

# **Draft 2023 South Central Fresno Community Emissions Reduction Program Annual Report**

September 27, 2023

San Joaquin Valley Air Pollution Control District

## COMMUNITY AIR PROTECTION PROGRAM IMPLEMENTATION IN THE VALLEY

The communities of Shafter, South Central Fresno, Stockton and Arvin/Lamont have been prioritized by the San Joaquin Valley Air Pollution Control District (District) and subsequently selected by the California Air Resources Board (CARB) as communities in the San Joaquin Valley to receive clean air resources available under AB 617. AB 617 provides mechanisms and resources to implement community-specific air quality monitoring networks; to develop, implement, and track emission reduction programs; to improve availability of data and other technical information; and to invest substantial funding in the community through voluntary incentive funding measures. Importantly, these measures are guided by advice and knowledge of local community members, through their input and involvement on Community Steering Committees (CSCs) for each AB 617-selected community.

The District continues to collaborate with each of the CSCs, made up of residents, and representatives from local non-profits, businesses, and agencies, to prioritize and implement the measures included in the District Governing Board-adopted, CARB-approved Community Emission Reduction Programs (CERPs). These efforts include engaging with Valley residents, businesses, agencies, and other stakeholders to identify and implement clean air measures and investments in the selected communities. Since adoption of the CERPs, the District has been working closely with the CSCs and local partners to implement CERP measures designed to reduce air pollution and exposure in the communities. In addition to the CERP implementation work, the District has worked diligently to implement the Community Air Monitoring Plans in consultation with the CSCs, with extensive air monitoring now being deployed and conducted in each of the communities.

### Implementation Progress in South Central Fresno

The community of South Central Fresno, selected by CARB in 2018 for AB 617 implementation, is a densely populated community within the City and County of Fresno. The community includes residential neighborhoods, rural communities, unincorporated county pockets, and industrial zones, all situated between three busy freeways in a heavily trafficked center of the Valley. The South Central Fresno CSC has been meeting for nearly four years to help identify community-supported solutions to reduce air pollution and protect the underserved population within this diverse community.

The South Central Fresno Community Emission Reduction Program (CERP) and Community Air Monitoring Plan (CAMP) were developed by the CSC, District, and CARB, with the support of local agency partners within the South Central Fresno community. Since CERP adoption by the District Governing Board in September 2019, and CARB approval in February 2020, the District has continued to meet with the South Central Fresno CSC to prioritize and implement the community-developed clean air measures and solicit feedback on how to continue enhancing the CERP.

This report summarizes the progress of CERP implementation in South Central Fresno from **September 1, 2022** to **August 31, 2023**.

## **SOUTH CENTRAL FRESNO COMMUNITY STEERING COMMITTEE ENGAGEMENT**

To ensure successful implementation of AB 617, the District has ensured that the residents, businesses, non-profits, agencies, and other stakeholders within South Central Fresno community continue to participate in inclusive and balanced public CSC meetings by providing:

- Monthly virtual evening meetings via Zoom, with technical assistance provided to residents and stakeholders, and an in-person CSC meeting held in June 2023
- Resident Stipend Program to encourage sustained and meaningful community engagement and help cover time and expenses associated with attending meetings and participating in process
- Continued real-time interpretation services through two Spanish interpreters at each meeting
- Meeting materials posted ahead of meeting, and sent in hardcopy for Spanish-only speakers to facilitate more productive virtual meeting environments
- Bilingual PowerPoint presentations, whenever possible
- Monthly agenda-setting meetings with District, stakeholders, community co-hosts, CARB, and a third-party facilitator to collectively set expectations and plan for upcoming CSC meetings
- Subject matter expert presentations given by partner agencies such as CARB, Caltrans, City of Fresno, Fresno Council of Governments (COG), Tree Fresno, and Office of Environmental Health Hazard Assessment (OEHHA)
- A comprehensive and dedicated multilingual community specific webpage with tools to view real-time community air quality monitoring data, maps of emissions, CSC meeting materials, historical documents and email correspondence with CSC members, annual implementation and enforcement reports, and guidance documents
- Neutral meeting facilitation by a community-recommended facilitation team to ensure meetings are inclusive and neutral by bringing out different points of view and preventing individuals from monopolizing discussions
- Weekly phone calls and text exchanges with Spanish speaking CSC members to ensure they have the ability to be fully engaged in the implementation process

Ensuring effective steering committees as described above requires substantial investment of staffing and other resources to schedule, organize, and facilitate frequent after-hours public meetings with extensive related investigation and communications. The District has also ensures that community members stay updated on public engagement opportunities regarding topics of interest to them and to solicit additional community input through email. All District communications with the CSC are available on the community specific website, under “Communications with Members”. The District also used outreach and media events as opportunities to share information regarding AB 617 and to promote the various grant programs available. Additionally, District staff provides updates and seeks feedback from the Citizens Advisory Committee (CAC) and Environmental Justice Advisory Group (EJAG) as the implementation of AB 617 in the Valley continues to develop.

Involving the public in the CERP implementation process continues to be a priority of the CSC and the District. All CSC meetings are promoted on social media and live streamed on YouTube Live with the meeting videos archived on the South Central Fresno webpage: <https://community.valleyair.org/selected-communities/south-central-fresno>

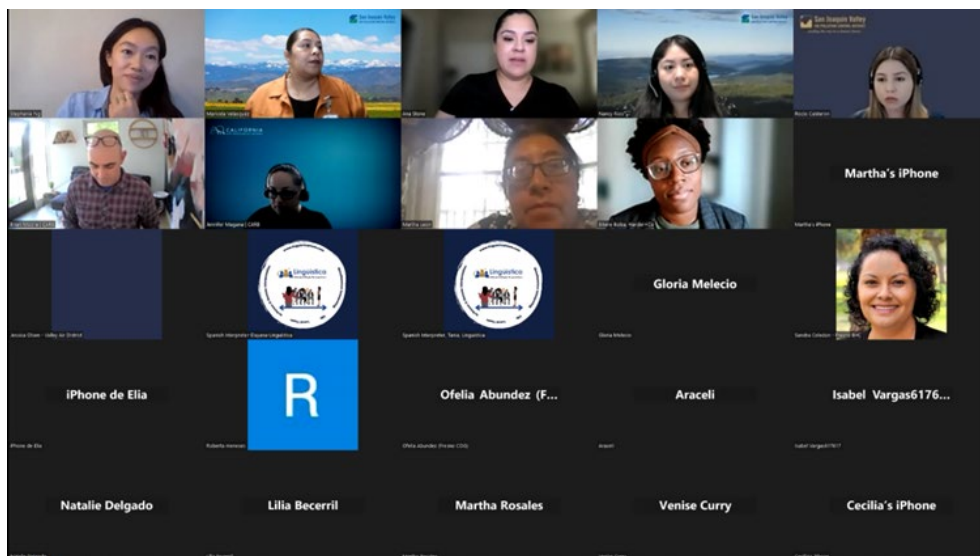

### *Recruiting and Onboarding New Resident Members*

To ensure the AB 617 process remains community-centered, the District worked with the CSC to recruit and onboard new resident members to the committee. After over four years of CERP development and implementation, several resident members originally on the CSC were no longer able to participate in the process for a variety of reasons. At the recommendation of the CSC and in an effort to ensure the majority of voices on the committee were community residents, the District opened applications to ensure that residents have an opportunity to provide feedback and recommendations, new ideas, and awareness in the South Central Fresno AB 617 community. With the assistance of the CSC members, the District received applications from eight residents to join the CSC.

The District held a dedicated onboarding session in June 2023 for all the new CSC members in order to introduce them to their new role and assist these new members in getting up-to-date on the history and work accomplished to date by the CSC. The meeting consisted of presentations from CARB, Air District, and the facilitation team on agency roles and responsibilities, an overview of air quality information and the AB 617 process, and the resident stipend program. Existing CSC members were also encouraged to join the onboarding session to share their thoughts and experiences in the process to better help inform the new CSC members.

Prior to the onboarding meeting, all new CSC members were emailed prep materials such as a Glossary of Terms, the CERP document, CERP tracker and more. During the onboarding meeting, the new residents had an opportunity to share their purpose and motivation for joining the committee and all shared their passion and commitment to improving air quality in their community.

