Yep! He's made great strides there too. He's retiring in August
- 00:59:20 R - Nate Knodt - Stockton: CCT Electric Switcher will enact a MAJOR reduction in air pollution. Switchers sit and idle a lot, and pull heavy loads at slow speeds coughing up large puffs of diesel smoke. Like school buses, few miles, but major emissions at stop and slow speeds. Switchers also tend to be decades old with older high-emission engines (prime movers).
- 01:00:08 Kevin Olp | CARB: I am proud of this video CARB created to share the amazing work this CSC has done for Stockton:
