

Enhanced Enforcement of Regulation VIII Fugitive Dust Requirements

District rules limit fugitive dust emissions from construction, demolition, and earthmoving; bulk material storage; open areas; and unpaved roads and vehicle/equipment traffic areas. Furthermore, District rules restrict carryout and trackout onto paved public roadways. In order to facilitate enforcement of fugitive dust prohibitions, a Construction Notification or Dust Control Plan is required for all construction activities in the District involving one or more acre of disturbed surface area.

To address the community concern of construction/earthmoving dust emissions, the District conducted inspections of construction sites within the community with active Dust Control Plans or Construction Notifications pursuant to District Rule 8021 to enforce the fugitive dust emission standards contained within District Regulation VIII. Additionally, the District also conducted general area surveillance for other potential sources of fugitive dust in the community.

Enhanced Enforcement of Statewide Anti-Idling Regulation

To address the community concern of heavy-duty trucks and to limit the potential for localized PM2.5 and toxic air quality impacts associated with the failure to comply with the state's heavy duty anti-idling regulation, the District staff performed quarterly anti-idling surveillance. Locations where surveillance was conducted were based on CSC input provided to the District and CARB. To ensure District staff continue focusing in the areas where residents are being impacted, the District has included discussions in CSC meetings to provide updates on these efforts and to receive CSC feedback on areas to be focused on while doing surveillance, and will continue to do so moving forward. District staff also spoke directly to businesses who rely on heavy-duty trucking, identified by the CSC, to provide compliance assistance and education regarding the state's anti-idling Airborne Toxic Control Measure requirements and steps to be taken to ensure compliance. Although only one violation was discovered during the surveillance performed, the District believes that the outreach provided to businesses in community will contribute to increased compliance with the state's requirements.

Enhanced Inspection Frequency of Stationary Sources

The District conducts inspections and investigations of both permitted sources to determine compliance with a multitude of health-protective local, state, and federal air quality regulations targeting both criteria and toxic pollutants. These include (1) District rules and permit requirements; (2) statewide Airborne Toxic Control Measures; (3) statewide greenhouse gas regulations; and (4) federal New Source Performance Standards, National Emission Standards for Hazardous Air Pollutants, and Maximum Available Control Technology standards.

The District closely monitors such sources and strictly enforces applicable requirements. Compliance evaluations are unannounced whenever possible and involve both a physical inspection of the facility and a review of operating and monitoring records.

To address the community concern of industrial processes as well as agricultural operations and other permitted sources of air pollution, the District reviewed the enforcement history of all permitted facilities in the community, and for each facility having an emissions violation within the last three years, the District committed to performing inspections of these facilities at least twice per calendar year for the next five years or until the facility has four consecutive inspections without an emission violation, whichever comes first. District staff has fully implemented this measure and increased inspections of these facilities is ongoing.

Pilot Training Program for Conducting Self-Inspections at Gas Stations

The District has developed the training program, however, due to the close one-on-one interaction needed to train gas station owners/operators on conducting more thorough, hands-on vapor recovery system inspections, training was postponed until such a time that the training could be provided while ensuring the safety of District and facility staff. The District began conducting this training for gas station operators in Summer 2021. Year-to-date updates for each enforcement CERP measure are described in Appendix B.

DISTRICT REGULATORY MEASURES

During CERP development, and throughout implementation, the South Central Fresno community has placed a high priority on reducing PM2.5 and toxic air contaminant emissions that originate from industrial sources in and around the community. Beyond the stringent regulations and permitting requirements that are already implemented Valley-wide, the District worked with the CSC to incorporate and implement additional CERP regulatory strategies pertaining to stationary sources. Two of the measures describe stationary source regulatory actions in detail, including evaluation of BARCT requirements for rules that apply to Cap and Trade Facilities; and evaluation of rules to determine whether additional reductions are possible for sources of NOx and PM2.5. Both measures specifically list several rules that are scheduled to be evaluated in coordination with the CSC throughout the life of the CERP and are discussed more below. CARB's Board took additional action during the approval hearing to support the District and CARB's commitments to conduct reviews of stationary and mobile source rules and discuss permitting and rule-making processes, in a transparent and expeditious manner. Towards this end, the District has prioritized CSC discussion and community input on the District's regulatory review and has been providing opportunities for the CSC and community members to provide feedback as part of the rule development process, including email notifications of upcoming workshops, updates during steering committee meetings, and one-on-one conversations with steering committee members.

To address CSC concerns regarding progress towards updating rules and regulations affecting sources of concern in the community, the District presented a detailed rule development schedule during the July 2020 steering committee meeting and have implemented a process to notify CSC members of all rule development processes so they can participate and provide valuable input into the process. The CSC has identified primary sources of concern and the District has prioritized rule development on rules that these facilities are subject to, specifically the glass melting furnaces, solid fuel-fired boilers (biomass boilers), and petroleum bulk storage. These rules were amended in 2021, as described in the table below. During the rule amendment process, dates and timeframes that stationary sources including compliance dates are established as part of the process. CSC members will be provided be able to fully participate in the rule development process and their insight will not only be welcomed but encouraged through advance notice of public meetings and will be an excellent opportunity for them to provide their knowledge and experience in helping to develop these rules.

PM2.5 Plan Rule Updates

District staff have continued moving forward with technical evaluation and public engagement efforts for scheduled regulatory measures, with several District rules scheduled for proposed amendments in the 2021-22 timeframe. Emissions reductions achieved through the implementation of more stringent limits potentially required through these rule amendments will further contribute to reduced exposure to air pollution in the community. CSC members, members of the AB 617-selected community, and the general public are encouraged to be involved in the upcoming rulemaking process for these rules.

Rule	Stationary/Area Source Category	Rule Development Status
4901	Wood burning fireplaces and heaters	Rule Amended June 20, 2019
4311	Flares	Rules amended December 17, 2020
4306 & 4320	Boilers, steam generators, and process heaters	
4702	Internal combustion engines	Rule amended August 19, 2021
4692	Under-fired charbroilers at commercial restaurants	Rule amendment evaluation ongoing
4354	Glass Melting Furnaces	Rule amended December 16, 2021

Rule	Stationary/Area Source Category	Rule Development Status
4352	Solid-Fuel Fired Boilers	Rule amended December 16, 2021

Best Available Retrofit Control Technology (BARCT)

AB 617 required districts that are in nonattainment for one or more air pollutants to adopt expedited schedules by January 2019 for the implementation of Best Available Retrofit Control Technology (BARCT). Significant work was necessary to demonstrate that existing rules met BARCT requirements or, where it was not clear that BARCT requirements were met, identify potential gaps in the existing rules, establish a rule-review schedule, and take the schedule to the District’s Governing Board for approval before the deadline. The Board adopted the District’s BARCT Analysis Schedule on December 20, 2018. The District is now implementing the plan, and, where necessary, develop rule amendments consistent with state BARCT requirements. The District must also share its findings with the state as CARB compiles the BARCT clearinghouse.

District’s expedited BARCT Schedule: <http://community.valleyair.org/best-available-retrofit-control-technology-barct>

Since 2019, the District has begun performing a further BARCT analysis of 13 of the 16 rules identified, typically in the order of documented priority. Each District rule and source category are evaluated in comparison to federal and state air quality regulations and the regulations of other air districts in California and throughout the country.

The District held a public workshop on April 20, 2021 and provided a update to the public on the progress the District has made on the BARCT evaluations for 4 rules conducted in 2020 (see published report – [link](#)) and discussed the next steps associated with further evaluating the remaining District Rules for satisfying BARCT requirements. The following table summarizes the status of the BARCT rule evaluations.

Rule	Title	BARCT Status
4454	Refinery Process Unit Turnaround	Meets BARCT
4641	Cutback, Slow Cure, And Emulsified Asphalt, Paving And Maintenance Operations	Meets BARCT
4104	Reduction of Animal Matter	Meets BARCT
4409	Components at Light Crude Oil Production Facilities, Natural Gas Production Facilities, and Natural Gas Processing Facilities	Combined rule development public process to evaluate/implement additional BARCT requirements in progress - expediting the rulemaking efforts for three of the five rules (Rules 4623, 4624, and 4401) to streamline assessment. Rule Amendment scheduled 2023
4455	Components at Petroleum Refineries, Gas Liquids Processing Facilities, and Chemical Plants	
4623	Storage of Organic Liquids	
4624	Transfer of Organic Liquids	
4401	Steam-Enhanced Crude Oil Production Wells	
4702	Internal Combustion Engines (VOC only)	Rule amended August 19, 2021
4694	Wine Fermentation and Storage Tanks	Removed from Expedited BARCT Schedule

Rule	Title	BARCT Status
4603	Surface Coating of Metal Parts and Products, Plastic Parts and Products, and Pleasure Crafts	Meets BARCT
4601	Architectural Coatings	BARCT Rule Adopted 4/16/20
4566	Organic Material Composting Operations	Removed from Expedited BARCT Schedule
4625	Wastewater Separators	Meets BARCT
4621	Gasoline Transfer Into Stationary Storage Containers, Delivery Vessels, and Bulk Plant	Removed from Expedited BARCT Schedule
4402	Crude Oil Production Sumps	BARCT evaluation scheduled for 2023 completion

The District is also working with the affected facilities to identify the potential control options that may result in additional emissions reductions. The affected facilities are providing the District with technical information and costs related to potential control options to determine the feasibility of implementing each option identified.

Technology Clearinghouse

AB 617 requires CARB to establish and maintain a statewide clearinghouse that identifies the best available control technology, best available retrofit control technology for criteria air pollutants, and related technologies for the control of TACs.

Since 2019, District staff have been participating in bi-weekly conference calls with CARB and other air district staff to discuss the proposed changes to the statewide clearinghouse and the new database and website interface that CARB and their programming consultant is creating. Through collaborative discussions, the District has provided input on facility and pollutant definitions; source category, subcategory, and classification differences; public usability and device specificity; and many other topics. To date, CARB has published an initial Technology Clearinghouse webpage ([link](#)) and has published, the following prototype tools to support public needs while the remainder of the Technology Clearinghouse system is developed:

- Next Generation Technology (Released November 2019) - [Emergency Back-up Power Options for Residential Applications](#)
- Rules (Released March 2020) - [Current Air District Rules Tool](#)
- Next Generation Technology (Released June 2020) - [Emergency Back-up Power Options for Commercial Applications](#)

Additional meetings have been scheduled and significant work and testing of the new database, tools, and website is still being performed.

AB 2588 Air Toxic Hot Spots

The District's integrated air toxics program fulfills the state AB 2588, California Air Toxics Hot Spots, mandates, which are aimed at quantifying and assessing localized health risk, notifying affected residents, and reducing risk from facilities with high risk caused by air toxic emissions. The state Hot Spots Act is only one part of the District's comprehensive program to regulate air toxics in Valley communities. To achieve maximum efficiency and effectiveness, the District operates an integrated air toxics program that implements local, state, and federal mandates.

Since 2021, the District has been implementing a plan designed to expedite the assessment of the health risk associated with each of the facilities located in South Central Fresno. To date, the District has assessed the

health risk for 300 facilities within the Community and none of the facilities that have been assessed pose a significant health risk.

Implementation of New Criteria and Toxics Report (CTR) Regulation

Under AB 617, CARB is tasked with developing a uniform statewide system for reporting inventories for criteria and air toxic emissions for stationary sources to the public. The uniform statewide system is currently under development. The state's *Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants* went into effect on January 1, 2020. This regulation requires certain facilities to report their criteria and toxic emissions to the District annually starting with the 2019 emissions year.

LAND USE MEASURES

During CERP development, and throughout implementation, the South Central Fresno community has expressed concerns regarding air pollution emission from heavy-duty trucks and other impacts associated with industrial development, as well as planned industrial development, specifically distribution centers planned for under the City of Fresno South Industrial Priority Area Specific Plan. With respect to new development, concerns include potential increased exposure to emissions for residents that live near heavy-duty trucking corridors and major thoroughfares in the community.

To address community member concerns, several community-identified measures were included in the CERP that focused on strategies to reducing emissions and exposure from heavy-duty vehicles operating in the community as well as strategies to ensure that air quality impacts and mitigation are considered in all land use decisions within the community boundaries.

The District is facilitating discussions with the City regarding enhancing the coordination between both agencies and establishing administrative procedures aimed at further strengthening the District's engagement on California Environmental Quality Act (CEQA) project commenting and review process. These efforts are designed to create opportunities to further the discussion with the District, the City, the CSC, and interested public members (especially impacted residents), regarding potential air quality impacts. For instance, the District has recommended additional air quality mitigation measures to reduce emissions and potential health risks associated with proposed development projects. Additionally, the City committed to, and has been including the District in the City's pre-application process, which includes written comments and/or attendance at Development Review Committee meetings for projects that will result in construction within the AB 617 area.

The District and the City have provided training and resources to the CSC on opportunities to review and comment on developmental projects that are taking place in the community in regards to CEQA, including the City of Fresno providing the CSC training on their Fresno Accelerated Application System to Electronic reviews (FAASTER), which is a public portal designed to provide information related to CEQA and developmental projects. The District continues to look for opportunities for public input on land-use decisions, provide additional public access and education regarding permitting and CEQA process, better communicate and understand air quality impacts and potential mitigation, and working together to identify and seek additional air quality improvement opportunities.

The District established a land use subcommittee to collaborate more closely with the CSC and the City of Fresno on the CARB-identified measure to seek to develop a Memorandum of Understanding (MOU) or other appropriate mechanism to strengthen the working relationship between the agencies regarding air quality impacts resulting from land use and transportation matters. The District and CSC have come together over several subcommittee meetings with the City of Fresno to develop and refine the MOU or other administrative mechanism.

For the subcommittee discussions, the City prepared language in the form of a letter, as an administrative mechanism outside of an MOU, to the District describing the various ways that were committed to and have

begun implementation to strengthen the working relationship between the District and the City in coordinating specifically on projects within the AB 617 community. Among many suggested changes to the City’s proposed language, some of which the City made and iterated on throughout the past year, the land use subcommittee members expressed during the June 2022 subcommittee meeting they were not supportive of any alternative to an official MOU, such as a letter. However, in this discussion, the City affirmed its commitment to continue to implement the actions to strengthen the working relationship and the District. Towards that end, the District and the City will continue to collaborate and update the CSC on projects within the AB 617 boundary.