A concept suggested by a CSC member to support new members to the CSC was to develop a “Buddy Program” to provide new members with a point of contact for general questions and guidance from one of our existing and experienced CSC members. The District helped facilitate these connections following the June in-person meeting.

### *Fresno June In-Person CSC Meeting*

In June 2023, the District, in partnership with the CSC, held its first in-person CSC meeting since the start of the COVID-19 pandemic at the Malaga Community Center. CSC members had the opportunity to participate in various interactive and engaging exercises to learn and provide feedback on wildfire education and outreach, the Urban Greening Program and upcoming community events related to the measure, and a research project on the implementation of AB 617 through UC Davis and the Central California Environmental Justice Network (CCEJN). Additionally, the District's mobile air monitoring van was stationed outside the community center for CSC members to tour and ask questions. To ensure for an inclusive meeting, the District arranged for Spanish interpretation, children's activities, and dinner was provided by a local business (Cultura Kitchen) for all who attended the CSC meeting. It was also an excellent opportunity for the newest CSC members to get to know their fellow CSC members, District and CARB staff, and the facilitation team members.

## **CERP IMPLEMENTATION OVERVIEW**

Since the last annual reporting period, the District has continued to work with the South Central Fresno CSC members, members of the public, businesses, local, state, and federal agencies, and other stakeholders to implement the considerable number of air quality improvement measures included in the South Central Fresno CERP. Based on a [2023 strategic prioritization exercise](#) with the CSC, the District has focused efforts on implementing the top-ranked South Central Fresno CERP Measures, as described below.

For a list of all CERP measures, including a status of implementation, see Appendix A.

**Status of CSC Top-Priority CERP Measures in South Central Fresno**

Measure Number	Rank in Category	Measure Description	Status as of 8/31/2023
<b>Community Measures</b>			
SC.1	1	Incentives for School Air Filtration	<p><b>In Progress</b> <b>Allocated Funding: \$1.5M</b></p> <ul style="list-style-type: none"> <li>• 31 contracts executed with Fresno Unified School District to purchase stand-alone air purifiers for schools within boundary</li> <li>• Fresno Unified School District working with vendor to purchase devices and District will continue to do outreach on this measure</li> <li>• <b>Expected school filtration installation: Q1 2024</b></li> </ul>
VB.1	2	Incentives for Vegetative Barriers	<p><b>Contract Awarded</b> <b>Allocated Funding: \$1M</b></p> <ul style="list-style-type: none"> <li>• Subcommittee recommended and CSC approved Vegetative Barriers application submitted to Request for Proposal (RFP)</li> <li>• District awarded CSC recommended contractor, Tree Fresno, in April 2023</li> <li>• <b>Expect planting to begin Q1 2024</b></li> </ul>
UG.1	3	Incentives for Urban Greening	<p><b>Contract Awarded</b> <b>Allocated Funding: \$1M</b></p> <ul style="list-style-type: none"> <li>• Subcommittee recommended and CSC approved Urban Greening application submitted to Request for Proposal (RFP)</li> <li>• District awarded CSC recommended contractor, Tree Fresno, and project partner Central California Environmental Justice Network in March 2023</li> <li>• <b>Expect planting to begin Q4 2023</b></li> </ul>
<b>Heavy Duty Measures</b>			
HD.11	1	Truck Reroute Study	<p><b>In Progress</b> <b>Allocated Funding: \$500K</b></p> <ul style="list-style-type: none"> <li>• City of Fresno approved contract during April 2022 City Council meeting</li> <li>• City of Fresno and contracted partners, including IBI Group and UC Merced in partnership with CSC, working on outreach plans and study to assess truck routes and associated health impacts</li> <li>• <b>Expected completion of truck reroute study: Q4 2023</b></li> </ul>
HD.1	2	Incentives for Truck Replacement	<p><b>In Progress</b> <b>Allocated Funding: \$7.5M</b></p> <ul style="list-style-type: none"> <li>• Updated CARB Moyer guidelines were adopted for District program April 2022</li> <li>• District having discussions with CSC regarding challenges of implementing measure and seeking feedback and recommendations</li> </ul>

Measure Number	Rank in Category	Measure Description	Status as of 8/31/2023
HD.7	3	Incentives for Electric School Buses	<p><b>In Progress</b> <b>Allocated Funding: \$6.4M</b></p> <ul style="list-style-type: none"> <li>CSC voted at June 2022 CSC meeting to support using funding to install school bus charging infrastructure</li> <li>Contracts executed with Fresno Unified School District to replace 6 buses with electric buses</li> <li>District working with Central Unified School District to complete applications</li> <li><b>Expected school bus purchase: Q1 2024</b></li> </ul>
<b>Land Use Measures</b>			
LU.1	1	Support Project to Reduce VMT	<p><b>In Progress</b></p> <ul style="list-style-type: none"> <li>CSC formed Land Use Subcommittee in August 2021</li> <li>District coordinating with the City regarding land use actions in the Community and will continue to provide updates to CSC at subcommittee and CSC meetings</li> </ul>
LU.5 <sup>1</sup>	2	District to Seek MOU or other Administrative Mechanism with City of Fresno	<p><b>Ongoing Discussions</b></p> <ul style="list-style-type: none"> <li>Subcommittee, District, and CSC met over several meetings since 2021 to reach agreement on administrative mechanism language</li> <li>Among many suggested changes to the City’s proposed language, land use subcommittee members expressed during the June 2022 subcommittee meeting they were not supportive of any alternative to an official MOU, such as a letter</li> <li>City of Fresno developed public noticing system to notify interested individuals when public notices are posted via email and shared with CSC during August 2023 meeting</li> <li><b>City affirmed commitment to continue collaborating with District and updating CSC on projects within AB 617 boundary</b></li> </ul>
LU.4	3	Land Use Community Participation	<p><b>In Progress</b></p> <ul style="list-style-type: none"> <li>CSC formed land use Subcommittee in August 2021</li> <li>District coordinating with the City regarding land use actions in the Community and will continue to provide updates to CSC at subcommittee and CSC meetings</li> </ul>

## EMISSIONS REDUCTION TARGET AND METRICS FOR TRACKING PROGRESS

The District and CSC included a robust set of metrics to track progress in the South Central Fresno CERP. To the maximum extent possible, the District has looked to tie emissions reductions targets to individual CERP measures. Of the 47 measures in the adopted CERP, 17 are incentives measures where the District and CSC worked to identify the number of units targeted for replacement, by year, throughout implementation of the CERP. The remaining measures, whether incentive-based, enforcement, outreach, mitigation, or a land use

<sup>1</sup> Added in CARB’s amended board resolution when CERP was adopted February 2020, not originally in District-adopted CERP

partnership, have metrics that outline the expected emissions reductions, number of planned inspection hours, scheduled meetings, or other interactions expected for the implementation of the each measure. The District continues to reassess and evaluate these metrics with the CSC as CERP implementation meetings continue. As CARB approves the District's project plans and incentive-based measure spending increases, the District will keep the CSC apprised at subscription rates for the various measures and will solicit feedback on whether funding amounts need adjusting.

The CSC has made it clear that having the ability to track and measure implementation progress in English and Spanish is very important. Towards that end, the District developed a measure tracker that is updated on a monthly basis in both English and Spanish on the top of the South Central Fresno AB 617 Community Webpage under the heading "Track South Central Fresno Progress". District staff have taken the opportunity to share the tracker with the community on multiple occasions and have taken and incorporated feedback from CSC members.

**South Central Fresno CERP Measures Tracker:**

English: <http://community.valleyair.org/fresno-tracker/>

Spanish: <http://community.valleyair.org/fresno-tracker-sp/>

## INCENTIVES MEASURES

The approved CERP includes numerous incentive-based measures identified and prioritized by the CSC. The District had been working closely with the CSC on prioritizing and implementing these measures as feasible throughout the community. These measures include a variety of projects and programs that are already approved for funding through CARB's Community Air Protection (CAP) Guidelines, including electric school bus replacement, school filtration, truck and off-road equipment replacement and alternative fuel infrastructure. The CERP also includes numerous measures that fall outside of the pre-approved program categories included in the CAP Guidelines, including lawn and garden equipment replacement, residential wood burning fireplace change out, and residential vehicle replacement.

The CAP Guidelines include a process to develop project plans to submit to CARB for approval for these new and innovative CERP incentive measures to fund utilizing available funding.

