

# CERP Implementation & Outreach Updates

Stockton CSC Meeting  
October 2, 2024

# CERP Implementation Updates

# Building Consensus: Urban Greening Proposal

Little Manila Rising's  
Urban Greening Proposal

YES: I support funding the Urban  
Greening Proposal

District will contract with Little  
Manila Rising, so they can begin  
implementation

NO: I do not support funding the  
Urban Greening Proposal

District will reassess next steps  
based on funding deadlines

# Building Consensus: Vegetative Barriers Proposal

Little Manila Rising's  
Vegetative Barriers  
Proposal

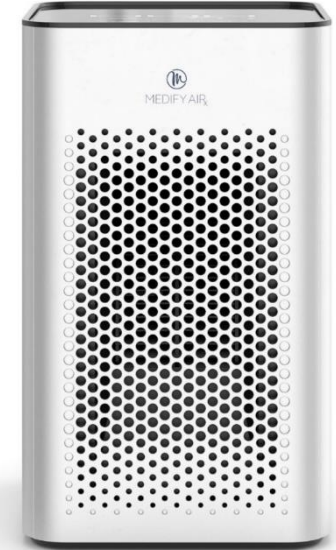

```

District will contract with Little Manila Rising, so they can begin implementation]; A --> C[NO: I do not support funding the Vegetative Barriers Proposal  
District will reassess next steps based on funding deadlines];
```

YES: I support funding the  
Vegetative Barriers Proposal  
District will contract with Little  
Manila Rising, so they can begin  
implementation

NO: I do not support funding the  
Vegetative Barriers Proposal  
District will reassess next steps  
based on funding deadlines

# Clean Air Rooms Update

	Allocated in CERP	Progress	Remaining
Funding	\$1,000,000	\$222,412	\$777,588
Units	5,000 units	1,139 units	3,861 units

- Since program opened, District has worked with CSC and CBOs to conduct outreach and plan/attend events to sign residents up for program
  - Social media posts, direct outreach to schools, community centers and other community hubs, coordination with CBOs
  - Attended 30 events to sign residents up for program

# Clean Air Rooms Participation Statistics

Month	Stockton Applications Received
October '23	57
November '23	157
December '23	148
January '24	41
February '24	78
March '24	6
April '24	58
May '24	161
June '24	6
July '24	17
August '24	26
September '24	14