Truck Rerouting as a Priority Measure

In prioritizing measures for implementation, the CSC was eager to move forward on the truck rerouting commitment. As such, the District formed a truck rerouting subcommittee, which is comprised of interested CSC members and provides support to the City of Fresno as they fulfill their CERP commitment to study existing and future planned routes within the South Central Fresno boundary and determine whether potential alternative routes would support the goals of the AB 617 program to reduce community exposure to air pollution from local sources.

Throughout this year, the City of Fresno Department of Public Works staff worked with the CSC to review and post an RFP soliciting contractors to complete the truck-route portion of the study. Interested CSC members were invited to sit on an interview panel, recommend a contractor, review and support the proposed scope of work, and ultimately move the project forward. CSC members were also interested in partnering with a local research university, UC Merced, to conduct a health-based assessment of the truck reroute study. Throughout the project, the City of Fresno staff have provided project management services and lead technical and community working groups to discuss the scope and progress of the study.

TRUCK REROUTE STUDY CONTRACT APPROVED BY FRESNO CITY COUNCIL

Given that over 85% of criteria pollutants and the majority of toxics emissions in the South Central Fresno region come from mobile sources, including on-road heavy-duty diesel trucks, the highest priority concern outlined by the community throughout the Community Air Protection Program process was a need to assess the impacts of heavy-duty trucks in South Central Fresno.

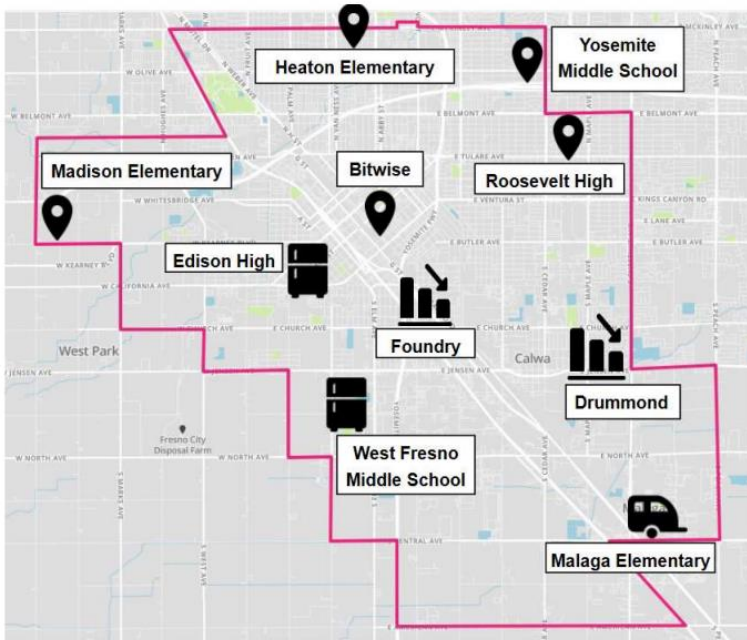

In April 2022, the Fresno City Council approved study to assess heavy-duty truck routes and associated health impacts on nearby resident in the South Central Fresno AB 617 community. The approved study will be conducted in partnership with the Valley Air District, UC Merced health researchers, and other study partners to assess truck routes and associated health impacts to the community.

COMMUNITY AIR MONITORING IMPLEMENTATION

The District worked with the South Central Fresno CSC to develop and deploy a community air monitoring plan consists capable of proving real-time air quality information to the community.

Throughout the past year, the District continued to engage the South Central Fresno CSC to provide updates to the community regarding air quality data and solicit further recommendations for new monitoring sites if deployment issues arise. Consistent with the community recommended CAMP design, air monitoring systems have been fully implemented in all locations describe in the following figure.

Air Monitoring Locations in South Central Fresno

 PM2.5 Monitor	 Compact System: PM2.5, Black Carbon, Ozone, BTEX, NO _x , & VOC, CO (Edison), SO ₂ (West Fresno)
 Regulatory Air Monitor: Foundry (PM2.5), Drummond (Ozone, NO ₂ , PM10)	 Trailer: PM2.5, Black Carbon, Ozone, CO, NO ₂ /NO, H ₂ S/SO ₂ , BTEX & Toxics
 Mobile Monitoring Van: respond to community concern	

Community Air Monitoring to Date

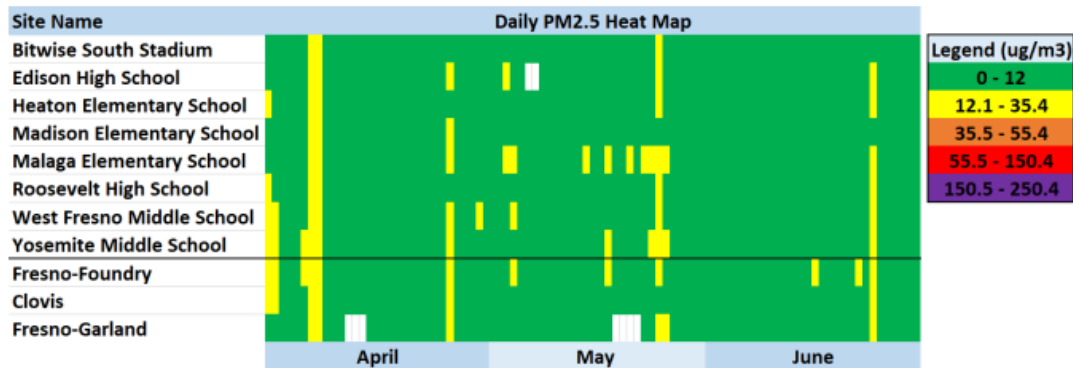

The District and CSC members have spent considerable efforts to fully implement and deploy the community air monitoring equipment as part of the CAMP and providing that data in real-time online and providing regular updates. Real-time information, including the interactive map in the figure below, can be found at:

<http://community.valleyair.org/selected-communities/south-central-fresno/community-air-monitoring/>

Interactive Map of Community Air Monitoring in South Central Fresno

Example Analysis of 2022 Community Air Monitoring Data in South Central Fresno

CAMP implementation has included researching, developing, configuring, deploying, trouble-shooting, and maintaining new state-of-the-art high precision air monitoring equipment. This also includes the use of the mobile air monitoring van to take measurements in a variety of locations of interest and to respond to community concerns. The van has been used to collect air quality data from sources identified by CSC members, see picture below.

Special Project and Analysis

The District has also contracted with analytical laboratories to conduct the needed analysis to speciate the VOC and PM2.5 samples being taken in the community. In addition, the District has worked closely with organizations

to negotiate leases to authorize the deployment of the equipment on site, followed by logistical, electrical, and site preparation work for the installation of the air monitoring equipment.

Additionally, the District monitoring team has responded to community concerns throughout the boundary by deploying specialized monitoring equipment to capture and understand unusual readings from PM2.5 monitors. For example, on March 11, 2022, VOC and PM2.5 speciation air monitoring efforts were shifted to the air monitoring trailer at Edison High School based on community and District analysis of high PM2.5 readings throughout the winter season. The collected samples were sent to a third-party laboratory for analysis to determine the contribution of various species of PM2.5, as well as the various species of VOCs in the air sampled in the community. Results showed no significant species difference compared to other areas of the community, but the District will continue to collect samples for laboratory analysis at Edison High School through the 2022-23 winter season to try and capture any wintertime effects that may have caused the highest readings.

The District has been providing detailed, regular air monitoring updates to the South Central Fresno CSC. To ensure that the community is fully apprised of the ongoing air monitoring efforts and are receiving the latest air quality information, bilingual weekly updates, comprehensive quarterly reports, and real-time air quality information about the community air monitoring efforts in South Central Fresno are all posted on the community webpage:

<http://community.valleyair.org/selected-communities/south-central-fresno/community-air-monitoring/>

HEALTH IMPACTS OF LOCAL AIR POLLUTION

As discussed in CARB's Blueprint, a core focus on achieving emissions reductions and tracking ongoing progress is needed to address public health risks that may be caused by air pollution exposure. Consideration of public health includes taking health risks into account in identifying and selecting emissions reduction strategies, evaluating health risks in the context of newly acquired air monitoring information, as well as exploring ways to better understand data on community health and its potential relationship to past or ongoing pollutant exposure. In the Blueprint, CARB recognizes that individual and community health is influenced by many factors including exposure to other environmental hazards (e.g., drinking water contaminants, tobacco smoke), individual level vulnerability (e.g., diet, genetic factors), as well as structural determinants of health such as neighborhood poverty, racial/ethnic segregation, violence, access to food and health care, and lack of green space.

Towards this end, the District has gathered some baseline data in the South Central Fresno AB 617 Community in Appendix G of the CERP and will continue to work with the Steering Committee, OEHHA, CARB, and health researchers to track and support local research efforts to understand the public health impacts of local and regional emissions reduction efforts.

Tracking Recent Research Efforts

Several recent community-facing public health impact studies have focused their efforts on AB 617, with a focus on tracking public health outcomes of emissions and exposure reduction measures like those in the South Central Fresno CERP. As the community members engage and collaborate with researchers on these studies, the District is committed to tracking, updating, and including the CSC and broader community on study methodologies and outcomes. The South Central Fresno CSC has heard updates on several study efforts in the past year. The below list of recent research efforts in the South Central Fresno community that will continue to help drive the conversation between the CSC and agencies about the effectiveness of these CERP and CAMP efforts.