### *Project Plans*

For all incentive-based measures that require project plans under the CAP guidelines, the District has been working to draft and submit plans to CARB for review and approval. As project plans are pending and approved, the District has worked with the CSC to solicit outreach and implementation feedback for each measures. The figure below describes the status of the various CARB-required project plans as of September 15, 2023. For an updated list and to view project plans and CARB approval letters, visit the link below.

The CSC is notified, via email and during CSC meetings, as new project plans are developed and submitted to CARB for approval to be able to provide input and feedback on any requested changes, including possible changes to the recommending funding amounts. These project plans are posted on the District's Community webpage to encourage CSC comments and feedback during the process, allowing CSC members to suggest changes to incentive measure funding amounts.

The District's Fresno-specific AB 617 incentives website has a list of approved projects, submitted project plans, and guidelines for applying to the various programs: <http://community.valleyair.org/selected-communities/south-central-fresno/grants-and-incentives/>.

## Approved

Passenger Vehicle Repair

Passenger Vehicle Replace

Public Fleet Vehicles

Truck Reroute Study

Alternatives to Ag Burn

Residential Lawn & Garden

Commercial Lawn & Garden

Vegetative Barrier and  
Urban Greening

Residential Wood Burning

Truck Replacement

TRU and Yard Trucks

## Submitted

No project plans awaiting  
CARB approval

## Drafting

EV Mechanic Training

Charging for Anti-Idling

Commerical Charbroiling

## AB 617 RESIDENTS GET FREE AIR PURIFIERS

In collaboration with CSC, the District kicked off the Fresno AB 617 Clean Air Rooms Program to provide CARB-certified high-efficiency residential air filtration units to residents. Eligible first-time applicants residing within the Fresno AB 617 boundaries had the opportunity to receive a free portable air filtration unit for their homes. The District coordinated outreach both within the Fresno boundary and across the Valley, educating residents on ways to find air quality information and encouraging them to apply for the District's Clean Air Rooms program

The air purifiers distributed through the program are HEPA-rated and can reduce indoor particulate matter by over 90% in well-sealed environments. By creating a dedicated "clean air room" such as a bedroom, residents can ensure that they have a space with safe indoor air quality when smoke events occur.

To get the word out about the program, the District worked with the CSC, local community-based organizations including Central California Asthma Collaborative and Central California Environmental Justice Network, health agencies, and more to conduct program outreach and assist with applications.

### Clean Air Rooms Outreach Materials

**FREE Air Purifier!**

Available for residents in South Central Fresno!

Check eligibility and submit your application online!

Don't have internet access? Call (559) 230-5800, and staff can assist with the application over the phone.

### Incentive Measure Implementation Progress

As a result of CSC member’s prioritization of the measures and work in the Tree Subcommittee, the District awarded two \$1 million contracts to Tree Fresno for the Vegetative Barriers and Urban Greening measures in Spring 2023.

For the Urban Greening measure, Tree Fresno is partnering with the Central California Environmental Justice Network to plant 1,700 trees in the community through an “Adopt-a-Tree” program for residents to plant trees at their homes and various community tree planting projects at schools and housing sites. Tree Fresno, CCEJN, and additional project partners, Friends of Calwa and Familias en Acción, will start planting in October 2023 through April 2024. For the Vegetative Barriers program, Tree Fresno is subcontracting with the City of Fresno to plant 200 trees at two vegetative barriers sites to protect sensitive receptors and block pollution from sources of concern. Tree Fresno is working with the City of Fresno and landscapers to update plans related to these planting efforts, including determining tree species and irrigation, and will bring these updates to the CSC once available.

*“As an organization that has been working to promote Environmental Justice and health equity for 23 years, CCEJN is excited about this opportunity to make South Central Fresno greener and healthier by planting drought-tolerant trees in the areas where residents need them and want them. Until now, access to trees has been another form of disparity between the north and the south part of Fresno. We hope to begin the process to reverse this inequity and help all Frenans who want to have trees in their neighborhoods adopt trees.”*

*-Nayamin Martinez, CCEJN Executive Director & Urban Greening partner*

#### ADOPT-A-TREE PROJECT "A GREENER FRESNO"

Residents in the AB617 area can adopt a 5-gallon drought tolerant tree and help increase the tree canopy in their community!

"Tree Adopters" will receive assistance identifying the best location for planting their tree, including calling 811 & the city; & an Adoption Kit-which includes;

- Tree & Tree Stake
- Fertilizer Packets
- Tree Watering System
- "Tree Diaper"
- Bag of Compost
- Tree Planting Illustrated Instructions
- Watering Logbook & Tree Maintenance Plan
- Tree Adoption Certificate

**OCT. 1, 2023 - MAY 15, 2024**

How to Apply

- Complete an "Adoption Interest Form" either by phone, internet, or during outreach events
- Tree Fresno & CCEJN will review forms to ensure tree's health & survival, taking into consideration site appropriateness

FOR MORE INFORMATION, PLEASE CONTACT  
 NAYAMIN MARTINEZ (CCEJN) @ 559-907-2047 OR @ NAYAMIN.MARTINEZ@CCEJN.ORG

#### ADOPTA UN ÁRBOL PROYECTO "UN FRESNO MÁS VERDE"

¡Los residentes en el área AB617 pueden adoptar un árbol tolerante a la sequía de 5 galones y ayudar a aumentar el número de árboles en su comunidad!

"Adoptadores de Arboles" recibirán asistencia para identificar la mejor ubicación para plantar su árbol, incluyendo llamar al 811 y a la ciudad; y un kit de adopción

El kit de adopción incluirá:

- Árbol y estaca
- Paquetes de fertilizantes
- Sistema de riego de árboles ("pañal de árbol")
- Bolsa de composta
- Instrucciones ilustradas paso a paso de como plantar árboles correctamente
- Libro de registro de riego y plan de mantenimiento del árbol
- Certificado de adopción

**1 DE OCTUBRE DE 2023 - 15 DE MAYO DE 2024**

CÓMO APLICAR

- Complete un "Formulario de interés de adopción" ya sea por teléfono, Internet o durante eventos comunitarios
- Tree Fresno y CCEJN revisarán los formularios para garantizar la salud y supervivencia del árbol, teniendo en cuenta que el sitio donde se plantara el árbol es el ideal.

PARA OBTENER MÁS INFORMACIÓN, COMUNIQUESE CON NAYAMIN MARTINEZ (CCEJN) AL 559-907-2047 O AL NAYAMIN.MARTINEZ@CCEJN.ORG

During the June 2022 CSC meeting, CSC members supported increasing the incentive amount in the Passenger Vehicle Replacement program to up to \$20,000 per vehicle for the replacement of a gas-powered vehicle for a new or used plug-in hybrid or electric vehicle. Following this recommendation, CARB approved project plans for both the Passenger Vehicle Repair and Replace programs in August 2023 and the District Governing Board approved the project plans and CSC recommendation for the increased incentive amount in the Passenger

Vehicle Replacement program in September 2023. In the coming months, the District will work with the CSC and program partners on program outreach and implementation. As a result of this recommendation from the CSC, community residents will experience reduced barriers to participate in the program that assists them in the transition to zero and near zero-emission technology.

*Community Recommendations on Incentives Program Implementation*

To ensure successful and community-centered implementation of the incentive-based measures, the District provides updates to the CSC on the implementation budget on a biannual basis. This allows CSC members the opportunity to provide important feedback and recommendations on how to move forward with implementing their CERP measures. In some cases, we have found measures that are no longer feasible as originally aspired to in CERP development.

Throughout the CERP implementation process, the District has worked closely with the CSC to assess interest, understand evolving priorities, and support reallocating funding, as described below. These CSC-recommended adjustments were made through a transparent public process, during CSC meetings and in line with the governance structure laid out in the community charter.

CERP Measure	Status	Original Funding	Updated Funding
Locomotive Replacement	Few interested project partners, moved some funding to other measures	\$5M	\$2.8M
Residential Air Filtration	CSC interested in supporting new measure for residents	Not in CERP	\$1M
Urban Greening	CSC interested in funding the previously unfunded measure to increase interest in program	\$0	\$1M
Fireplace Replacement	CSC interested in increasing incentive to cover total cost of replacement (from \$3K to \$4K)	\$1.5M	\$2M

The District is continuing to work closely with the CSC by providing regular updates on incentive measure implementation progress and to seek recommendations and feedback when there are issues in specific areas and programs of interest to the community.