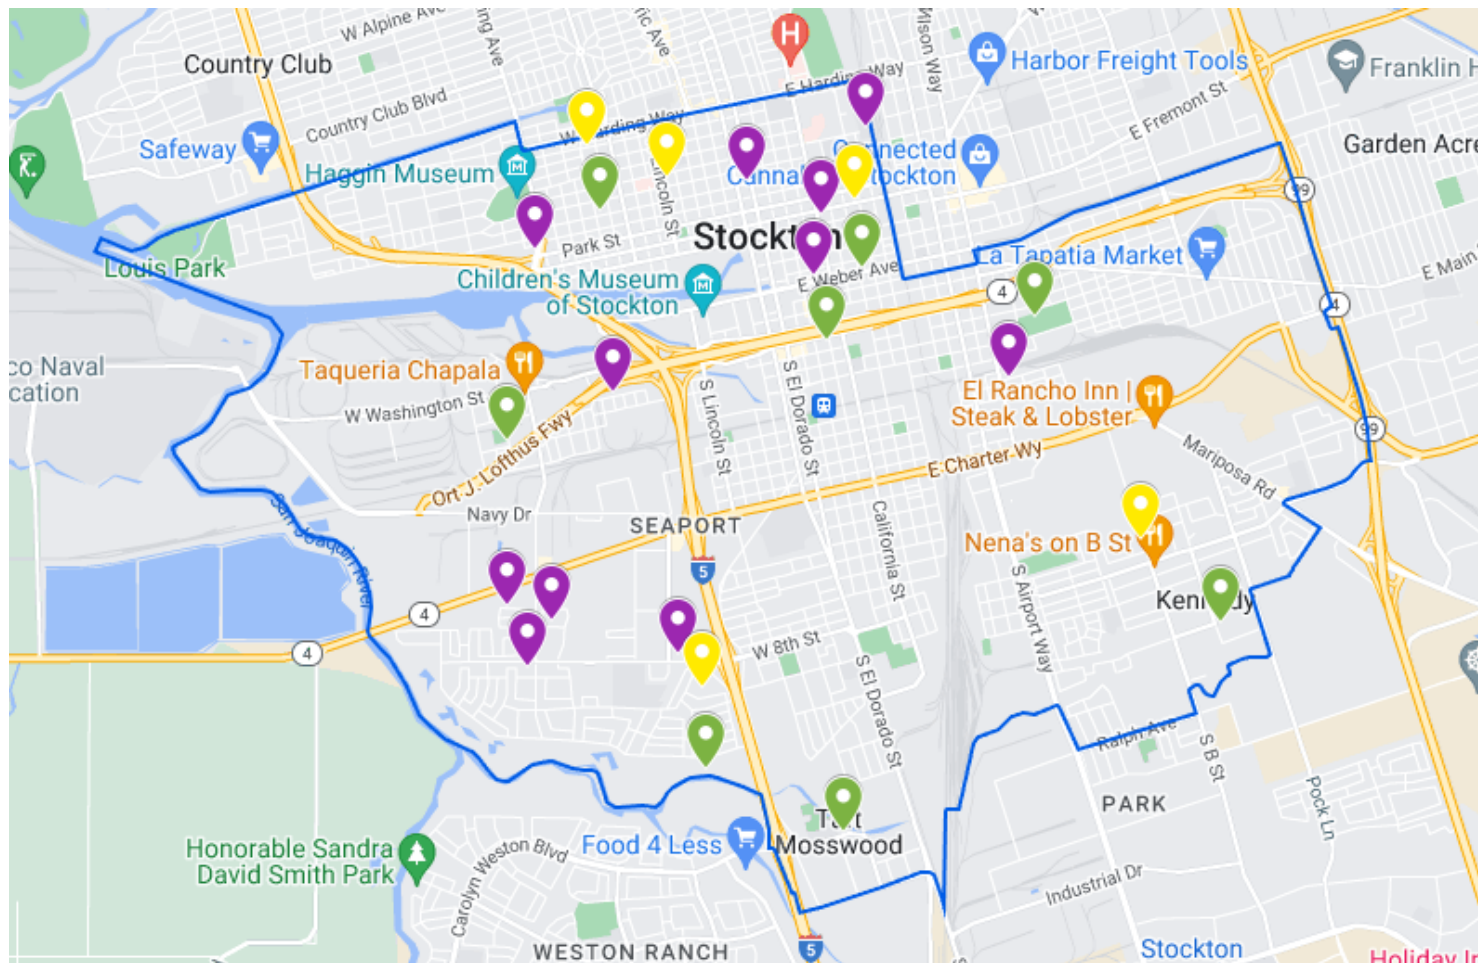

- Program has been successful, but participation rates have decreased even with continued outreach
- To ensure funding gets out to community and meets goal of improving indoor air quality, District is proposing program expansion to reach more residents in Stockton boundary

# Clean Air Rooms Program Expansion

- Given **demonstrated need** and **alignment with CARB's incentive guidelines** for improving indoor air quality, the District plans to **expand** the Clean Air Rooms Program to include: **daycares, childcare centers, senior living centers, nursing homes and additional spaces that serve sensitive receptors**
  - Commercial sized units, depending on size of facility
  - Up to 25% of funding (\$250,000) will be allocated to effort
  - District will bring updates to CSC and adjust as needed
- District will continue outreach for residential/in-home purifiers

# Clean Air Rooms Program Outreach

-  Childcare Centers/Daycares
-  Community Centers
-  Senior Living Centers

*What other locations should we reach out to?*

# Passenger Vehicle Replace Updates

- 78 applications submitted for a new or used plug-in hybrid or electric vehicle!
- Approximately \$820K remaining in funds (around 70% progress)
- District will continue to bring updates to CSC on progress

# Upcoming Weeknight Workshop

**VEHICLE REPLACEMENT EVENT**

**STOCKTON**

San Joaquin Valley AIR POLLUTION CONTROL DISTRICT

DRIVE CLEAN at the San Joaquin Valley CAN

- Valley CAN provides bilingual assistance at Weeknight Applicant Workshops
- Hosted workshops on June 3, July 15, August 12 and September 16
- Workshops will continue until funding is exhausted
- **NEXT EVENT:** Monday, October 21, 5:30 – 7:30 pm @ Mountain Mike's Pizza (3526 Manthey Road Ste B, Stockton, CA 95206)

# Outreach Updates

# Back To School Outreach Roosevelt Elementary School

- Handed out over 150 bilingual informational packets to parents
- Gave us the opportunity to share current and available grants for qualified residents
- Connected with Principal and office staff

# Back to School at Aspire Rosa Parks Academy

- It has been somewhat challenging to gain access to Aspire Charter Schools
- They are undergoing some administrative changes
- The charter schools are now open to our resources
- Invited to attend Rosa Parks Academy Back to School Night where we issued out 200+ bilingual informational packets

# Healthy Air Heroes Classroom Activity Box

## Air Quality Experiment

### Introduction

In this experiment, you will compare air quality inside your classroom to outside around your school to determine how different locations can affect air quality.

### Materials Included

Paper Plates • String • Petroleum Jelly • Magnifying Glass

### Instructions

1. Attach a piece of string to each paper plate using the hole at the top.
2. Label each paper plate with a location. You may want to write "*Science experiment in progress; please do not touch/throw away*" on the paper plates so no one removes them.
3. Rub petroleum jelly on one side of each paper plate.
4. Hang one paper plate inside classroom, and additional paper plates outside.
5. Take a picture of each paper plate after you initially hang them up.
6. Wait five days, and then take another picture of each paper plate for comparison.
7. Bring all paper plates inside and examine them with your magnifying glass.
8. Direct the class to engage in a discussion and respond to the five questions located on the reverse side of this page.

### How it works

Much of the pollution we breathe is not easy to see. This educational activity allows students to see the presence of fine particles (referred to as PM or particulate matter) to help facilitate discussion about why air pollution is a problem, what contributes to it and how we can help solve the problem by changing our own habits.

# Healthy Air Heroes Classroom Activity Box

## Analysis & Conclusion:

1. Describe what the particles on each paper plate looked like (color, shape, relative size).
2. Which paper plate had more particles attached to it?
3. Based on your answer to question #2, why do you think this paper plate had more particles attached to it?
4. How could the time of year affect the amount of particles found on the paper plate?
5. If you lived near a busy highway or an industrial complex, how do you think the amount of particles on your paper plate would change? Why?