Study	Description	Collaborators	Location(s)	Anticipated Completion
Participatory Assessment of Health Equity Impacts Through the Implementation of the Community Air Monitoring and Management	Track and assess the environmental and health impacts of the CERP implementation process in AB 617 communities, to inform strategies that improve the well-being of the most disadvantaged communities in California	Nayamin Martinez (CCEJN), UC Merced, UC Davis	-Fresno -Shafter	Fall 2023
San Joaquin Valley Pollution and Health Environmental Research (SPHERE)	-Address knowledge gaps in environmental exposure -Examine determinants of exposure -Evaluate potential human health risks in relation to exposures -Support actionable steps to improve air quality	UC Berkeley, UC Merced, UCSF, Little Manila Rising, Central California Asthma Collaborative (CCAC), CARB, OEHHA, CDPH	-Stockton -Fresno <i>-potentially others</i>	Spring 2024
San Joaquin Valley Center for Community Air Assessment and Injustice Reduction (SJV CC-AIR)	-Launch a mobile air quality laboratory and health assessment clinic -Deploy community air quality monitoring 125 new PurpleAir sensors -Establish a permanent community-university air quality research and clinical center at UC Merced	UC Merced, Little Manila Rising, Fresno County DPH	-Stockton -Fresno	2025
Filtration for Respiratory Exposure to wildfire Smoke from Swamp Cooler Air (FRESSCA)	Reduce wildfire smoke exposures and health risks among agricultural workers and other low-income families by designing and field testing an affordable and effective filtration system for rooftop evaporative coolers	UCSF, PHI, CDPH, Central California Environmental Justice Network (CCEJN)	-SJ Valley -Fresno	Fall 2024

5. Permitting	Business	Evaluation of Rules	-In Dec. 2020, District Governing Board adopted amendments to rules for flares and for large, industrial boilers, steam generators, and process heaters (impacts multiple facilities in community) -Further control requirements for Internal Combustion engines used at industrial and agricultural operations adopted by District Governing Board in August 2021 -Further control requirements for glass melting furnaces and solid fuel fired boilers, steam generators, and process heaters adopted by District Governing Board in December 2021. -Notices of opportunities for public comment on these rulemakings, including public workshops, will continue to be sent to CSC Link: Ongoing evaluation of several rules in 2020 & 2021. See detailed updates here.	---	8 rule evaluations	4 rules amended or addressed	Health Protective Mitigation					Jon Klassen 559-230-5809 Jon.Klassen@valleyair.org

APPENDIX B

Enforcement Plan Update

2022 Enforcement Report

Updates to Enforcement Plan Attachments

South Central Fresno AB 617 Community

San Joaquin Valley Air Pollution Control District

Enforcement Plan

List of Permitted Facilities

The Valley Air District has some of the most stringent regulations in the country for limiting emissions from businesses and other stationary sources of air contaminants. There are numerous types of equipment as well as industrial and commercial processes that require a Permit to Operate with the District. The following is a current listing of all facilities located within the South Central Fresno Community which have active Permits to Operate with the District as of July 2021. A previous listing was provided in [Appendix F](#) of the South Central Fresno Community Emissions Reduction Program (CERP) and in the 2021 annual report.

Enforcement Plan Facility Inspections

Facilities that have permits with the Valley Air District are inspected on a regular basis by District Compliance staff to ensure all permit requirements are being followed. New and modified equipment is also inspected before commencing operation. District inspection staff also observes stack emission testing (known as source testing) for certain types of equipment to ensure that proper testing procedures and protocols are followed by the third-party testing company. They also conduct inspections when unforeseen equipment breakdowns occur which may affect a facility's ability to comply with all permit requirements.

In addition to the numerous inspections already conducted by the District each year at permitted facilities throughout the valley, the District committed in the South Central Fresno CERP to increase the frequency of periodic compliance inspections to once every six months at facilities that have had an emissions related violation within the last three years. The following is a listing of all District inspection activities at permitted facilities within the South Central Fresno Community from July 2021 through June 2022. A previous listing of inspections can be found in [Appendix F](#) of the South Central Fresno CERP and in the 2021 annual report.

Facility Name	Facility ID	Facility Address	Date	Inspection Type

Enforcement Plan Summary of Complaints

District inspectors respond to approximately 3,000 public air pollution complaints District-wide each year. Some complaints are related to permitted facilities, however a majority of complaints received by the District are for other sources of pollution such as illegal open burning, fireplace burning, dust generating activities, and miscellaneous odors. The District responds to all public complaints received, and makes every effort to respond as quickly as possible. Most complaints are investigated the same day they are reported. The following is a summary of all public air pollution complaints received and responded to within the South Central Fresno Community from July 2021 through June 2022. A previous report of complaints can be found in [Appendix F](#) of the South Central Fresno CERP and in the 2021 annual report.