The status of all CERP incentives measures to date are described in appendix A.

**OUTREACH AND MITIGATION MEASURES**

The District’s Outreach and Communications team conducts multilingual air quality outreach throughout all eight counties of the San Joaquin Valley. The District coordinates events, delivers presentations, responds to the media 24/7, manages social networks, executes outreach campaigns like Healthy Air Living (HAL) Schools and Residential Wood smoke Reduction programs, and connects with the public in multiple languages across any medium.

The Community Air Quality Outreach Strategy adopted as a part of the South Central Fresno CERP was developed with the CSC to respond to the community-specific concerns and go beyond current outreach efforts. From community town hall events and workshops to billboards and in-store signage, the District and CSC outlined plans to deliver air quality education and clean air funding to the South Central Fresno AB 617 community. This

includes using traditional media like radio, TV, billboards and print; digital media like Search Engine Marketing (SEM); and social media both through paid campaigns and organic posting to engage the community.

Working with the CSC over the past year, the District shared information in English and Spanish with the South Central Fresno community in a variety of ways, including:

- Posting billboards reminding the public not to burn trash
- Arranging social media ads pointing the public to air quality tools
- Radio, social media and carteles campaign inviting businesses and the community to replace residential or commercial gas powered yard care equipment with electric
- Advertising the opportunity to eliminate residential wood burning through Fireplace and Woodstove Change-Out Program
- Frequent reminders of how to protect themselves during episodes of poor air quality

### *South Central Fresno School Outreach*

Additionally, the District worked with the CSC to develop a fall outreach plan, specifically identifying schools within the boundary at which to pass out information about not idling, incentive programs, protecting themselves from wildfire smoke impacts, and engaging with the AB 617 process. Utilizing the back-to-school season to maximize contact and conversations with parents, District staff distributed more than 1,000 informational packets at 10 school campuses during drop off and dismissal times as well as at fall events, such as carnivals, festivals and food distributions. The District continues to engage with schools within the boundary and more outreach events are planned.

### *South Central Fresno Show-and-Tell Event*

In March 2023, the CSC and District coordinated an in-person “Show-and-Tell” event at the Malaga Community Recreation Center to help educate local residents on the benefits of cleaner home heating. During the event, attendees from the Fresno area visited tables where hearth retailers were waiting to answer fireplace questions, show examples of gas inserts, and discuss the various cleaner options to change-out wood- or pellet-burning devices to heat a home. District staff were also on hand to help residents who were ready to start their Fireplace

& Woodstove Change-Out application and answer questions about the program. Approved Fresno applicants received a voucher worth up to \$5,000 toward the purchase of a new gas or electric residential heating device.

## COMPLIANCE AND ENFORCEMENT MEASURES

During the development of the South Central Fresno CERP, CSC members identified several primary sources of concern within the community. Based on the analysis of the District’s enforcement history within the AB 617 community, several focused enforcement and compliance assistance measures were included in the CERP aimed at enhancing enforcement and education efforts through existing District enforcement programs to address those areas of community concern discussed below. In addition to the implementation of the enforcement measures adopted in the CERP, the District’s Compliance Department has continued over the past year to promptly respond to public air pollution complaints in the community.

Number of Permitted Facilities
361

Inspection Types	Number of Inspections
Breakdown/Deviation Investigation	18
Follow-Up/Compliance Verification Inspection	6
Multi-Day, Ongoing Inspection	17
One Day/First Day of Multi-Day Inspection	311
Source Test Observation	36
Standalone Startup Inspection	1
<b>Grand Total</b>	<b>389</b>

Complaint Types	Number of Complaints
Asbestos	1
Commercial/Industrial Open Burning	1
Fugitive Dust	5
Odor Nuisance	8
Other	8

Residential Fireplace / Outdoor Wood Burning Device	15
Residential Open Burning	23
Visible Emissions From Equipment	4
<b>Grand Total</b>	<b>65</b>

Notice Types	Number of Notices
Notice of Violation	150
Notice to Comply	11
Record of Correction Action Taken	1
<b>Grand Total</b>	<b>162</b>

A complete summary of complaints received and enforcement actions taken over the past year is attached to this report as Appendix B.

### *Enhanced Enforcement of Wood Burning Curtailments*

To limit the potential for localized PM2.5 impacts associated with the failure to comply with mandatory episodic wood burning curtailments under District Rule 4901, the District optimizes rule effectiveness to reduce the public health impact of wood smoke, the District dedicates extensive staffing resources to operate a robust Rule 4901 enforcement program covering all aspects of the rule. The District’s strategy focuses on both compliance assistance and enforcement activities. On all curtailment days, the District dedicates significant staffing resources to conducting surveillance in neighborhoods and responding to complaints from members of the public to ensure compliance with the rule. The District treats fireplace surveillance and complaint response as the highest priority enforcement activity.

To address the community concern of residential wood burning, the District conducted expanded residential wood burning surveillance within the 617 community on each "No Burning Unless Registered" and "No Burning for All" day declared (4 hours of surveillance per day) during the 2022-23 wood-burning curtailment season (November 1 to February 28).

### *Enhanced Enforcement to Reduce Illegal Burning of Residential Waste*

To limit the potential for localized PM2.5 and toxic impacts associated with the illegal open burning of residential waste and to address the community concerns in regards to illegal burning, the District conducted targeted surveillance during each quarter to enforce the residential open burning prohibitions in District Rule 4103 and Title 17, California Code of Regulations, Section 93113 within the community.

### *Enhanced Enforcement of Regulation VIII Fugitive Dust Requirements*

District rules limit fugitive dust emissions from construction, demolition, and earthmoving; bulk material storage; open areas; and unpaved roads and vehicle/equipment traffic areas. Furthermore, District rules restrict carryout and trackout onto paved public roadways. In order to facilitate enforcement of fugitive dust prohibitions, a Construction Notification or Dust Control Plan is required for all construction activities in the District involving one or more acre of disturbed surface area.

To address the community concern of construction/earthmoving dust emissions, the District conducted inspections of construction sites within the community with active Dust Control Plans or Construction Notifications pursuant to District Rule 8021 to enforce the fugitive dust emission standards contained within District Regulation VIII. Additionally, the District also conducted general area surveillance for other potential sources of fugitive dust in the community.

### *Enhanced Enforcement of Statewide Anti-Idling Regulation*

To address the community concern of heavy-duty trucks and to limit the potential for localized PM2.5 and toxic air quality impacts associated with the failure to comply with the state's heavy duty anti-idling regulation, the District staff performed quarterly anti-idling surveillance. Locations where surveillance was conducted were based on CSC input provided to the District and CARB. To ensure District staff continue focusing in the areas where residents are being impacted, the District has included discussions in CSC meetings to provide updates on these efforts and to receive CSC feedback on areas to be focused on while doing surveillance, and will continue to do so moving forward. District staff also spoke directly to businesses who rely on heavy-duty trucking, identified by the CSC, to provide compliance assistance and education regarding the state's anti-idling Airborne Toxic Control Measure requirements and steps to be taken to ensure compliance. Although only one violation was discovered during the surveillance performed, the District believes that the outreach provided to businesses in community will contribute to increased compliance with the state's requirements.

### *Enhanced Inspection Frequency of Stationary Sources*

The District conducts inspections and investigations of both permitted sources to determine compliance with a multitude of health-protective local, state, and federal air quality regulations targeting both criteria and toxic pollutants. These include (1) District rules and permit requirements; (2) statewide Airborne Toxic Control Measures; (3) statewide greenhouse gas regulations; and (4) federal New Source Performance Standards, National Emission Standards for Hazardous Air Pollutants, and Maximum Available Control Technology standards. The District closely monitors such sources and strictly enforces applicable requirements. Compliance evaluations are unannounced whenever possible and involve both a physical inspection of the facility and a review of operating and monitoring records.

To address the community concern of industrial processes as well as agricultural operations and other permitted sources of air pollution, the District reviewed the enforcement history of all permitted facilities in the community, and for each facility having an emissions violation within the last three years, the District committed to performing inspections of these facilities at least twice per calendar year for the next five years or until the facility has four consecutive inspections without an emission violation, whichever comes first. District staff has fully implemented this measure and increased inspections of these facilities is ongoing.

