

Community-Identified Project Approval Notice

Commercial Lawn and Garden

Air District: San Joaquin Valley Air Pollution Control District (District)

Community: Stockton

Community Emissions Reduction Program (CERP) Measure:

LG.2: INCENTIVE PROGRAM FOR THE REPLACEMENT OF COMMERCIAL LAWN AND GARDEN EQUIPMENT

Project Plan Identifier: 2020-02CIP-2SJV

Project Type: Equipment replacement

Project Plan Completion Date: September 28, 2022

CARB Action (Date): Approved; October 20, 2022

Project Description: This measure will reduce NO_x and PM_{2.5} emissions from commercial lawn equipment by providing incentives to lawn care providers for the replacement of their existing gas-or diesel-powered landscape maintenance equipment with new electric landscape maintenance equipment. In addition, the program provides incentive funds for additional batteries and chargers to ensure that the equipment is capable of operating for a full day of work.

Project Benefits: The goal of this measure is to reduce NO_x and PM_{2.5} emissions by replacing at least 5 pieces of commercial grade gas powered lawn and garden equipment in the Stockton community. Emission benefits shall be quantified consistent with the methodology used for the Community Air Protection program lawn and garden category.