Date/Time Received	Owner/Operator/Responsible party	Facility ID	Property Address	Complaint Type	Complaint Description	Resolution	Resolution Description
7/8/21 9:04 AM	Pacific Gas & Electric		2252 S Orange Ave, Fresno	Other	At this PG&E facility site, there is a large portable generator that is hooked up to the office building. It has been there for longer than a year.	NOV Issued	Inspector confirmed that a rental generator had been operating at this location for more than a year without a permit. NOV #5026593 issued.
8/3/21 9:58 AM	City of Fresno		2101 G St, Fresno	Fugitive Dust	Complaints of street sweepers dumping street waste in city garbage cans. It's creating tons of dust that is getting all over vehicles and is causing breathing issues.	Unable to Confirm	Inspector observed one bin being dumped and only minor dust. City agreed to make adjustments to the height of the bins and sweepers to minimize dust generated.
8/8/21 4:44 PM			4282 S Cherry Ave, Fresno	Residential Open Burning	Burned trash last night and plastic today.	Unable to Confirm	Inspector was unable to access property or make contact with the owner/resident. Provided information about District rules.
8/10/21 7:36 AM	Almond Orchard		Annadale Ave & Willow Ave, Fresno	Fugitive Dust	Almond harvesting going on - the dust is creating a nuisance, impacting nearby businesses.	No Violation	Inspector observed dust being generated, but no violations of district rules. Provided information to workers on low dust practices.
8/12/21 4:07 PM			1572 N Calaveras St, Fresno	Other	Body shop in residence that produces a lot of noise and also fumes from painting cars, it's occurring now but only the dent repairs, the painting is done usually at night.	Unable to Confirm	Inspector attempted to make contact with the property owners, but were unable. No activity observed while on site.
8/18/21 10:13 AM	Almond Orchard		West Ave & California Ave, Fresno	Fugitive Dust	Farmer is sweeping an almond orchard on California St and the dust is terrible.	Unable to Confirm	Inspector observed equipment parked, but no active dust being generated. Provided information to workers on low dust practices.
8/21/21 11:10 AM	Almond Orchard		2630 S Peach Ave, Fresno	Fugitive Dust	On the southwest corner of peach and Jensen a farm is not taking any measures to reduce their dust and the road has no visibility on peach avenue.	No Violation	Inspector observed dust being generated, but no violations of district rules. Provided information to workers on low dust practices.
9/14/21 11:36 AM	Almond Orchards		Hwy 180 and Marks Ave, Fresno	Fugitive Dust	Large amount of dust from almond harvesting. Columns of dust are coming from the rows being harvested.	Unable to Confirm	Inspector surveyed the area and did not find any large plumes of dust from almond harvesting.
9/24/21 9:25 PM			105 E Hedges Ave, Fresno	Residential Open Burning	My neighbor is constantly burning, mostly in the evenings. I have made reports about him in the past and he claims he is "smoking meat" I could tell when he smoking his meat because you could smell the meat. He isn't always smoking meat, it smells like something else.	Unable to Confirm	Reporting person requested to drop the complaint. Staff did not investigate further, but have investigated this address once before in the past. No violation was confirmed.
9/27/21 12:08 PM			4251 S Cherry Ave, Fresno	Residential Open Burning	Someone burned plastic last evening on September 26 and also on Saturday, September 25.	Unable to Confirm	No burning was observed at the time of the investigation. Residents would not allow staff to inspect the property.
9/27/21 7:48 PM			4262 S Cherry Ave, Fresno	Residential Open Burning	People on the corner are burning again. They're burning trash and now they're watering it down and you can smell the plastic and trash.	Unable to Confirm	No burning was observed at the time of the investigation. Residents would not allow staff to inspect the property.
9/28/21 9:29 AM			4195 S Cherry Ave, Fresno	Residential Open Burning	Burning of trash and plastic - white smoke can be seen	Unable to Confirm	Upon investigation, no signs of burning observed.
10/9/21 6:21 PM			4262 S Cherry Ave, Fresno	Residential Open Burning	Burning Plastic by a willow tree in the front yard	Unable to Confirm	Upon investigation, no evidence of burning was found. Unable to make contact with anyone.
10/10/21 12:00 PM	International Recycling & Towing		3270 S Golden State Blvd, Fresno	Commercial/Industrial Open Burning	irrigation pipe pile fire.	No Violation	Unintentional fire, possibly started by activity from the adjacent homeless encampment.

6/2/22 5:57 PM			Brawley Ave. & Hwy 180, Fresno	Residential Open Burning	Almost every Thursday night (and they do this at night) and sometimes on Friday night there is burning at this locaiton. I don't know what the heck they're burning but I hope it isn't garbage. I noticed before that the fire department has stopped over there and talked to them because they stopped it for a while. Please can someone drive by about 9 pm (as soon as the sun goes down) and see if you can do something about it.	Unable to Confirm	Staff was unable to obtain a more specific location from the reporting person or determine the residence this complaint is referring to.
6/5/22 7:50 PM			1264 or 1269 N Fruit Ave, Fresno	Residential Open Burning	Burning of lawn clippings and wood	Unable to Confirm	Staff investigated both addresses and observed no signs of burning.
6/6/22 12:40 PM			Malaga & Cedar NW Corner	Fugitive Dust	Complaints of plowing a field without using any type of water.	Confirmed	Dust from a tractor was observed while discing an agricultural field, however no violations of District rules.