### *Pilot Training Program for Conducting Self-Inspections at Gas Stations*

The District has developed the training program, however, due to the COVID-19 pandemic and the close one-on-one interaction needed to train gas station owners/operators on conducting more thorough, hands-on vapor recovery system inspections, training was postponed until such a time that the training could be provided while ensuring the safety of District and facility staff. The District began conducting this training for gas station operators in Summer 2021. While we have provided training to all interested facilities, District staff continue to offer it to gas station dispensing facilities in the community to ensure new operators and employees interested in the training benefit from the opportunity. Year-to-date updates for each enforcement CERP measure are described in Appendix B.

## **DISTRICT REGULATORY MEASURES**

During CERP development, and throughout implementation, the South Central Fresno community has placed a high priority on reducing PM2.5 and toxic air contaminant emissions that originate from industrial sources in and around the community. Beyond the stringent regulations and permitting requirements that are already implemented Valley-wide, the District worked with the CSC to incorporate and implement additional CERP regulatory strategies pertaining to stationary sources. Two of the measures describe stationary source regulatory actions in detail, including evaluation of BARCT requirements for rules that apply to Cap and Trade Facilities; and evaluation of rules to determine whether additional reductions are possible for sources of NOx and PM2.5. Both

measures specifically list several rules that are scheduled to be evaluated in coordination with the CSC throughout the life of the CERP and are discussed more below. CARB’s Board took additional action during the approval hearing to support the District and CARB’s commitments to conduct reviews of stationary and mobile source rules and discuss permitting and rule-making processes, in a transparent and expeditious manner. Towards this end, the District has prioritized CSC discussion and community input on the District’s regulatory review and has been providing opportunities for the CSC and community members to provide feedback as part of the rule development process, including email notifications of upcoming workshops, updates during steering committee meetings, and one-on-one conversations with steering committee members.

To address CSC concerns regarding progress towards updating rules and regulations affecting sources of concern in the community, the District presented a detailed rule development schedule during the July 2020 steering committee meeting and have implemented a process to notify CSC members of all rule development processes so they can participate and provide valuable input into the process. The CSC has identified primary sources of concern and the District has prioritized rule development on rules that these facilities are subject to, specifically the glass melting furnaces, solid fuel-fired boilers (biomass boilers), and petroleum bulk storage. These rules were amended in 2021, as described in the table below. During the rule amendment process, dates and timeframes that stationary sources including compliance dates are established as part of the process. CSC members will be provided be able to fully participate in the rule development process and their insight will not only be welcomed but encouraged through advance notice of public meetings and will be an excellent opportunity for them to provide their knowledge and experience in helping to develop these rules.

### *PM2.5 Plan Rule Updates*

District staff have continued moving forward with technical evaluation and public engagement efforts for scheduled regulatory measures, with several District rules scheduled for proposed amendments in the 2021-22 timeframe. Emissions reductions achieved through the implementation of more stringent limits potentially required through these rule amendments will further contribute to reduced exposure to air pollution in the community. CSC members, members of the AB 617-selected community, and the general public are encouraged to be involved in the upcoming rulemaking process for these rules.

Rule	Stationary/Area Source Category	Rule Development Status
4901	Wood burning fireplaces and heaters	Rule Amended June 20, 2019
4311	Flares	Rules amended December 17, 2020
4306 & 4320	Boilers, steam generators, and process heaters	
4702	Internal combustion engines	Rule amended August 19, 2021
4692	Under-fired charbroilers at commercial restaurants	Rule amendment evaluation ongoing
4354	Glass Melting Furnaces	Rule amended December 16, 2021
4352	Solid-Fuel Fired Boilers	Rule amended December 16, 2021

### *Best Available Retrofit Control Technology (BARCT)*

AB 617 required districts that are in nonattainment for one or more air pollutants to adopt expedited schedules by January 2019 for the implementation of Best Available Retrofit Control Technology (BARCT). Significant work was necessary to demonstrate that existing rules met BARCT requirements or, where it was not clear that BARCT requirements were met, identify potential gaps in the existing rules, establish a rule-review schedule, and take the schedule to the District’s Governing Board for approval before the deadline. The Board adopted the District’s

Draft 2023 South Central Fresno Community Emissions Reduction Program Annual Report

BARCT Analysis Schedule on December 20, 2018. The District is now implementing the plan, and, where necessary, develop rule amendments consistent with state BARCT requirements. The District must also share its findings with the state as CARB compiles the BARCT clearinghouse.

District's expedited BARCT Schedule: <http://community.valleyair.org/best-available-retrofit-control-technology-barct>

Since 2019, the District began performing a further BARCT analysis of 15 of the 16 rules identified, typically in the order of documented priority. Each District rule and source category is evaluated in comparison to federal and state air quality regulations and the regulations of other air districts in California and throughout the country.

The District held a public workshop on April 20, 2021 and provided a update to the public on the progress the District has made on the BARCT evaluations for 4 rules conducted in 2020 (see published report – [link](#)) and discussed the next steps associated with further evaluating the remaining District Rules for satisfying BARCT requirements. The following table summarizes the status of the BARCT rule evaluations.

Rule	Title	BARCT Status
4454	Refinery Process Unit Turnaround	Meets BARCT
4641	Cutback, Slow Cure, And Emulsified Asphalt, Paving And Maintenance Operations	Meets BARCT
4104	Reduction of Animal Matter	Meets BARCT
4409	Components at Light Crude Oil Production Facilities, Natural Gas Production Facilities, and Natural Gas Processing Facilities	Rule amended June 15, 2023
4455	Components at Petroleum Refineries, Gas Liquids Processing Facilities, and Chemical Plants	Rule amended June 15, 2023
4623	Storage of Organic Liquids	Rule amended June 15, 2023
4624	Transfer of Organic Liquids	Rule amended June 15, 2023
4401	Steam-Enhanced Crude Oil Production Wells	Rule amended June 15, 2023
4702	Internal Combustion Engines (VOC only)	Rule amended August 19, 2021
4694	Wine Fermentation and Storage Tanks	Removed from Expedited BARCT Schedule
4603	Surface Coating of Metal Parts and Products, Plastic Parts and Products, and Pleasure Crafts	Meets BARCT
4601	Architectural Coatings	BARCT Rule Adopted April 16, 2020
4566	Organic Material Composting Operations	Removed from Expedited BARCT Schedule
4625	Wastewater Separators	Meets BARCT
4621	Gasoline Transfer Into Stationary Storage Containers, Delivery Vessels, and Bulk Plant	Removed from Expedited BARCT Schedule
4402	Crude Oil Production Sumps	BARCT evaluation scheduled for 2023 completion

The District is also working with the affected facilities to identify the potential control options that may result in additional emissions reductions. The affected facilities are providing the District with technical information and costs related to potential control options to determine the feasibility of implementing each option identified.

### *Technology Clearinghouse*

AB 617 requires CARB to establish and maintain a statewide clearinghouse that identifies the best available control technology, best available retrofit control technology for criteria air pollutants, and related technologies for the control of TACs.

Since 2019, District staff have been participating in bi-weekly conference calls with CARB and other air district staff to discuss the proposed changes to the statewide clearinghouse and the new database and website interface that CARB and their programming consultant is creating. Through collaborative discussions, the District has provided input on facility and pollutant definitions; source category, subcategory, and classification differences; public usability and device specificity; and many other topics. To date, CARB has published an initial Technology Clearinghouse webpage ([link](#)) and has published, the following prototype tools to support public needs while the remainder of the Technology Clearinghouse system is developed:

- Next Generation Technology (Released November 2019) - [Emergency Back-up Power Options for Residential Applications](#)
- Rules (Released March 2020) - [Current Air District Rules Tool](#)
- Next Generation Technology (Released June 2020) - [Emergency Back-up Power Options for Commercial Applications](#)

Additional meetings have been scheduled and significant work and testing of the new database, tools, and website is still being performed.

### *AB 2588 Air Toxic Hot Spots*

The District's integrated air toxics program fulfills the state AB 2588, California Air Toxics Hot Spots, mandates, which are aimed at quantifying and assessing localized health risk, notifying affected residents, and reducing risk from facilities with high risk caused by air toxic emissions. The state Hot Spots Act is only one part of the District's comprehensive program to regulate air toxics in Valley communities. To achieve maximum efficiency and effectiveness, the District operates an integrated air toxics program that implements local, state, and federal mandates.

Since 2021, the District has been implementing a plan designed to expedite the assessment of the health risk associated with each of the facilities located in South Central Fresno. To date, the District has assessed the health risk for 352 facilities within the Community and none of the facilities that have been assessed pose a significant health risk.

The District has a summary of the expedited facility risk assessment and risk reduction under the implementation of AB 2588: <https://community.valleyair.org/fresno-ab2588/>.

### *Implementation of New Criteria and Toxics Report (CTR) Regulation*

Under AB 617, CARB is tasked with developing a uniform statewide system for reporting inventories for criteria and air toxic emissions for stationary sources to the public. The uniform statewide system is currently under development. The state's *Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants* went into effect on January 1, 2020. This regulation requires certain facilities to report their criteria and toxic emissions to the District annually starting with the 2019 emissions year.

## LAND USE MEASURES

During CERP development, and throughout implementation, the South Central Fresno community has expressed concerns regarding air pollution emission from heavy-duty trucks and other impacts associated with industrial development, as well as planned industrial development, specifically distribution centers planned for under the City of Fresno South Industrial Priority Area Specific Plan. With respect to new development, concerns include potential increased exposure to emissions for residents that live near heavy-duty trucking corridors and major thoroughfares in the community.

To address community member concerns, several community-identified measures were included in the CERP that focused on strategies to reducing emissions and exposure from heavy-duty vehicles operating in the community as well as strategies to ensure that air quality impacts and mitigation are considered in all land use decisions within the community boundaries.

The District is facilitating discussions with the City regarding enhancing the coordination between both agencies and establishing administrative procedures aimed at further strengthening the District's engagement on California Environmental Quality Act (CEQA) project commenting and review process. These efforts are designed to create opportunities to further the discussion with the District, the City, the CSC, and interested public members (especially impacted residents), regarding potential air quality impacts. For instance, the District has recommended additional air quality mitigation measures to reduce emissions and potential health risks associated with proposed development projects. Additionally, the City committed to, and has been including the District in the City's pre-application process, which includes written comments and/or attendance at Development Review Committee meetings for projects that will result in construction within the AB 617 area.

The District and the City have provided training and resources to the CSC on opportunities to review and comment on developmental projects that are taking place in the community in regards to CEQA, including the City of Fresno providing the CSC training on their Fresno Accelerated Application System to Electronic reviews (FAASTER), which is a public portal designed to provide information related to CEQA and developmental projects. The District continues to look for opportunities for public input on land-use decisions, provide additional public access and education regarding permitting and CEQA process, better communicate and understand air quality impacts and potential mitigation, and working together to identify and seek additional air quality improvement opportunities.

The District established a land use subcommittee to collaborate more closely with the CSC and the City of Fresno on the CARB-identified measure to seek to develop a Memorandum of Understanding (MOU) or other appropriate mechanism to strengthen the working relationship between the agencies regarding air quality impacts resulting from land use and transportation matters. The District and CSC have come together over several subcommittee meetings with the City of Fresno to develop and refine the MOU or other administrative mechanism.

For the subcommittee discussions, the City prepared language in the form of a letter, as an administrative mechanism outside of an MOU, to the District describing the various ways that were committed to and have begun implementation to strengthen the working relationship between the District and the City in coordinating specifically on projects within the AB 617 community. Among many suggested changes to the City's proposed language, some of which the City made and iterated on throughout the past year, the land use subcommittee members expressed during the June 2022 subcommittee meeting they were not supportive of any alternative to an official MOU, such as a letter. However, in this discussion, the City affirmed its commitment to continue to implement the actions to strengthen the working relationship and the District. Towards that end, the District and the City will continue to collaborate and update the CSC on projects within the AB 617 boundary.

## Public Noticing System

During discussions regarding a Memorandum of Understanding between the City of Fresno and the District, a main desire shared by CSC members was the ability to stay up-to-date and involved in planning projects that impact the AB 617 community. To address CSC member's desire for transparency in land use projects impacting the AB 617 community and for opportunities for the public to provide comments on these projects, the City of Fresno developed a public noticing system to notify interested individuals when public notices are posted. CSC members were provided instructions on how to sign up to receive the email that summarizes the posted public notices, including environmental studies, public hearings and project pre- and post-approval. Each notice contains information on the project, how the public can participate in the process and provides a point of contact, including information on how Spanish language speakers can participate. This information was shared with the CSC during the August 2023 CSC meeting and the District will continue to work with the City of Fresno to provide relevant land use updates to the CSC.

Good Afternoon,

New Planning notices have been posted (please see below). Notices can also be viewed at <https://www.fresno.gov/cityclerk/notices-and-publications/>.

(Document links below)

[7-24-23 Notice of Action Granting Development Permit Application No. P22-04122](#)

[7-21-2023 Notice of Public Hearing P22-04877](#)

[2023-07-21 Notice of Intent to Adopt a Mitigated Negative Declaration Environmental Assessment for Development Permit Application No. P21-01833](#)

You are receiving this email because you have requested to receive notices pursuant to Government Code §54954.1, Public Resources Code §21092.2, California Code of Regulations §15072, §15082, §15087, and/or Fresno Municipal Code §15-5009.B. To be removed from the noticing list, please contact [Planning@fresno.gov](mailto:Planning@fresno.gov).

CITY OF FRESNO  
PLANNING AND DEVELOPMENT DEPARTMENT  
**NOTICE OF ACTION GRANTING  
DEVELOPMENT PERMIT APPLICATION NO. P22-04122 & RELATED ENVIRONMENTAL  
ASSESSMENT**

NOTICE IS HEREBY GIVEN that the Planning and Development Department Director, in accordance with Fresno Municipal Code (FMC) Section 15-5009, has approved Development Permit Application No. P22-04122 and Environmental Assessment No. P22-04122 filed by Living Spaces, pertaining to an 8-acre property located at 7354 North Abby Street, on the east side of North Abby Street, south of East Minarets Avenue. The applicant requests authorization to construct an approximately 104,867 sq. ft. furniture showroom, including on- and off-site improvements including but not limited to parking, landscape, sidewalks, and a trash enclosure. The project also includes a determination that the proposed project is a subsequent project that is not fully within the scope of the PEIR, as provided by the CEQA, as codified in the Public Resources Code Section 21157.1(d) and the CEQA Guidelines Section 15177(c). The property is zoned CR/UGM/cz (Commercial – Regional/Urban Growth Management/conditions of zoning). The special permit has been granted subject to compliance with the Conditions of Approval, dated July 24, 2023.\*

\*This document is available for review at the Planning and Development Department, located at 2600 Fresno Street, 3<sup>rd</sup> Floor, Fresno, California 93721. Documents are available for viewing at City Hall during normal business hours (Monday-Friday, 8 a.m.-5 p.m.) by appointment only. Please contact the Planner listed below via e-mail or by phone to request electronic copies or schedule an appointment to view documents.

### *Truck Rerouting as a Priority Measure*

In prioritizing measures for implementation, the CSC was eager to move forward on the truck rerouting commitment. As such, the District formed a truck rerouting subcommittee, which is comprised of interested CSC members and provides support to the City of Fresno as they fulfill their CERP commitment to study existing and future planned routes within the South Central Fresno boundary and determine whether potential alternative routes would support the goals of the AB 617 program to reduce community exposure to air pollution from local sources.

Throughout the project, the City of Fresno staff have provided project management services and lead technical and community working groups to discuss the scope and progress of the study, including the formation of the the Community Advisory Group (CAG) and Technical Steering Committee (TSC). To date, each working group has met a total of four times to discuss and provide feedback on aspects of the study, including community outreach and engagement and the development of an Existing Conditions and a National Best Practices for Accommodating Trucks reports. The City of Fresno anticipates the project to be completed in 18 months and the District will continue to work with the City and project contractors to bring updates to the CSC.

### **TRUCK REROUTE STUDY UNDERWAY**

Given that over 85% of criteria pollutants and the majority of toxics emissions in the South Central Fresno region come from mobile sources, including on-road heavy-duty diesel trucks, the highest priority concern outlined by the community throughout the Community Air Protection Program process was a need to assess the impacts of heavy-duty trucks in South Central Fresno.

