

**Arvin/Lamont AB 617 Pesticide Subcommittee Meeting – Chat Transcript May 28, 2024 4:00-5:30 p.m.**

- 16:10:57 From Eric Salas : Risk Management Directive (RMD)
- 16:13:01 From Eric Salas : Bilingual Agenda: <https://community.valleyair.org/media/yg2hk3ob/5-28-24-final-pesticide-subcommittee-agenda-bilingual.pdf>
- 16:45:39 From Cesar CCEJN : on the 25th of April there was a drift i nthe Mexican colony aswell
- 16:46:42 From Cesar CCEJN : the resident asked for a swab of the stop sign on the corner it had happened because she had driven around. Could i ask if a swab was taken of the stop sign like the reporting party asked for?
- 16:48:31 From Spanish Interpreter, Tania, Linguistica : Cesar CCEJN el 25 de abril tambien hubo un derrame en la colonia mexicana la residente pidio un hisopo de la señal de alto en la esquina que habia pasado porque ella habia manejado por ahi. ¿Podría preguntar si se tomó una muestra de la señal de alto como lo pidió la reportante?
- 16:52:57 From Jessica Olsen - Valley Air District : Thank you Vanessa. I was more directly discussing the "attack the problem, not the person" group agreement.
- 16:55:10 From Spanish Interpreter, Tania, Linguistica : Jessica Olsen - Distrito de Aire del Valle Gracias Vanessa. Yo estaba discutiendo más directamente el acuerdo de grupo "atacar el problema, no la persona".
- 16:57:47 From Cesar CCEJN : [https://www.cdpr.ca.gov/docs/enforce/compend/vol\\_5/chap3.pdf](https://www.cdpr.ca.gov/docs/enforce/compend/vol_5/chap3.pdf)
- 16:58:45 From Cesar CCEJN : i do not see anything about not being able to take sample of off of a stop sign or anything that limits sample to only car windows
- 17:00:56 From Cesar CCEJN : in this Doc under c. Sampling Patterns it says this "Take precautions to prevent cross contamination. Even walking through an area could contaminate footwear or clothing, so great care should be taken not to sample from areas that have been stepped on or brushed against. When sampling, always sample the area of suspected least contamination and work towards the treatment area. Wash or change tools and gloves between samples collection."
- 17:01:29 From Cesar CCEJN : wouldn't this incentivize taking a sample off of a stationary sign rather than a car window that was driven for several miles?
- 17:02:38 From Gustavo he/him/his : wow!!!!!!
- 17:02:53 From Cesar CCEJN : so is glenn restricting access to his office?
- 17:12:59 From Jessica Olsen - Valley Air District : wow, Liz! what great notetaking.
- 17:13:12 From Jessica Olsen - Valley Air District : Thank you Maria :)

17:16:01 From Spanish Interpreter, Tania, Linguistica : Cesar CCEJN

en este Doc bajo c. Sampling Patterns dice esto "Tome precauciones para evitar la contaminación cruzada. Incluso caminar por una zona podría contaminar el calzado o la ropa, por lo que se debe tener mucho cuidado de no tomar muestras de zonas que se hayan pisado o rozado. Al tomar muestras, hágalo siempre en la zona donde se sospeche que hay menos contaminación y diríjase hacia la zona de tratamiento.

¿esto no incentivaría a tomar una muestra de una señal fija en lugar de la ventanilla de un coche que se ha conducido durante varios kilómetros?

Gustavo

iiiiijwow!!!!!!

Cesar CCEJN 8:02 PM

¿entonces glenn esta restringiendo el acceso a su oficina?