Date/Time Received	Owner/Operator/Responsible party	Facility ID	Property Address	Complaint Type	Complaint Description	Resolution	Resolution Description
6/6/22 1:44 PM	Jasvinder Singh		4780 S Maple Ave, Fresno	Fugitive Dust	The owners have people working on their land for grading and there is dirt everywhere. It looks like they are trying to do commercial work. They are not using a water truck. They have a water truck on site but they are not using it properly. This happened a few weeks ago. They were supposed to be finished grading, but they are doing something else now and it's creating alot of dust.	No Violation	Field is ag property being prepared for planting trees. Not subject to District dust control requirements.
6/7/22 2:23 PM	Suburban Propane		2874 S Cherry Ave, Fresno	Odor Nuisance	Horrible fumes - smells like some type of gas.	Confirmed	Odor of mercaptans was confirmed at the complaint location. Not a violation of District rules, but notified the facility of the odor and complaint.
6/7/22 4:54 PM			Behind 3100 Block of West Nielson Avenue	Fugitive Dust	Dust is generated from business, it's creating a nuisance on windy days. There's minimal watering done.	Unable to Confirm	Unable to determine the exact location of the complaint or locate any sources of fugitive dust in the area.
6/8/22 12:32 PM			NE Corner of S Willow Ave and E Vine Ave, Fresno	Residential Open Burning	Complaints of burning wood at the location.	Unable to Confirm	Upon investigation, Inspector did not observe any evidence of burning in the area described.
6/14/22 1:08 PM	Robert Navarro		3703 S Bagley Ave #102, Fresno	Fugitive Dust	Dry blasting is creating a dust storm.	Unable to Confirm	A small amount of blasting does occur at location, however no visible dust was observed.
6/14/22 4:42 PM			1265 or 1269 N Vagedes Ave, Fresno	Odor Nuisance	Smell of smoke - like mixture of burnt material and exhaust	Unable to Confirm	Odor possible associated with cooking on a BBQ at a nearby residence. No offensive odors observed.
6/15/22 9:58 PM			1252 N Fruit Ave, Fresno	Residential Open Burning	I've called several times regarding burning in the area. I have a video of a person burning and would like to send it to the District to build a case.	Unable to Confirm	Original complainant determined burning was coming from a cooking fire on a BBQ. No further investigation.
6/22/22 5:04 PM			3460 E Liberty Ave, Fresno	Residential Open Burning	Someone is burning Tires at the above address (Between 4th Street & 5th Street & Between Liberty and Lyell Avenues.	Unable to Confirm	Upon investigation, Inspector did not observe any evidence of burning.
6/28/22 7:41 AM			Central Ave Between Peach and Willow	Visible Emissions From Equipment	Smoke observed from a stack from 99S. It appeared to be coming from Vitro	Unable to Confirm	Upon investigation, no smoke was observed from Vitro's stack. Slight smoke was observed from Rio Bravo's stack, but below permitted limits. No breakdowns reported by either facility.
6/29/22 8:29 AM	Allen Company		2607 E Woodward Ave, Fresno	Fugitive Dust	RP States that there are white particles in the air as a result of whatever thay are recycling at Allen Company Recycling Center. They do it pretty often and it's creating alot of air pollution. There is so much of it that it leaves particle dust on the cars. That's how bad it is.	No Violation	Equipment was not in operation at the time of investigation. Pieces of shredded paper are not an air contaminant.

Enforcement Plan

Summary of Violations Found

The District implements a robust enforcement program that includes regular inspections of facilities with District permits as well as other potential sources of air contaminants. In the South Central Fresno CERP, the District committed to further enhancing its enforcement efforts in a few areas of concern to the community. From July 1, 2021 through June 30, 2022, District compliance staff have completed numerous hours of additional surveillance in the South Central Fresno Community for open burning violations, fireplace violations, and idling diesel truck violations, in addition to conducting more frequent inspections at facilities with recent emissions violations and dust generating sites.

When a violation of a District rule or other air pollution regulation is discovered during an inspection, complaint investigation, or through surveillance activities, the violation is documented through the issuance of a formal notice to the owner or operator, and depending on the nature of the violation, may be subject to substantial monetary penalties. The following is a summary of all violation notices issued from July 2021 to June 2022 for violations of District Rules or other State air pollution control regulations within the South Central Fresno Community. These include violations at permitted facilities as well as other non-permitted facilities and private residences. A previous list of violations can be found in [Appendix F](#) of the South Central Fresno CERP and in the 2021 annual report.

Date	Type	Violation #	Issued To	Facility ID	Facility Type	Location	Description	Rules
7/1/2021	NOV	5026575	Aaron Perrigo as agent of Confidence UST Services		Not Permitted	2907 S Maple Ave, Fresno	Failure to report the pass/fail status of gasoline vapor recovery testing within 24 hours of conducting the test(s)	1177 (Gasoline Dispensing Facility Tester Certification)