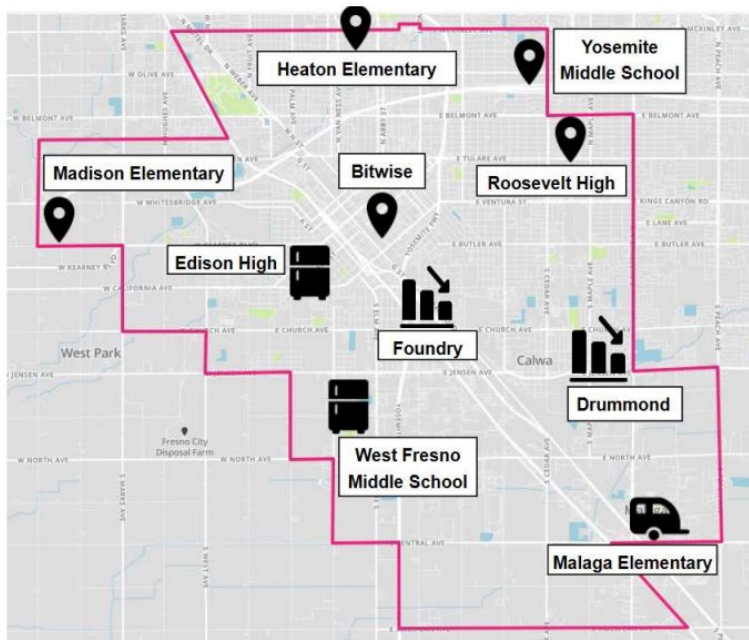

In April 2022, the Fresno City Council approved the study to assess heavy-duty truck routes and associated health impacts on nearby resident in the South Central Fresno AB 617 community. The approved study is being conducted in partnership with the Valley Air District, UC Merced health researchers, and other study partners to assess truck routes and associated health impacts to the community.

## **COMMUNITY AIR MONITORING IMPLEMENTATION**

The District worked with the South Central Fresno CSC to develop and deploy a community air monitoring plan consists capable of proving real-time air quality information to the community.

Throughout the past year, the District continued to engage the South Central Fresno CSC to provide updates to the community regarding air quality data and solicit further recommendations for new monitoring sites if deployment issues arise. Consistent with the community recommended CAMP design, air monitoring systems have been fully implemented in all locations describe in the following figure.

## Air Monitoring Locations in South Central Fresno

	<b>PM2.5 Monitor</b>		<b>Compact System:</b> PM2.5, Black Carbon, Ozone, BTEX, NOx, & VOC, CO (Edison), SO2 (West Fresno)
	<b>Regulatory Air Monitor:</b> Foundry (PM2.5), Drummond (Ozone, NO2, PM10)		<b>Trailer:</b> PM2.5, Black Carbon, Ozone, CO, NO2/NO, H2S/SO2, BTEX & Toxics
	<b>Mobile Monitoring Van:</b> respond to community concern		

### Community Air Monitoring to Date

The District and CSC members have spent considerable efforts to fully implement and deploy the community air monitoring equipment as part of the CAMP and providing that data in real-time online and providing regular updates. Real-time information, including the interactive map in the figure below, can be found at:

<http://community.valleyair.org/selected-communities/south-central-fresno/community-air-monitoring/>

### Interactive Map of Community Air Monitoring in South Central Fresno

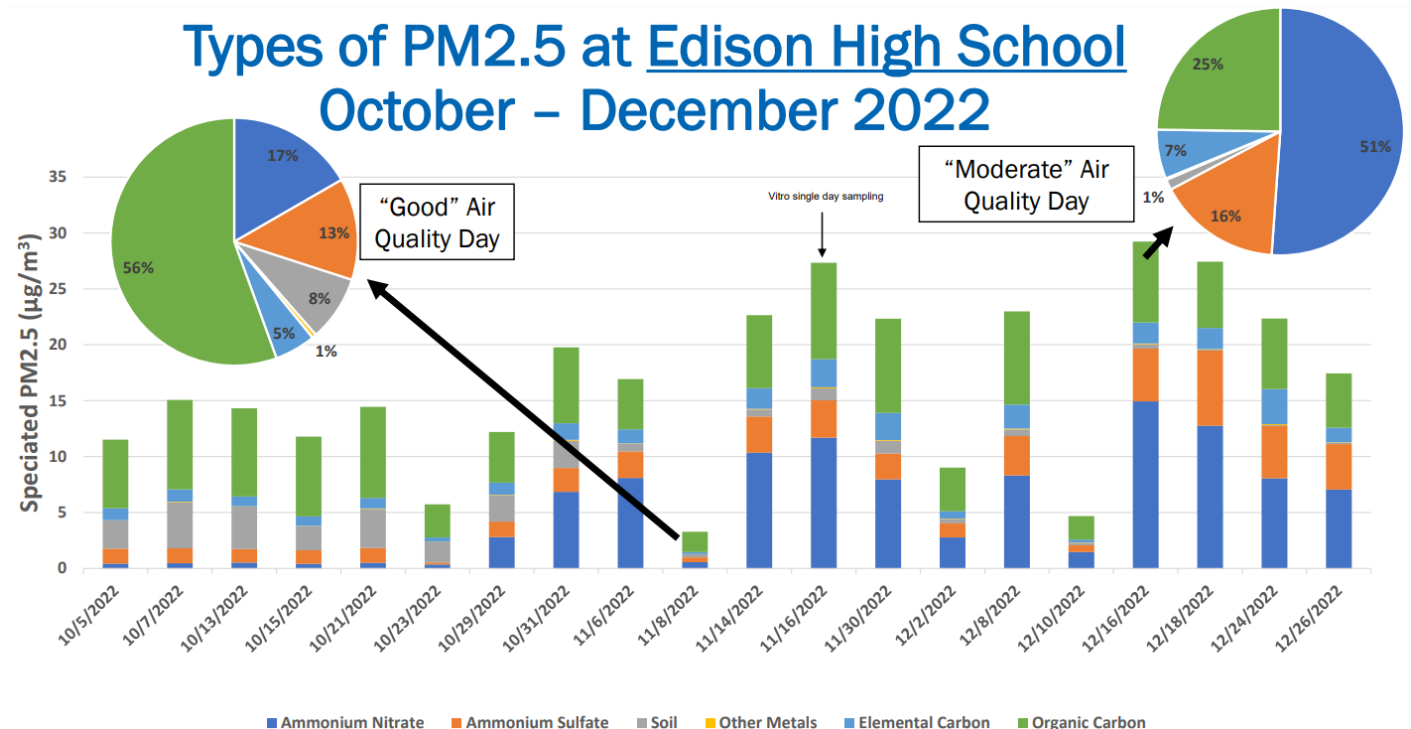

CAMP implementation has included researching, developing, configuring, deploying, trouble-shooting, and maintaining new state-of-the-art high precision air monitoring equipment. This also includes the use of the mobile air monitoring van to take measurements in a variety of locations of interest and to respond to community concerns. The van has been used to collect air quality data from sources identified by CSC members, see picture below.

### Special Project and Analysis

The District has also contracted with analytical laboratories to conduct the needed analysis to speciate the VOC and PM2.5 samples being taken in the community. In addition, the District has worked closely with organizations to negotiate leases to authorize the deployment of the equipment on site, followed by logistical, electrical, and site preparation work for the installation of the air monitoring equipment.

Additionally, the District monitoring team has responded to community concerns throughout the boundary by deploying specialized monitoring equipment to capture and understand unusual readings from PM2.5 monitors. For example, on March 11, 2022, VOC and PM2.5 speciation air monitoring efforts were shifted to the air monitoring trailer at Edison High School based on community and District analysis of high PM2.5 readings throughout the winter season. The collected samples were sent to a third-party laboratory for analysis to determine the contribution of various species of PM2.5, as well as the various species of VOCs in the air sampled in the community. Results showed no significant species difference compared to other areas of the community.

As a follow up to these District and CSC concerns, ahead of the 2022-23 winter season, the District began specific testing in October 2022 for a compound called “levoglucosan” that can indicate whether PM2.5 collected came from wood burning. During this testing, on several days, the marker for wood burning (levoglucosan) was higher than average, indicating wood burning (including residential or illegal open burning) was occurring. Furthermore, during Quarter 3 2022 (October-December), ammonium nitrate was the main reason for PM2.5 during wintertime, which is generally a result of mobile sources (Figure 1).

**Figure 1:** Graph showing types of PM 2.5 during Q4 2022 from air monitoring presentation given during July 2022 CSC meeting

As a result of data collected through the community air monitoring network, the District also conducted enhanced surveillance and enforcement in an effort to understand causes of high PM2.5 (Figure 2). When data shows air quality is poor, air quality inspectors regularly go to areas of concern to determine potential causes and conduct enhanced surveillance on “no burn” days. The District also responds to any community complaints and concerns and issues citations when needed.

Figure 2: Surveillance route taken by an Air Quality Inspector from 6-8AM on December 15, 2022

The District has been providing detailed, regular air monitoring updates to the South Central Fresno CSC. To ensure that the community is fully apprised of the ongoing air monitoring efforts and are receiving the latest air quality information, bilingual weekly updates, comprehensive quarterly reports, and real-time air quality information about the community air monitoring efforts in South Central Fresno are all posted on the community webpage:

<http://community.valleyair.org/selected-communities/south-central-fresno/community-air-monitoring/>

## HEALTH IMPACTS OF LOCAL AIR POLLUTION

As discussed in CARB’s Blueprint, a core focus on achieving emissions reductions and tracking ongoing progress is needed to address public health risks that may be caused by air pollution exposure. Consideration of public health includes taking health risks into account in identifying and selecting emissions reduction strategies, evaluating health risks in the context of newly acquired air monitoring information, as well as exploring ways to better understand data on community health and its potential relationship to past or ongoing pollutant exposure. In the Blueprint, CARB recognizes that individual and community health is influenced by many factors including exposure to other environmental hazards (e.g., drinking water contaminants, tobacco smoke), individual level vulnerability (e.g., diet, genetic factors), as well as structural determinants of health such as neighborhood poverty, racial/ethnic segregation, violence, access to food and health care, and lack of green space.

Towards this end, the District has gathered some baseline data in the South Central Fresno AB 617 Community in Appendix G of the CERP and will continue to work with the Steering Committee, OEHHA, CARB, and health researchers to track and support local research efforts to understand the public health impacts of local and regional emissions reduction efforts.

### Tracking Recent Research Efforts

Several recent community-facing public health impact studies have focused their efforts on AB 617, with a focus on tracking public health outcomes of emissions and exposure reduction measures like those in the South Central Fresno CERP. As the community members engage and collaborate with researchers on these studies, the District is committed to tracking, updating, and including the CSC and broader community on study methodologies and outcomes. The South Central Fresno CSC has heard updates on several study efforts in the past year. The below list of recent research efforts in the South Central Fresno community that will continue to help drive the conversation between the CSC and agencies about the effectiveness of these CERP and CAMP efforts.

Study	Description	Collaborators	Location(s)	Anticipated Completion
Participatory Assessment of Health Equity Impacts Through the Implementation of the <a href="#">Community Air Monitoring and Management</a>	Track and assess the environmental and health impacts of the CERP implementation process in AB 617 communities, to inform strategies that improve the well-being of the most disadvantaged communities in California	Nayamin Martinez (CCEJN), UC Merced, UC Davis	-Fresno -Shafter	Fall 2023
San Joaquin Valley Pollution and Health Environmental Research ( <a href="#">SPHERE</a> )	-Address knowledge gaps in environmental exposure -Examine determinants of exposure -Evaluate potential human health risks in relation to exposures -Support actionable steps to improve air quality	UC Berkeley, UC Merced, UCSF, Little Manila Rising, Central California Asthma Collaborative (CCAC), CARB, OEHHA, CDPH	-Stockton -Fresno <i>-potentially others</i>	Spring 2024
San Joaquin Valley Center for Community Air Assessment and Injustice Reduction ( <a href="#">SJV CC-AIR</a> )	-Launch a mobile air quality laboratory and health assessment clinic -Deploy community air quality monitoring 125 new PurpleAir sensors -Establish a permanent community-university air quality research and clinical center at UC Merced	UC Merced, Little Manila Rising, Fresno County DPH	-Stockton -Fresno	2025
Filtration for Respiratory Exposure to wildfire Smoke from Swamp Cooler Air ( <a href="#">FRESSCA</a> )	Reduce wildfire smoke exposures and health risks among agricultural workers and other low-income families by designing and field testing an affordable and effective filtration system for rooftop evaporative coolers	UCSF, PHI, CDPH, Central California Environmental Justice Network (CCEJN)	-SJ Valley -Fresno	Fall 2024

# APPENDIX B

## Enforcement Plan Update

# 2023 Enforcement Report

## Updates to Enforcement Plan Attachments

South Central Fresno AB 617 Community

San Joaquin Valley Air Pollution Control District

# Enforcement Plan

## List of Permitted Facilities

The Valley Air District has some of the most stringent regulations in the country for limiting emissions from businesses and other stationary sources of air contaminants. There are numerous types of equipment as well as industrial and commercial processes that require a Permit to Operate with the District. The following is a current listing of all facilities located within the South Central Fresno Community which have active Permits to Operate with the District as of June 2023. A previous listing was provided in [Appendix F](#) of the South Central Fresno Community Emissions Reduction Program (CERP) and in the [2022 Annual Report](#).

## Enforcement Plan Facility Inspections

Facilities that have permits with the Valley Air District are inspected on a regular basis by District Compliance staff to ensure all permit requirements are being followed. New and modified equipment is also inspected before commencing operation. District inspection staff also observes stack emission testing (known as source testing) for certain types of equipment to ensure that proper testing procedures and protocols are followed by the third-party testing company. They also conduct inspections when unforeseen equipment breakdowns occur which may affect a facility's ability to comply with all permit requirements.

In addition to the numerous inspections already conducted by the District each year at permitted facilities throughout the valley, the District committed in the South Central Fresno CERP to increase the frequency of periodic compliance inspections to once every six months at facilities that have had an emissions related violation within the last three years. The following is a listing of all District inspection activities at permitted facilities within the South Central Fresno Community from July 2022 through June 2023. A previous listing of inspections can be found in [Appendix F](#) of the South Central Fresno CERP and in the [2022 Annual Report](#).

## Enforcement Plan Summary of Complaints

District inspectors respond to approximately 3,000 public air pollution complaints District-wide each year. Some complaints are related to permitted facilities, however a majority of complaints received by the District are for other sources of pollution such as illegal open burning, fireplace burning, dust generating activities, and miscellaneous odors. The District responds to all public complaints received, and makes every effort to respond as quickly as possible. Most complaints are investigated the same day they are reported. The following is a summary of all public air pollution complaints received and responded to within the South Central Fresno Community from July 2022 through June 2023. A previous report of complaints can be found in [Appendix F](#) of the South Central Fresno CERP and in the [2022 Annual Report](#).

Date/Time Received	Owner/Operator/Responsible party	Facility ID	Property Address	Complaint Type	Complaint Description	Resolution	Resolution Description
7/8/22 12:40 PM			2607 E Woodward Ave, Fresno	Other	White particles visible in the air.	Unable to Confirm	Inspector did not observe any fugitive emissions or white particles in the air.

Unable to Confirm	No smoke was observed coming from the facility during the investigation. Inspector reviewed facility records and found no exceedances of permit limits.

# Enforcement Plan

## Summary of Violations Found

The District implements a robust enforcement program that includes regular inspections of facilities with District permits as well as other potential sources of air contaminants. In the South Central Fresno CERP, the District committed to further enhancing its enforcement efforts in a few areas of concern to the community. Over the last four years, District compliance staff have completed numerous hours of additional surveillance in the South Central Fresno Community for open burning violations, fireplace violations, and idling diesel truck violations, in addition to conducting more frequent inspections at facilities with recent emissions violations and dust generating sites.

When a violation of a District rule or other air pollution regulation is discovered during an inspection, complaint investigation, or through surveillance activities, the violation is documented through the issuance of a formal notice to the owner or operator, and depending on the nature of the violation, may be subject to substantial monetary penalties. The following is a summary of all violation notices issued from July 2022 to June 2023 for violations of District Rules or other State air pollution control regulations within the South Central Fresno Community. These include violations at permitted facilities as well as other non-permitted facilities and private residences. A previous list of violations can be found in [Appendix F](#) of the South Central Fresno CERP and in the [2022 Annual Report](#).

Date	Type	Violation #	Issued To	Facility ID	Location	Description	Rules
7/7/2022	NOV	5028973	State Of Ca, Judicial Council Of Ca, Adm	C-3891	1130 O St, Fresno	Operating contrary to permit C-3891-2-0, condition number 5 (the exhaust stack was at an angle, not vertical).
